The Profile of Political Leaders Jaap van Ginneken, 2016-06-30 By analysing a wide range of empirical research into leadership, this book provides a composite portrait of frequent characteristics, such as personality and demeanour, that influence both the success and popularity of political leaders. Through the lenses of mass psychology and collective behaviour sociology, the author offers fascinating observations on political leadership which reveal a coherent pattern. In our choice of and support for leaders, we still seem to be guided by unconscious or instinctive preferences. Evolutionary psychologists have labelled this 'CALP' for 'Cognitive Ancestral Leadership Prototype'. Length, symmetry, face form, voice pitch, eye blinking and more turn out to play a role - even today - alongside personality and style. Each chapter of the book offers a case study to illustrate these observations, including Barack Obama, Ronald Reagan, Nicolas Sarkozy, and Boris Johnson. This book is accessibly written to appeal to students of politics, psychology and sociology, as well as the wider interested reader.

King of the Mountain Arnold M. Ludwig, 2013-07-24 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired, socially purposeful, or even self-serving, all of which they attribute to being human, but they masticate, fornicate, and procreate, much as chimps and apes do, so they should have little cause to get upset if they learn that they act like other primates when they politically agitate, debate, abdicate, placate, and administrate, too. *King of the Mountain* presents the startling findings of Arnold M. Ludwig's eighteen-year investigation into why people want to rule. The answer may seem obvious—power, privilege, and perks—but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable, trust nobody, feel besieged, and face almost certain death. Ludwig's results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power, govern, and rule. Profiling every ruler of a recognized country in the twentieth century—over 1,900 people in all—Ludwig establishes how rulers came to power, how they lost power, the dangers they faced, and the odds of their being assassinated, committing suicide, or dying a natural death. Then, concentrating on a smaller sub-set of 377 rulers for whom more extensive personal information was available, he compares six different kinds of leaders, examining their characteristics, their childhoods, and their mental stability or instability to identify the main predictors of later political success. Ludwig's penetrating observations, though presented in a lighthearted and entertaining way, offer important insight into why humans have

engaged in war throughout recorded history as well as suggesting how they might live together in peace.

CAE OXFORD AVIATION ACADEMY - NAVIGATION I , This text book has been written and published as a reference work to assist students enrolled on an approved EASA Air Transport Pilot Licence (ATPL) course to prepare themselves for the EASA ATPL theoretical knowledge examinations. "How Tall Are You?" Don Doxsie,2023-04-04 Most people believe that being extremely tall would be fantastic. It isn't. It has its advantages, but it also has nearly as many disadvantages. It can be useful in basketball, business, and politics, and when friends are trying to find you in a crowded place. However. it's also inconvenient, expensive, sometimes harmful to one's health, and a little tedious to be bombarded almost daily with questions about how the weather is up there. In this book, the author takes a lighthearted look at the various aspects of extreme height, and those affected by it, from the perspective of someone who has spent the majority of his life towering above the crowd.

The Invincible Quest Conrad Black,2009-02-24 The Invincible Quest is an authoritative biography of one of the most accomplished and controversial leaders of the twentieth century. Beginning with Richard Nixon's birth to Quaker parents in 1913 and ending with his death in 1994, Conrad Black traces Nixon's career, assessing both his achievements and the evolution of popular and historical thinking about him since his death. Drawing on recently opened tapes and documents, and on Black's personal interviews with many of the major players in Nixon's administration, The Invincible Quest reveals a new

side of Nixon: a man who didn't have the advantage of charisma but was surprisingly self-assured and effective; a man dogged by political scandal yet seemingly unstoppable. Opinionated, balanced, and perceptive, *The Invincible Quest* makes a significant contribution to re-evaluating the idiosyncratic president's entire, eventful career.

My Paperback Book Fanga Agbor Martial, 2018 This book *The Longstanding Imperialism in Africa* examines the African contribution in promoting a lasting imperialism in the African Continent.

