The Athlete's Fix Pip Taylor,2015-05-07 In The Athlete's Fix, registered dietitian Pip Taylor will help you find your problem foods--and the foods that make you feel and perform your best. The Athlete's Fix offers a sensible, 3-step program to identify food intolerances, navigate popular special diets, and develop your own customized clean diet that will support better health and performance. Recent studies show that food intolerances are almost 5 times more prevalent today than in the 1950s; as many as 1 in 6 Americans is estimated to have a food sensitivity. Exercise can make food intolerances even worse for endurance athletes. Food cravings, GI distress, headaches, brain fog--these common reactions can be more than symptoms of a tough workout. They could be caused by the foods you eat. Endurance sports stress the body, often worsening mild food sensitivities and causing symptoms like GI distress, food cravings, and headaches. Many athletes aggressively eliminate foods as a one-size-fits-all solution. These restrictive diets sometimes bring short-term improvements, but they are difficult to maintain and often leave athletes undernourished and underperforming. The Athlete's Fix offers a smarter, fine-tuned approach. Taylor will show how you will benefit most from a diet full of a wide variety of foods. You'll improve your daily diet, cut out common irritants, then add back foods until you feel great enjoying your own personalized clean diet. To help with this transition, The Athlete's Fix offers 50 recipes using easily tolerated foods that support a base functional diet. The Athlete's Fix examines hot issues for athletes like: Celiac disease, gluten intolerance, gluten-free and grain-free diets Lactose intolerance FODMAPs and specific carbohydrate intolerances, including fructose Reactions to food chemicals such as salicylates, amines, and glutamates Inflammatory foods Food sensitivity testing and elimination diets Popular special diet programs like Paleo, Whole30, Dukan, Mediterranean, and Dash Vegetarian, vegan, and raw food diets The Athlete's Fix will help you isolate and identify your food intolerances while enabling you to eat the widest possible variety of healthy foods. Feel better--perform better--with The Athlete's Fix.

The Diet Fix Yoni Freedhoff M.D.,2014-03-04 With The Diet Fix, weight loss expert Dr. Yoni Freedhoff offers a groundbreaking, useable guide to begin living happily while losing weight permanently. It is time to break the cycle of traumatic dieting. Despite the success stories publicized by Atkins, South Beach, Weight Watchers, and others, 90% of all diets end in failure. How can we fix the way we lose weight so that we make results last? Whether used on its own or in conjunction with any other diet, Dr. Freedhoff's program shows how to replace a toxic dieting mindset with positive beliefs

and behaviors. Dr. Freedhoff has uncovered the flawed thinking that sabotages even the most earnest weight loss efforts. The majority of dieting or weight loss programs call for regular sacrifice: Give up an entire food group; fight hunger day and night; undertake exhausting and grueling exercise regiments. These approaches are unrealistic, unhealthy, and make it nearly impossible to maintain results. Now, at last, there is hope. In *The Diet Fix*, Dr. Freedhoff offers a tested program for breaking down the negative thought patterns that prevent people from losing weight and keeping it off. Through the course of years of research and patient treatment, he has developed a 10-Day Reset that supports losing weight while maintaining a healthy, enjoyable lifestyle. This reset is designed to eliminate the habits that so often lead to weight gain: use it to shut down cravings, prevent indulgences from turning into binges, and break up with the scale once and for all. The 10-Day Reset can make any diet more effective, whether it's low-carb, low-fat, meal replacement, calorie tracking, or anything in between.

