Audubon's Birds of America Coloring Book John James Audubon,1974-01-01 Including the red-winged blackbird, painted bunting, wood duck, great blue heron, ruby-throated hummingbird, purple finch, and blue jay, 46 different species of birds from all parts of the United States are included in this book. The pictures have been faithfully redrawn by Paul E. Kennedy from originals by John James Audubon (1785-1851), the most famous American painter-naturalist. For each species, the caption supplies the modern common and scientific names and the current range (by general region). No distinction is made between breeding range and winter range. Only the area of the United States, exclusive of Alaska and Hawaii, is considered. The birds shown are usually adult males when the caption does not give the information on age and sex.

Audubon's original plates, numbered to correspond to the pages of the book, have been reproduced in color on the covers. If you follow them, you will not only have a great deal of coloring pleasure, but you will also learn how to identify many important birds.

The Birds of America John James Audubon, Joel Oppenheimer, 2013-10-01 A never-before-published edition of the rare chromolithographic Audubon prints of American birds. John James Audubon is arguably America's most widely recognized and collected artist. His *Birds of America* has been reproduced often, beginning with the double elephant folio printed by Havill in England, followed by a much smaller "Octavo" edition printed in Philadelphia and sold by subscription. After Audubon's death, his family arranged with the New York printer Julius Bien to produce another elephant folio edition, this time by the new chromolithographic process. It too would be sold by subscription, but the venture, begun in 1858, was brought to an abrupt end by the Civil War. Only 150 plates were produced, and the number remaining today is slight; they are among the rarest and most sought after Audubon prints. Bound in cloth with a full cloth slipcase, this beautifully produced book is the first complete reproduction of Bien chromolithographs and will become the centerpiece of any bird lover's library.

The Birds of America John James Audubon, 1844 This edition has 65 new images, making a total of 500. The original configurations were altered so that there is only one species per plate. The text is a revision of the *Ornithological Biography*, rearranged according to Audubon's *Synopsis of the Birds of North America* (1839).

Audubon's Birds of America John James Audubon, Roger Tory Peterson, Virginia Marie Peterson, Walton H. Rawls, 1991 All of John James Audubon's brilliant bird engravings are graced by illuminating commentary by Roger Tory Peterson, one of America's best-known ornithologists, in this diminutive, yet lavish volume. 435 engravings. 900 illustrations, over 470 in full color.
