Four Preludes, Op. 28, Nos. 4, 6, 7, 20 Frédéric Chopin, Willard A. Palmer, In his short lifetime of 39 years, Frédéric Chopin composed more than 200 compositions for piano, most of which are part of the active repertoire of concert pianists the world over. Edward MacDowell's European Piano Music Paul Bertagnolli, 2024-09-10 Edward MacDowell's European Piano Music is a critical study of the piano music that MacDowell composed during his European sojourn (1876-1888), steeped in reception history and with a special emphasis of programmaticism. The book expands current knowledge of MacDowell's childhood in four of the chapters based on his previously uninvestigated sheet music collection, thereby achieving a better balance among the stages of MacDowell's life than is evident in most books of the life-and-works variety. Prolific contemporaneous music criticism, meticulously preserved in MacDowell's scrapbooks, is likewise undervalued in the MacDowell literature, but it furnishes penetrating observations about the expressive and programmatic content of numerous compositions, especially as it was revealed to critics when MacDowell performed his own works. Lastly, the book offers explanations for why MacDowell immersed himself in European culture for decades and then, at a crucial juncture in his career, embraced diverse American heritages and worked toward a conception of a pluralistic music that was American "in a creative sense." The book's content and methodology would appeal most directly to specialists within the broad fields of musicology and music theory, particularly within American art music and its composers; nineteenth-century music; program music; reception history; and piano literature.

A Spark of Magic M. Bradley Davis, 2004-08-06 Not even rural West Virginia can hide the talents of a modern-day Mozart. Stephen is a thirteen-year-old ward of the state—and a runaway who knows exactly what he is and what he wants. He's a gifted musician who wants a career in music. Who he is doesn't seem important—until his foster parents refuse to believe in his musical gift. Now, the lack of a last name and need for a solid identity hover in his dreams. He grew up in a small town orphanage. His foster home of the past few months was in another small town. He'd left one and couldn't go back to the other; the only place remaining was Clarkstowne—the big city a few miles away. He knew no one in Clarkstowne, yet he'd go there and search for someone who might understand his need. Stephen's simple "I am what I am, I need what I need" will change the perceptions of many people, beginning with the conductor of a respected symphony orchestra, a lonely boy, the musicians with whom he interacts, the friends he makes along the way, and the caseworkers and state officials who must straighten out the controversy centering on him.

Music in the Social and Behavioral Sciences William Forde Thompson, 2014-07-18 This first definitive reference resource to take a broad interdisciplinary approach to the nexus between music and the social and behavioral sciences examines how music affects human beings and their interactions in and with the world. The interdisciplinary nature of the work provides a starting place for students to situate the status of music within the social sciences in fields such as anthropology, communications, psychology, linguistics, sociology, sports, political science and economics, as well as biology and the health sciences. Features: Approximately 450 articles, arranged in A-to-Z fashion and richly illustrated with photographs, provide the social and behavioral context for examining the importance of music in society. Entries are authored and signed by experts in the field and conclude with references and further readings, as well as cross references to related entries. A Reader's Guide groups related entries by broad topic areas and themes, making it easy for readers to quickly identify related entries. A Chronology of Music places material into historical context; a Glossary defines key terms from the field; and a Resource Guide provides lists of books, academic journals, websites and cross-references. The multimedia digital edition is enhanced with video and audio clips and features strong search-and-browse capabilities through the electronic Reader's Guide, detailed index, and cross references. Music in the Social and Behavioral Sciences, available in both multimedia digital and print formats, is a must-have reference for music and social science library collections.
