The Lean Startup Eric Ries,2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.
  The Lean Startup Eric Ries,2011 Most startups are built to fail. But those failures, according to entrepreneur Eric Ries, are preventable. Startups don't fail because of bad execution, or missed deadlines, or blown budgets. They fail because they are building something nobody wants. Whether they arise from someone's garage or are created within a mature Fortune 500 organization, new ventures, by definition, are designed to create new products or services under conditions of extreme uncertainly. Their primary mission is to find out what customers ultimately will buy. One of the central premises of The Lean Startup movement is what Ries calls validated learning about the customer. It is a way of getting continuous feedback from customers so that the company can shift directions or alter its plans inch by inch, minute by minute. Rather than creating an elaborate business plan and a product-centric approach, Lean Startup prizes testing your vision continuously with your customers and making constant adjustments--

efficient new business using growth engines and innovation Many more hacks and strategies to build a lean and profitable startup What Is Inside This Summary: A comprehensive overview of the entire book Detailed summaries of each chapter Important and memorable quotes from each chapter A bulleted list of key takeaways from the book Excerpt from the summary of The Lean StartupThe Lean Startup MethodThe Lean Startup is comprised of five principles which make up the majority of the book. These principles include: Entrepreneurs are everywhere. Ries states that you don't have to be a business owner to be classified as an entrepreneur. This means that entrepreneurs can be found everywhere, in every sector of business, and in companies of varying size. Entrepreneurship is management. A startup is more than just the product or service being sold. If you think of a startup as an institution that constantly grows and changes based on the extreme uncertainty of the market, you start to get the idea. In fact, Ries even suggests making the term entrepreneur a managerial job title filled by someone who is adept at reacting to market changes as they occur. Validated Learning. One of the major benefits to creating a startup is learning how to build a sustainable business. In other words, it's about more than just creating products, making money, and serving customers. Build-Measure-Learn. The fundamental idea behind every startup is to turn an idea into a product, measure customer feedback, and then decide whether to change course or persevere. The Lean Startup method encourages accelerating this feedback loop as much as possible. Innovation Accounting. Measuring progress, setting up milestones, and learning how to prioritize tasks will help to improve entrepreneurial outcomes while holding innovators accountable. This is accomplished using a new accounting method designed specifically for startups Many of these principles are ideas originally developed by Toyota - a company which has spearheaded the lean manufacturing movement. Ries has taken the time to apply many of these same principles to businesses of all sizes, both startups and established companies. The result of Ries' work is known as the Lean Startup methodology.This book was written to welcome what Ries refers to as Management's Second Century. Modern startups cannot rely on what has worked in the past. Rather, startups require a new set of tactics - tactics that have been incorporated into the Lean Startup process. These tactics will ensure the future success of entrepreneurs around the world.

Lean Startup Jack Lead,2020-03-26 Are you looking for a proven method to start and scale a successful startup? Keep reading and you'll find out all the great benefits the Lean StartUp method can bring to your business! Eric Ries said that startups could be a success if they follow a certain process. This means that the process can always be learned and those who have experience can also teach it. Every entrepreneur will always wonder whether a startup will fail. If you wish to begin a lean startup, you must identify a small gap in the market using time and money effectively. You will need to use different techniques to ensure that your product or service reaches the market in a faster way while also avoiding the production or manufacture of products that no consumer will want. Most amateur entrepreneurs feel that they are taking a shot in the dark when they are identifying a product or service they can offer to their potential consumers. But, it does not always have to be

a trial and error proposition. Controlled Use and Deployment of Resources One of the most important principles of a lean startup is that the startup must use everyone of its resources effectively and efficiently. Since most startups do not have enough investment they use the lean business model to encourage the effective deployment and continuous development of the resources that the company does have. A lean startup must continuously evaluate how the initial investment can be used to meet their targets and their customer requirements. The startup must also ensure that it does not spend more than what is necessary to test, evaluate and refine its products. If the costs are kept at a minimum, the startup can maximize its profits whenever there is a sale. Every lean startup is dependent on organic growth since it does not have huge capital investment. When the profits made at the early stages are reinvested in the company, the startup can scale its operations up in a controlled manner without sacrificing quality. Entrepreneurs are everywhere Eric Ries believes that every individual in the world is an entrepreneur. There are some successful entrepreneurs who have built their organization in their garage. You can find entrepreneurs in Hollywood, in the IRS and even in well-established organizations. These people are always looking for a way to develop products that increase value to the customer. Entrepreneurship is management It is important to remember that every startup is not defined by its products but is an institution. Therefore, there must be a management team in place to understand and develop the startup. Validated Learning A startup does not exist only to build products for the customers or to make money. It exists only when the management learns how to build a sustainable business. The learning can be validated through statistic measures by running experiments that test the startups' vision. Lean startup Eric Ries,2020-01-21 Eric Ries szerint a startup olyan vállalkozás, amelynek célja új termék vagy szolgáltatás létrehozása szélsőségesen bizonytalan feltételek között. Ez ugyanúgy igaz a garázsában szerencsét próbáló egyéni vállalkozóra, mint a Fortune 500-as egyik vállalatának tárgyalótermében összegyűlő rutinos szakemberekre. Hiszen

ugyanaz a küldetésük: át kell hatolniuk a bizonytalanság ködén, hogy megtalálják a fenntartható vállalkozáshoz vezető sikeres utat. A lean gyártás tapasztalataira építve a Lean Startup forradalmian új menedzsmentmódszert kínál. Arra biztatja az innovatív vállalkozókat – cégmérettől függetlenül –, hogy ne dőljenek be a hiúsági mutatóknak, inkább a tényleges előrehaladást mérjék, és mielőbb derítsék ki, mit is akarnak valójában az ügyfelek. Üzleti elképzeléseiket pedig folyamatosan teszteljék, és igazítsák a körülményekhez, mielőtt még túl késő lenne.
