Practical L2 Reading Alan M. Taylor, 2025-06-22 Have you ever read a book on second language (L2) learning and thought to yourself that the book was overburdened with academic jargon about theory and esoteric topics? Have you ever wondered about what is usually used in L2 reading and whether it actually works? This book serves as the definitive reference for the topic of the effects of glossing on L2 reading comprehension. No other book comes remotely close. We discuss glossing studies that have shown a positive and negative effect of glossing on L2 reading comprehension and vocabulary learning, along with providing a more general statistical perspective. Overall, the first section outlines variables influencing L2 reading comprehension. The next describes glossing and L2 learning theory, reading comprehension and vocabulary learning. The final section contains chapters on strategy training and testing, arguing that strategies and tests can be useful in improving and measuring L2 reading.

Democracy in America, Volume 2 Alexis De Tocqueville, 1990-08-11 Volume 2 of the classic commentary on the influence of democracy on the intellect, feelings, and actions of Americans. With an introduction by Phillips Bradley.

Paris 1937 James D. Herbert, 2018-10-18 This elegant and theoretically informed book, illustrated with forty-five photographs, explores the cultural significance of six exhibitions or new museum installations, all opening in Paris between mid-1937 and early 1938: the commercially oriented world's fair titled L'Exposition Internationale des Art et Techniques; the

historical Musée des Monuments Français; the ethnographic Musée de l'Homme; two massive art retrospectives, one sponsored by the state of France and the other by the municipality of Paris; and L'Exposition Internationale du Surréalisme. James D. Herbert capitalizes on the proximity of these disparate exhibits to show how they competed with and yet also complemented one another in visually rendering the full scope of human accomplishment through time and across the globe. In this task, Herbert argues, they both succeeded and failed in interesting and productive ways. He asserts that the exhibitions projected and, in a sense, created (created precisely through the act of projection) the real world that they ostensibly only represented. In fact, Herbert argues, the exhibitions developed a particular sense of French national identity—one that, in managing to be at the same moment both inwardly focused and beneficently expansive, would present a vivid contrast to the growing German nationalism of the Third Reich. His epilogue takes a final look at these issues from the perspective of Jean Cocteau's 1950 film *Orphée*. A ground-breaking work in cultural history, *Paris 1937*, with its insightful examination of objects from a variety of fields, is a pioneering text in the field of visual studies.

Samuel Johnson James James Lowry Clifford, Donald Johnson Greene, 1970-01-01

Painting and Reality Etienne Gilson, 2023-08-15 A classic study of the art of painting and its relationship to reality. In this book, Étienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order. Drawing on insights from the writings of great painters—from Leonardo, Reynolds, and Constable to Mondrian and Klee—Gilson shows how painting is foreign to the order of language and knowledge. Painting, he argues, seeks to add new beings to nature, not to represent those that already exist. For this reason, we must distinguish it from another art, that of picturing, which seeks to produce images of actual or possible beings. Though pictures play an important part in human life, they do not belong in the art of painting. Through this distinction, Gilson sheds new light on the evolution of modern painting. A magisterial work of scholarship by an acclaimed historian of philosophy, *Painting and Reality* features paintings from both classical and modern schools, and includes extended selections from the writings of Reynolds, Delacroix, Gris, Gill, and Ozenfant.

French Inventions of the Eighteenth Century Shelby T. McCloy, 2021-10-21 The eighteenth century, age of France's leadership in Western civilization, was also the most flourishing period of French inventive genius. Generally obscured by England's great industrial development are the contributions France made in the invention of the balloon, paper-making machines, the steamboat, the semaphore telegraph, gas illumination, the silk loom, the threshing machine, the fountain pen, and even the common graphite pencil. Shelby T. McCloy believes that these and many other inventions which have greatly influenced technological progress made prerevolutionary France the rival, if not the leader, of England. In his book McCloy analyzes the factors that led to France's inventive activity in the eighteenth century. He also advances reasons for France's failure to profit from her inventive prowess at a time when England's inventions were being put to immediate and practical

use.

Cardinal Richelieu Joseph Bergin,1985-01-01 Armand Jean du Plessis, cardinal-duc de Richelieu et de Fronsac; 9 September 1585? 4 December 1642) was a French clergyman, noble and statesman. Consecrated as a bishop in 1608, he later entered politics, becoming a Secretary of State in 1616. Richelieu soon rose in both the Catholic Church and the French government, becoming a Cardinal in 1622, and King Louis XIII's chief minister in 1624. He remained in office until his death in 1642; he was succeeded by Cardinal Mazarin, whose career he had fostered.--Wikipedia.