Dictionary of World Biography Barry Jones, 2025-01-06 Jones, Barry Owen (1932-). Australian politician, writer and lawyer, born in Geelong. Educated at Melbourne High School and Melbourne University, he was a public servant, high school teacher, television and radio performer, university lecturer and lawyer before serving as a Labor MP in the Victorian Parliament 1972-77 and the Australian House of Representatives 1977-98. He took a leading role in reviving the Australian film industry and abolishing the death penalty in Australia, and was the first politician to raise public awareness of global warming, the 'post-industrial' society, the IT revolution, biotechnology, the rise of 'the Third Age' and the need to preserve Antarctica as a wilderness. In the Hawke Government, he was Minister for Science 1983-90, Prices and Consumer Affairs 1987, Small Business 1987-90 and Customs 1988-90. He became a member of the Executive Board of UNESCO, Paris 1991-95 and National President of the Australian Labor Party 1992-2000, 2005-06. He was Deputy Chairman of the Constitutional Convention 1998. His books include *Decades of Decision 1860- (1965)*, *Joseph II (1968)*, *Age of Apocalypse (1975)* and *Knowledge Courage Leadership: Insights & Reflections (2016)*, and he edited *The Penalty Is Death (1968, revised and expanded 2022)*. His bestseller, *Sleepers, Wake! Technology and the Future of Work (1982, Fourth edition published in 1995)* has been translated into Chinese, Japanese, Korean, Swedish and braille.

Mental Maps in the Early Cold War Era, 1945-68 S. Casey, J. Wright, 2011-07-26 The early Cold War was a period of dramatic change. New superpowers emerged, the European powers were eclipsed, colonial empires tottered. Political leaders everywhere had to make immense adjustments. This volume explores their hopes and fears, their sense of their place in the world and of the constraints under which they laboured.

Educational Leadership in Times of Crisis Izhar Oplatka, 2023-09-25 This book aims to fill the gap in our knowledge about crisis management in schools, its particular characteristics, and strategies from a historical point of view. It combines knowledge about educational leadership with biographical narratives of great leaders in history who have faced a tremendous crisis successfully and from whom we can learn a lot about effective coping strategies in times of crisis. The leaders in the book represent different nations and organizations, facing political, military, economic or social crises. The book provides a deeper knowledge necessary for preparing for a possible crisis and for managing it in successful ways if it comes and adds novel insights into the field of educational administration and leadership in the twenty-first century.

Grace of Monaco Jeffrey Robinson, 2015-05-01 The acclaimed biography by Jeffrey Robinson, now revised and updated to coincide with the major motion picture starring Nicole Kidman as Princess Grace. It was one of the most famous romances of the 20th century—Europe's most eligible bachelor, Prince Rainier of Monaco, and America's most beautiful movie star, the Academy Award-winning actress Grace Kelly, fell in love against the backdrop of the closest thing the modern world has to a magical kingdom, the French Riviera's Principality of Monaco. Told with affection and humor, and written with the unprecedented cooperation of Prince Rainier III and his children, Prince Albert, Princess Caroline, and Princess Stephanie, *Grace of Monaco* takes readers beneath the surface glitz and the glamour of Monte Carlo for a never-to-be-forgotten portrait of the House of Grimaldi.

The Oxford Children's Book of Famous People Oxford Univ Pr, 2002 The Oxford Children's Book of Famous People is a one-stop guide to the people who matter. This stylish and information-packed book tells the stories of 1000 women and men whose lives have influenced the course of history. Splendid Seniors Jack Adler, 2007-03-01 Imagination grows by exercise, and contrary to common belief, is more powerful in the mature than in the young. So said W. Somerset Maugham, one of the 52 people whose achievements after age 65 are featured in *Splendid Seniors: Great Lives, Great Deeds*. The inspiring ensemble includes Mary Baker Eddy, who was 86 when she founded the Christian Science Monitor; Alexander Graham Bell, who received a patent for his work on a hydrofoil boat at age 75; Benjamin Disraeli, who became prime minister of England for the second time when he was 70; and Susan B. Anthony, who was past 80 when she founded the International Woman Suffrage Alliance. *Splendid Seniors* reminds us that creativity, passion & influence can not only flower in later years, but bear delicious fruit. From Mother Teresa to Alexander Graham Bell, Albert Einstein, Charles de Gaulle, Pablo Picasso, Grandma Moses and many more, *Splendid Seniors* offers true tales of inspirational deeds as well as memorable quotes from each individual profiled, says Midwest Book Review. A source of inspiration for seniors everywhere, and proof that greatness, creativity, passion, and intelligence can bloom their brightest with age and experience.

