Sjögren's Syndrome and the Salivary Glands George A. W. Bruyn, 2022-03-21 This book answers questions about the critical role of ultrasound in the management of patients with Sjögren's syndrome. It also covers developments rheumatologists can foresee in performing a biopsy of the parotid gland. Each chapter is authored by experts on this condition, emphasizing the extent of current understanding and dealing with unanswered challenges and pitfalls. Topics such as modern imaging techniques like ultrasound and MRI and their importance are given particular focus in this book; practitioners are increasingly using imaging techniques to refine diagnosis and guide clinical management. Additionally, as a significant emerging point of interest in the field, biopsy of the major salivary glands, particularly ultrasound-guided procedures, receives extra attention within the text. The book also includes a chapter that deals with future directions and will also review the challenges patients face with unmanaged Sjögren's syndrome. Comprehensive and concise, Sjögren's Syndrome and the Salivary Glands provides a balanced overview between the chapters and ensure homogeneity of the terminology.

**EU Banking and Capital Markets Regulation** Filippo Annunziata, Michele Siri, 2025-01-10 The relationship between EU and national law has taken up new forms and dimensions in the context of EU financial legislation. The wide reforms introduced in the EU financial architecture over the past years raised new issues and opened new perspectives, stimulating paramount discussions and debates that are far from being settled. Issues concerning the interplay between EU and national law relate to all the dimensions of EU financial legislation: the principles and solutions that are consolidating in this area are also likely to set the standard within other fields of EU policy and legislation. Considering, for example, legal sources, the need to foster higher levels of harmonisation among the legislations of member states needs to be balanced against the

complex mechanism of options and discretions, as well as with the application of the principle of proportionality embedded in most of the fundamental texts of European financial legislation. Enforcement and institutional interplay are striking examples of the complexities of the new system. The application of traditional principles comes at grips with the continuous effort, by EU institutions and by the European Supervisory Authorities (ESAs), to set the ground for a stronger backbone of common principles for the application of EU legislation. This volume explores these topics in a new, multi-disciplinary perspective, that cuts across all relevant areas of European financial markets law. **Electronic Payments in the European Market** Jan A. Jans, 2024-09-03 This book offers a holistic approach to the level playing field concept that takes into account six regulatory objectives of the European financial services regulatory framework for banks and non-banks. These intermediate objectives are: (i) facilitating market access by non-banks to provide payment services; (ii) safeguarding the security of the payments market; (iii) safeguarding the integrity of the payments market; (iv) enhancing consumer protection in case of an unauthorised or erroneous payments; (v) allowing non-banks access to payment systems; and (vi) facilitating collaboration between competing payment service providers to develop standards for the payments market that reflect the interests of both banks and non-banks. In addition, the book provides high-level summaries of competition law requirements and related case law, and will be of interest to researchers, academics, and financial law practitioners.

The Extended Theory of Cognitive Creativity Antonino Pennisi, Alessandra Falzone, 2019-09-25 This edited volume focuses on the hypothesis that performativity is not a property confined to certain specific human skills, or to certain specific acts of language, nor an accidental enrichment due to creative intelligence. Instead, the executive and motor component of cognitive behavior should be considered an intrinsic part of the physiological functioning of the mind, and as endowed with self-generative power. Performativity, in this theoretical context, can be defined as a constituent component of cognitive processes. The material action allowing us to interact with reality is both the means by which the subject knows the surrounding world and one through which he experiments with the possibilities of his body. This proposal is rooted in models now widely accepted in the philosophy of mind and language; in fact, it focuses on a space of awareness that is not in the individual, or outside it, but is determined by the species-specific ways in which the body acts on the world. This theoretical hypothesis will be pursued through the latest interdisciplinary methodology typical of cognitive science, that coincide with the five sections in which the book is organized: Embodied, enactivist, philosophical approaches; Aesthetics approaches; Naturalistic and evolutionary approaches; Neuroscientific approaches; Linguistics approaches. This book is intended for: linguists, philosophers, psychologists, cognitive scientists, scholars of art and aesthetics, performing artists, researchers in embodied cognition, especially enactivists and students of the extended mind.

