Legal Cannabis: The Great Social Experiment Peter M. Birkeland, 2018-06-07 Colorado. Washington. Oregon. Colorado. Since 2012 nine states and DC have legalized cannabis, with more states to follow. Already a \$9.7 billion dollar industry creating hundreds of thousands of new jobs, legal cannabis is not only one of the fastest growing industries, but it is changing the dynamics of American society. Through interviews and fieldwork, Peter M. Birkeland shines a sociological lens on the relevant issues of legal cannabis and investigates the most pressing issues. Who are the cannabis industry

participants? What are the costs in running a marijuana business and how much money is generated? Who are the users of cannabis in this newly legal market? What are the challenges in creating a regulatory framework? What has happened to crime, teenage use, and the black market? Birkeland's book provides a documentary-like account of the emerging cannabis industry in Colorado, the first jurisdiction in the world to legalize cannabis cultivation, manufacturing, and retail sales. Birkeland worked with cannabis business owners, interviewed regulators, policy-makers (including Governor Hickenlooper), industry participants, and opponents to legalization. He attended tradeshow, symposiums, meet-ups, penetrated the black market, and visited communities that have embraced cannabis sales. Through his firsthand experience, interviews and research, Birkeland traces the evolution of the cannabis industry from strictly illegal to legal, and he documents the challenges operators, regulators, and consumers face in the quest to carry out sales of a federally illegal product. Is cannabis legalization a short-lived social experiment, or is it ushering a new era of herbal medicine and recreational use that will transform society? The author uncovers the realities of the newly legal cannabis industry in Colorado, a litmus test for other states considering legalizing cannabis.

Cannabis Business Startup Oscar White, 2021-05-05 MARIJUANA GROWING AND BUSINESS How do you start Cannabusiness? How do I write a business plan for a dispensary? Thinking about starting a cannabis business but don't know where to begin? THIS BOOK WILL TEACH YOU HOW TO GROW MARIJUANA YOURSELF, STEP BY STEP, AND MOST IMPORTANTLY HOW TO CREATE YOUR OWN BUSINESS The market value of the U.S. cannabis industry is projected to reach \$30 billion annually by 2025. Cannabis has crept out of the shadows of the stoner culture and emerged as a multi-billion-dollar industry. Before you start any business, you should have some idea of what the industry landscape is like: What are the earning potentials? What are the risks? Who is your competition? Before you get started Cannabis cultivation laws vary widely state-by-state. Also, we can't stress this enough: Growing cannabis is illegal in a lot of places, and the penalties - which include steep fines and prison time - can be much worse than possession, since growing can imply an intent to distribute. You need to be especially scrupulous about heeding these rules. Do your homework and read up on the laws in your state. Some states prohibit growing cannabis, while others, like my home state of California, permits anyone over age 21 to grow cannabis, but only up to a certain number of plants. Colorado, Oregon, Nevada, Vermont, and Maine also allow cultivation, but again, the specifics depend on the state. Definitely clarify what your rights are before you start the glorious path to at-home bud gardening. Let's start! Reading the first book you will learn: GROWING MARIJUANA FOR BEGINNERS Step-by-Step in 10 STEPS CANNABIS SATIVA CANNABIS INDICA CANNABIS RUDERALIS DIFFERENT PERCENTAGES OF THC THE RESIN CBD AND THC HOW GENETICS INFLUENCES RELATIONSHIPS BETWEEN THC AND CBD THE STAGES OF CANNABIS CULTIVATION ELEMENTS TO CHECK ON CANNABIS SEEDS TEMPERATURE PLAYS A FUNDAMENTAL ROLE IN GERMINATION GLASS OF WATER TECHNIQUE WET PAPER NAPKIN TECHNIQUE USE CUBES IN ROCK WOOL INDOOR OUTDOORS TRANSPLANT: STEP-BY-STEP GUIDE HARVEST DRYING HOW TO MAKE FEMINIZED CANNABIS SEEDS NUTRIENTS And much, much more! Cannabis sativa L. - Botany and Biotechnology Suman Chandra,Hemant Lata,Mahmoud A. ElSohly,2017-05-23 This book highlights current Cannabis research: its botany, authentication, biotechnology, in vitro propagation, chemistry, cannabinoids biosynthesis, metabolomics, genomics, biomass production, quality control, and pharmacology. *Cannabis sativa* L. (Family: Cannabaceae) is one of the oldest sources of fiber, food and medicine. This plant has been of interest to researchers, general public and media not only due to its medicinal properties but also the controversy surrounding its illicit use. Cannabis has a long history of medicinal use in the Middle East and Asia, being first introduced as a medicine in Western Europe in the early 19th century. Due to its numerous natural constituents, Cannabis is considered a chemically complex species. It contains a unique class of terpeno-phenolic compounds (cannabinoids or phytocannabinoids), which have been extensively studied since the discovery of the chemical structure of tetrahydrocannabinol (Δ^9 -THC), commonly known as THC, the main constituent responsible for the plant's psychoactive effects. An additionally important cannabinoid of current interest is Cannabidiol (CBD). There has been a significant interest in CBD and CBD oil (extract of CBD rich Cannabis) over the last few years because of its reported activity as an antiepileptic agent, particularly its potential use in the treatment of intractable epilepsy in children.