Springer Handbook of Atmospheric Measurements Thomas Foken, 2021-11-09 This practical handbook provides a clearly structured, concise and comprehensive account of the huge variety of atmospheric and related measurements relevant to meteorologists and for the purpose of weather forecasting and climate research, but also to the practitioner in the wider field of environmental physics and ecology. The Springer Handbook of Atmospheric Measurements is divided into six parts: The

first part offers instructive descriptions of the basics of atmospheric measurements and the multitude of their influencing factors, fundamentals of quality control and standardization, as well as equations and tables of atmospheric, water, and soil quantities. The subsequent parts present classical in-situ measurements as well as remote sensing techniques from both ground-based as well as airborne or satellite-based methods. The next part focusses on complex measurements and methods that integrate different techniques to establish more holistic data. Brief discussions of measurements in soils and water, at plants, in urban and rural environments and for renewable energies demonstrate the potential of such applications. The final part provides an overview of atmospheric and ecological networks. Written by distinguished experts from academia and industry, each of the 64 chapters provides in-depth discussions of the available devices with their specifications, aspects of quality control, maintenance as well as their potential for the future. A large number of thoroughly compiled tables of physical quantities, sensors and system characteristics make this handbook a unique, universal and useful reference for the practitioner and absolutely essential for researchers, students, and technicians.

Remote Sensing Technology Applications in Forestry and REDD+ Kim Calders, Inge Jonckheere, Joanne Nightingale, Mikko Vastaranta, 2020-03-17 Advances in close-range and remote sensing technologies are driving innovations in forest resource assessments and monitoring on varying scales. Data acquired with airborne and spaceborne platforms provide high(er) spatial resolution, more frequent coverage, and more spectral information. Recent developments in ground-based sensors have advanced 3D measurements, low-cost permanent systems, and community-based monitoring of forests. The UNFCCC REDD+ mechanism has advanced the remote sensing community and the development of forest geospatial products that can be used by countries for the international reporting and national forest monitoring. However, an urgent need remains to better understand the options and limitations of remote and close-range sensing techniques in the field of forest degradation and forest change. Therefore, we invite scientists working on remote sensing technologies, close-range sensing, and field data to contribute to this Special Issue. Topics of interest include: (1) novel remote sensing applications that can meet the needs of forest resource information and REDD+ MRV, (2) case studies of applying remote sensing data for REDD+ MRV, (3) timeseries algorithms and methodologies for forest resource assessment on different spatial scales varying from the tree to the national level, and (4) novel close-range sensing applications that can support sustainable forestry and REDD+ MRV. We particularly welcome submissions on data fusion.

Surpassing Realism Mark Gilbert, 2004-09-08 A second edition of this book is now available. A true global giant, the European Union is a unique confederation of 15 member-states whose collective economic power is second only to that of the United States. Already encompassing 375 million citizens, the EU will soon grow to include a further 10 states from Eastern Europe and the Mediterranean. To understand the future of this remarkable experiment in regional cooperation, we must

first trace its past. This engaging text provides a concise political history of European integration from the end of World War II to the present. The European project raises fascinating and important questions: How did Europe's states overcome their traditional rivalries and quarrels to build supranational institutions? What were the economic and geopolitical forces that drove them? Which statesmen contributed most to defining the European project? What are the issues that confronted the EU in the last decade and what problems will the EU face as its leaders consider even more advanced forms of political integration? All these questions are addressed by this text, which offers a clear and readable account of the complex historical process by which Europe's unique polity has been built. 2004 update: A Fiasco But Not a Disaster by Mark Gilbert, courtesy of World Policy Journal, Vol. 21 (Spring 2004) www.worldpolicy.org

Richard M. Nixon Conrad Black, 2008-10-23 From the late 1940s to the mid-1970s, Richard Nixon was a polarizing figure in American politics, admired for his intelligence, savvy, and strategic skill, and reviled for his shady manner and cutthroat tactics. Conrad Black, whose epic biography of FDR was widely acclaimed as a masterpiece, now separates the good in Nixon -- his foreign initiatives, some of his domestic policies, and his firm political hand -- from the sinister, in a book likely to generate enormous attention and controversy. Black believes the hounding of Nixon from office was partly political retribution from a lifetime's worth of enemies and Nixon's misplaced loyalty to unworthy subordinates, and not clearly the consequence of crimes in which he participated. Conrad Black's own recent legal travails, though hardly comparable, have undoubtedly given him an unusual insight into the pressures faced by Nixon in his last two years as president and the first few years of his retirement.

Between Memory and Mythology Natalia Starostina, 2015-06-18 Inspired by the theoretical insights of Patrick Hutton, Roland Barthes and Maurice Halbwachs, this volume examines the relationship between myths and memory and the ways in which the narratives (and the mythologies) of wars play a central role in constructing modern identities. The scholarly examination of war narratives shows how the political elite became eagerly engaged in the process of mythmaking. The collection opens with a preface by Patrick Hutton, the leading historian in the field o ...
