Processions: Studies of Bronze Age Ritual and Ceremony presented to Robert B. Koehl Judith Weingarten,Colin F. Macdonald,Joan Aruz,Lara Fabian,Nisha Kumar,2023-10-05 Robert Koehl has long considered processions to have played an integral role in Aegean Bronze Age societies. Papers concentrate mainly on evidence from Crete, the Cyclades and the Greek mainland, with additional perspectives from abroad, these geographic divisions forming the basic outline of this volume.

The end of the lake-dwellings in the Circum-Alpine region Francesco Menotti,2015-07-30 After more than 3500 years of occupation in the Neolithic and Bronze Age, the many lake-dwellings around the Circum-Alpine region 'suddenly' came to an end. Throughout that period alternating phases of occupation and abandonment illustrate how resilient lacustrine populations were against change: cultural/environmental factors might have forced them to relocate temporarily, but they always returned to the lakes. So why were the lake-dwellings finally abandoned and what exactly happened towards the end of the Late Bronze Age that made the lake-dwellers change their way of life so drastically? The new research presented here draws upon the results of a four-year-long project dedicated to shedding light on this intriguing conundrum. Placing a particular emphasis upon the Bronze Age, a multidisciplinary team of researchers has studied the lake-dwelling phenomenon inside out, leaving no stones unturned, enabling identification of all possible interactive socioeconomic and environmental factors that can be subsequently tested against each other to prove (or disprove) their validity. By refitting the various pieces of the jigsaw a plausible, but also rather unexpected, picture emerges.

The Oxford Handbook of Neolithic Europe Chris Fowler,Jan Harding,Daniela Hofmann,2015 The Neolithic - a period in which the first sedentary agrarian communities were established across much of Europe - has been a key topic of archaeological research for over a century. However, the variety of evidence across Europe and the way research traditions in different countries (and languages) have developed makes it very difficult for both students and specialists to gain an

overview of continent-wide trends. The Oxford Handbook of Neolithic Europe provides the first comprehensive, geographically extensive, thematic overview of the European Neolithic - from Iberia to Russia and from Norway to Malta - offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation. Chapters written by leading experts in the field examine topics such as the movement of plants, animals, ideas, and people (including recent trends in the application of genetics and isotope analyses); cultural change (from the first farming to the first metal artefacts); domestic architecture; subsistence; material culture; monuments; and burial and other treatments of the dead. In doing so, the volume also considers the history of research and sets out agendas and themes for future work in the field.
