Exploring the Pedagogy of Learning and Playing Outdoors Mehmet Mart, Georgia Gessiou, Jane Waters-Davies, 2025-02-14 Focusing on the empirical evidence base for pedagogical decisions taken when children are playing and learning outside, this groundbreaking book examines the intention and purpose of children's outdoor playful activity and the associated issues of pedagogy. Chapters address questions about the role of the adult in children's learning outside in a manner that is inclusive in nature, by recognising the varied contexts in which children's playful activity outside takes place. Reflecting multiple cultural contexts, chapters consider social and physical aspects to ensure value systems are visible and critically considered. The book acknowledges the continuum of children's outdoor experience from highly structured activity to free play outside. It also examines the existing evidence base about children's outdoor play, including a consideration of how adults construct and respond to children's playful activity outside to realise the associated benefits. With reference throughout to many international contexts, this book reminds us of the shaping force of cultural practices and beliefs about children's playful activity outside and will be of interest to undergraduate and postgraduate audiences studying early childhood education.

The Palgrave International Handbook of Women and Outdoor Learning Tonia Gray, Denise Mitten, 2018-05-12 This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments (OLEs). Women choose to participate actively in outdoors careers, many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities. They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive, rewarding excellence regardless of age, gender, socioeconomic status, disability, or ethnicity. However, both research and collective experiences in OLEs suggest that many women feel invisible, relegated, marginalized, and undervalued. In response to this marginalization, this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs. Women scholars and practitioners from numerous fields, such as experiential outdoor education, adventure education, adventure therapy, and gender studies, explore the implications of their research and practice using poignant examples within their own disciplines. These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present. Social inequalities still abound in OLEs, and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive. Global in perspective and capacious in content, this one-stop volume is an indispensable reference resource for a diverse range of academics, including students and researchers in the fields of education, psychology, sociology, gender studies, geography, and environment studies, as well as the many

outdoors fields.

Including information on Forest School, *Developing Creativity and Curiosity Outdoors* builds on theories of creative learning and development, and offers a wealth of ideas and activities for application in a range of outdoor settings. From designing and building structures, to making music and exploring colour, shape and pattern, this book illustrates how engagement in and with the natural world might extend children's creative development, encouraging them to speak, listen, move freely, play and learn. Case studies demonstrate good practice and each chapter concludes with questions, encouraging the reader to reflect on and develop their own practice. Practical ideas can be adapted for use in more urban environments, and further reading, online resources and lists of suppliers make *Developing Creativity and Curiosity Outdoors* an essential resource for those looking to maximise the natural curiosity of children. This book will give early years practitioners and students the confidence and knowledge they need to embark on an exciting journey of outdoor discovery with young children.

Sensory play is set within a wider context, highlighting links to child development theories. Elemental Play and Outdoor Learning Annie Woods, 2016-11-10 Providing a fresh approach to examining development in the early years, this book draws together well-established ideas and theories based on outdoor play experiences and connects them to spiritual development in children. *Elemental Play and Outdoor Learning* considers socio-cultural perspectives, guided participation and mediated learning alongside playfulness as it looks at young children's developing interest in the people around them, the environment they experience and the ideas and objects that involve them. Including

rich encounters with young children and adults, chapters cover: elemental play as an approach to observe and support children's holistic development; the role of people in developing effective exploratory and social skills; using the concept of elemental play to consider the spiritual system as an aspect of child development; imaginative play with raw, natural materials and how prepared environments can encourage children's natural exploration; an exploration of well-established constructs of play and how elemental play can be integrated or re-conceptualised with the other theories. Exploring current thinking about natural experiences, interest in forest school activity and fresh insight into dynamic ecological concepts, this book will be essential reading for practitioners and students on undergraduate and postgraduate early years and childhood studies courses.

Exploring Outdoor Play in the Early Years Trisha Maynard, Jane Waters, 2014-06-16 Outdoor play is a significant and essential aspect of a young child's development and enjoys a renewed emphasis in early years practice, in keeping with the core principles embedded within the early years tradition. However, this emphasis may sit uneasily alongside a requirement to focus on the development of literacy and numeracy skills and supporting outdoor play can raise a number of thorny issues such as freedom, safety and risk. This book challenges the reader to consider: Why outdoor play is seen to be of significance within early childhood Whether this view is justified (what are the benefits of outdoor play?) The implications for practitioners who may be facing conflicting pressures in their work with young children In particular, the writers skilfully blend theory, research and practical guidance to address three important issues: What constitutes 'good' outdoor provision for young children and babies? How do we respect and respond to the young child in outdoor provision? How do we support risky play within the bounds of a statutory curriculum or regulatory regime? Incorporating chapters from internationally renowned authors working in this field, this book is recommended both for practitioners involved in early years education and care and for students at foundation, degree and post-graduate levels. This is a thought provoking book that draws on research to encourage the reader to reflect on the essence of outdoor play in early childhood. Recognising that within our society assumptions are made about outdoors and about childhood, this book challenges the reader to reflect on outdoor provision from a number of perspectives. The outdoor environment matters to young children. This book not only makes the case for outdoor play, it considers what that actually looks like in the UK and internationally, and asks us to reflect on the implications for our own working practices. Maynard and Waters set out to provoke critical reflection and inspire practitioners; they have certainly achieved their aim and this book is a welcome addition to the debate about outdoors in the early years. Gail Ryder Richardson, Early Years Consultant and Trainer, Outdoor Matters! Contributors: Valerie Huggins, Sara Knight, Helen Little, Trisha Maynard, Ellen Beate Hansen Sandseter, Alison Stephenson, Helen Tovey, Sue Waite, Jane Waters, Jan White, Karen Wickett, Helen Woolley and Shirley Wyver.

Summary of Angela J. Hanscom's *Balanced and Barefoot* Everest Media, 2022-04-30T22:59:00Z Please note: This is

a companion version & not the original book. Sample Book Insights: #1 The rise in developmental delays and sensory issues in children is a growing trend. It is becoming more and more common for children to need occupational therapy services to treat these issues. #2 The problems that children face today are largely due to the fact that they are not getting enough outdoor activity. This book will help you provide your child with the ideal settings for active free play outdoors. #3 The number of children receiving occupational therapy services has increased over the last few years. The doctors refer these kids to occupational therapy when there is a problem with attention, balance, strength, coordination, or sensory processing. #4 There has been a rise in the number of children being diagnosed with attention issues and ADHD. Children are not paying attention today, and this is largely due to their inability to sit still and concentrate.