Cinéma&Cie 28 Ilaria A. De Pascalis, 2018-12-14 T00:00:00+01:00 Who is the Subaltern in the current global frame? Has neoliberalism changed the experience of subalternity? How do subalterns write history and what kind of history is written about subalternity? Cinéma&Cie's special issue addresses these and other questions through various theoretical approaches. The essays argue for the importance of a multidisciplinary perspective and address issues of media representation from a variety of perspectives, such as visual culture, history, philosophy, and postcolonialism. They focus on contemporary subalternity, and especially on the migrant - characterized by diaspora and condemned to invisibility by hegemonic power - and the postcolonial subaltern - who has now the possibility to express her/ himself in unexpected ways, in particular by using new media. The scattering and pervasiveness of media devices and gazes is discussed in depth in these essays, which delve into the dialectic between subaltern cultures and agency embodied in the subjects of representation.

Economics & Management 3/2024 AA.VV.,2024-10-07T00:00:00+02:00 While demographic change may seem slow and unnoticeable, its impact on the economic, social, and political future of a country is profound. This is particularly evident in Italy, the third oldest country in the world after Monaco and Japan. Growing longevity and the coexistence of multiple generations within families, organizations, and markets require a rethinking of education and integration policies. Embracing a demographic perspective can facilitate the development of innovative public policies and sustainable business strategies.

**Economics & Management 4/2024** AA.VV.,2025-01-10T00:00:00+01:00 In order to translate the vast body of scientific knowledge into practices that transform organizations and processes to create value for business and wellbeing for society, a dialog between academic research and management practice is essential. Although the impact of research has traditionally been measured in academic terms, it is now also being considered from a socioeconomic perspective, assessed according to how it affects society, the economy and the environment. Innovation can only be accelerated and the ramifications of research maximized by fostering mutual learning between academia and business through an interdisciplinary approach.

**COVID-19 and Perinatology** Daniele De Luca,Alexandra Benachi,2023-06-21 COVID19 pandemics has had profound consequences on public health and has represented a challenge for several medical specialties. Despite this was underestimated at the beginning of the outbreak, COVID19 is actually impacting on women and children health, as well. The consequences in this field are multifaceted and complex as they span from the occurrence of COVID19 in pregnant patients, to the possibility of SARS-CoV-2 mother-to-child transmission, the occurrence of neonatal COVID and pediatric sequelae. COVID19 and the related public health measures may also have important consequences on psychological well-being and organization of perinatal care as well as they raise relevant ethical issues. All these aspects were at risk to be forgotten within the many others highlighted by the pandemics but are important both for individual care and also from a political point of view and the organization of care. There is a large demand of high-quality education, information and training in this field and we answered that by organising the COVID19 in Pregnancy and Childhood Days: this book represents the hard legacy of this event with the contribution of key opinion leaders in all the aforementioned specialties. The book is answering

a clear need and is directed to: 1) obstetricians, 2) neonatologists, 3) pediatricians, 3) public health specialists, 4) adult critical care physicians, 5) infectious disease specialists, 5) psychologists. Last but not least, the informations resumed in the book are going to be useful for healthcare authorities to program perinatal care and improve it. The book will also serve as textbook for post-graduate courses and academic review resuming the state-of-the art knowledge on this area. Thus, it will be cited and used by researchers in the field: this is not a secondary characteristics as it may be quite difficult to find relevant informations, in this infodemic era, using the usual channels and databases.

**Dyadic Coping: A Collection of Recent Studies** Guy Bodenmann, Mariana K. Falconier, Ashley K. Randall, 2019-09-25  
Dyadic coping is a concept that has reached increased attention in psychological science within the last 20 years. Dyadic coping conceptualizes the way couples cope with stress together in sharing appraisals of demands, planning together how to deal with the stressors and engage in supportive or joint dyadic coping. Among the different theories of dyadic coping, the Systemic Transactional Model (STM; Bodenmann, 1995, 1997, 2005) has been applied to many studies on couples' coping with stress. While a recent meta-analysis shows that dyadic coping is a robust and consistent predictor of relationship satisfaction and couple's functioning in community samples, some studies also reveal the significance of dyadic coping in dealing with psychological disorders (e.g., depression, anxiety) or severe illness (e.g., cancer, diabetes, COPD, etc.). Researchers all over the world build their research on this or other concepts of dyadic coping and many typically use the Dyadic Coping Inventory (DCI) for assessing dyadic coping. So far, research on dyadic coping has been systematically presented in two books, one written by Revenson, Kayser, & Bodenmann in 2005, focussing on emerging perspectives on couples' coping, the other by Falconier, Randall, & Bodenmann more recently in 2016, addressing intercultural aspects of dyadic coping in African, American, Asian and European couples. This eBook gives an insight into recent dyadic coping research in different areas and countries.