The Hunger Fix Pamela Peeke, Mariska van Aalst, 2013-09-17 Fight food addiction and overeating with fitness guides, recipes, and meal plans from renowned physician Pam Peeke. In *The Hunger Fix*, Dr. Pam Peeke uses the latest neuroscience to explain how unhealthy food and behavioral fixes have gotten us ensnared in a vicious cycle of overeating and addiction. She even shows that dopamine rushes in the body work exactly the same way with food as with cocaine. Luckily, we are all capable of rewiring, and the very same dopamine-driven system can be used to reward us for healthful, exciting, and fulfilling activities. *The Hunger Fix* lays out a science-based, three-stage plan to break the addiction to false fixes and replace them with healthier actions. Fitness guides, meal plans, and recipes are constructed to bolster the growth of new neurons and stimulate the body's reward system. Gradually, healthy fixes like meditating, going for a run, laughing, and learning a new language will replace the junk food, couch time, and other bad habits that leave us unhappy and overweight. Packed with practical tips, useful advice, and plenty of wit, wisdom, and inspiring stories of those who have successfully transformed their bodies, *The Hunger Fix* is a life-changing program for anyone (of any size) trapped by food obsession and the urge to overeat.

Food Addiction, Obesity, and Disorders of Overeating Claire E. Wilcox, 2021-09-30 This book is written for providers of

broad training backgrounds, and aims to help those who care for people with EDs, overweight and obesity provide evidence-based care. The goal of the book is to provide these providers with a straightforward resource summarizing the current standard of care. However, it goes further by also introducing the concept of food addiction (FA) as a model to understand some forms of overeating. This book discusses the pros and cons of embracing FA and reviews the evidence for and against the validity and utility of FA. By doing so, the chapters convey a “middle ground” approach to help people with obesity, BED, and bulimia nervosa plus FA symptomatology who also want to lose weight. The text discusses FA by reviewing several of the main ongoing controversies associated with the construct. It reviews both the clinical and neuroscientific evidence that some individuals’ eating behavior mirrors that seen in substance use disorders (SUD), such as how their relationship with food appears to be “addictive”. Chapters also discuss how many of the mechanisms known to underlie SUDs appear to drive overeating in animal models and humans. Finally, the text argues that the similarities between the brain mechanisms of addictive disorders and overeating behavior has the potential to open up new avenues for current treatment and treatment development. *Food Addiction, Obesity and Disorders of Overeating: An Evidence-Based Assessment and Clinical Guide* is suited for both medical and mental health practitioners, including physicians in primary care or psychiatry, nurses, psychologists, social workers, medical students and medical residents. It could also be utilized by researchers in obesity and ED fields, stimulating ideas for future research and study design.

The Autoimmune Fix Tom O'Bryan, 2016-09-20 Do you have crud in the blood? Millions of people suffer from autoimmunity whether they know it or not. The root cause of most weight gain, brain and mood problems, and fatigue, autoimmunity can take years--or even decades--for symptoms and a clear diagnosis to arise. Through years of research, Dr. Tom O'Bryan has discovered that autoimmunity is actually a spectrum, and many people experiencing general malaise are already on it. And while autoimmune diseases, such as Alzheimer's, Multiple Sclerosis, osteoporosis, diabetes, and lupus, have become the third leading cause of death behind heart disease and cancer, many people affected are left in the dark. The good news is that many autoimmune conditions can be reversed through a targeted protocol designed to heal the autoimmune system, 70 percent of which is located in the gut. *The Autoimmune Fix* includes two comprehensive 3-week plans: In the first 3 weeks, you'll follow a Paleo-inspired diet during which you cut out gluten, sweets, and dairy--the three primary culprits behind autoimmunity. Once the dietary changes have been addressed, *The Autoimmune Fix* focuses on the other causes of autoimmunity such as genetics, other dietary issues, and microbiome. *The Autoimmune Fix* provides a practical and much-needed guide to navigating these increasingly common conditions to help you feel better and develop a plan that works for you.

Celebrity Chefs, Food Media and the Politics of Eating Joanne Hollows, 2022-08-11 Working across food studies and media studies, Joanne Hollows examines the impact of celebrity chefs on how we think about food and how we cook, shop and eat. Hollows explores how celebrity chefs emerged in both restaurant and media industries, making chefs like Jamie Oliver and Gordon Ramsay into global stars. She also shows how blogs and YouTube enabled the emergence of new types of branded food personalities such as Deliciously Ella and BOSH! As well as providing a valuable introduction to existing research on celebrity chefs, Hollows uses case studies to analyse how celebrity chefs shape food practices and wider social, political and cultural trends. Hollows explores their impact on ideas about veganism, healthy eating and the Covid-19 pandemic and how their advice is bound up with class, gender and race. She also demonstrates how celebrity chefs such as Jamie Oliver, Hugh Fearnley-Whittingstall, Nadiya Hussain and Jack Monroe have become food activists and campaigners who intervene in contemporary debates about the environment, food poverty and nation.

To Fix Or To Heal Joseph E. Davis, Ana Marta Gonzalez, 2016-02-26 Do doctors fix patients? Or do they heal them? For all of modern medicine's many successes, discontent with the quality of patient care has combined with a host of new

developments, from aging populations to the resurgence of infectious diseases, which challenge medicine's overreliance on narrowly mechanistic and technical methods of explanation and intervention, or "fixing" patients. The need for a better balance, for more humane "healing" rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person, is more urgent than ever. Yet, in public health and bioethics, the fields best positioned to offer countervailing values and orientations, the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine. The collected essays in *To Fix or To Heal* do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives. The contributors also shed valuable light on why reductionism has persisted and why more holistic models, incorporating social and environmental factors, have gained so little traction. The contributors examine the moral appeal of reductionism, the larger rationalist dream of technological mastery, the growing valuation of health, and the enshrining of individual responsibility as the seemingly non-coercive means of intervention and control. This paradigm-challenging volume advances new lines of criticism of our dominant medical regime, even while proposing ways of bringing medical practice, bioethics, and public health more closely into line with their original goals. Precisely because of the centrality of the biomedical approach to our society, the contributors argue, challenging the reductionist model and its ever-widening effects is perhaps the best way to press for a much-needed renewal of our ethical and political discourse.

Food Policy in the United Kingdom Martin Caraher, Sinéad Furey, Rebecca Wells, 2023-07-24 This book provides an introduction to food policy in the United Kingdom, examining policy development, implementation, influences and current issues. The book begins by providing a wide-ranging introduction to food policy in the UK, situating it within wider global debates and establishing key drivers, such as issues related to global citizenship, trade and finance. The use of food control as a policy lever is also discussed and contrasted with alternative approaches based on behaviour change. The book presents an overview of the history of UK food policy, from which there is much to be learned, before moving onto current challenges posed by political instability, both at home and abroad, global pandemics and cost of living crises. Foremost is the need to manage public health, including both malnutrition and obesity, while promoting sustainable and healthy diets, as well as the broader issues around addressing food security and food poverty. The book also examines public sector food initiatives, such as school food and early childhood provisions, and food regulation. As a part of food regulation, chapters examine food scares and food fraud, from chalk in flour to horsegate. The role of media, marketing and advertising is also considered within a policy perspective. Taking a wider lens, the book also discusses the impact of global food trade and the financialisation of food on food policy in the UK and vice versa. The book is supported by instructor eResources on the Routledge website designed to support student learning as well as provide regular updates on UK food policy developments. The eResources include student activities, group exercises and links to further reading and additional resources. This book serves as a key

introduction to UK food and agricultural policy for students, scholars, policymakers and professionals, as well as those interested in food systems, public health and social policy more widely.

A Handbook of Food Crime Allison Gray,Ronald Hinch,2018-05-09 Food today is over-corporatized and under-regulated. It is involved in many immoral, harmful, and illegal practices along production, distribution, and consumption systems. These problematic conditions have significant consequences on public health and well-being, nonhuman animals, and the environment, often simultaneously. In this insightful book, Gray and Hinch explore the phenomenon of food crime. Through discussions of food safety, food fraud, food insecurity, agricultural labour, livestock welfare, genetically modified foods, food sustainability, food waste, food policy, and food democracy, they problematize current food systems and criticize their underlying ideologies. Bringing together the best contemporary research in this area, they argue for the importance of thinking criminologically about food and propose radical solutions to the realities of unjust food systems.
