Pruebas de funcionalidades y optimización de páginas web CABALLERO GONZÁLEZ, CARLOS, 2016-02-23 Hoy en día uno de los pilares del desarrollo de páginas web es la interacción con los usuarios que utilizan dichas páginas. Los errores en la introducción de datos pueden tener lugar sin mala intención pero también con un interés malicioso, y es ahí donde surge el interés por realizar una fase de validación. En este libro aprenderemos a aplicar técnicas de prueba y verificación de la integración de los componentes en la página web y veremos cómo identificar las fases que intervienen en este proceso, clasificando los distintos tipos de archivos que se van a integrar en la página y verificando la integración de scripts ya desarrollados. Cada capítulo se complementa con actividades prácticas, cuyas soluciones están disponibles en www.paraninfo.es. Los contenidos se corresponden con los desarrollados en la UF 1306 Pruebas de funcionalidades y optimización de páginas web, incardinada en el MF 0951_2 Integración de componentes software en páginas web, perteneciente al certificado de profesionalidad IFCD0110 Confección y publicación de páginas web, regulado por el RD 1531/2011, de 31 de octubre, y modificado por el RD 628/2013, de 2 de agosto.

Marketing Móvil: una Nueva Herramienta de Comunicación. Tiziana Priede Bergamini,César Martín de Bernardo González,2007-07 Estamos ante una de las mayores revoluciones tecnológicas de la historia. El teléfono móvil se ha convertido en poco tiempo en el medio de comunicación más popular entre las personas y en un elemento imprescindible para la vida de, prácticamente, toda la población. Este escenario ha motivado la realización de este trabajo, cuyo objetivo principal es averiguar en qué medida, la telefonía móvil puede suponer también una revolución en el terreno empresarial, concretamente en las políticas y estrategias de comunicación y marketing de las organizaciones españolas. El lector encontrará en estas páginas un análisis de la situación actual de las principales características del sector, una descripción de los nuevos métodos digitales y sus consecuencias sobre el marketing y un análisis cualitativo sobre el presente y el futuro de marketing móvil en España. El teléfono móvil se convertirá en uno de los medios de comunicación y marketing más importantes para las empresas españolas, siempre y cuando sea utilizado de forma apropiada a través del márketing con respeto, lejos de mensajes masivos, vacíos y sin interés potenciando una relación más real y personal con los clientes que lo deseen. Su nivel de difusión y acogida dependerá también de la evolución que alcancen las nuevas tecnologías móviles, fundamentalmente la denominada tercera generación, que se considera como la pieza clave del desarrollo de esta actividad.

Los Pobres en la ERA de la Información Laurent Elder,Rohan Samarajiva, Dr,Alison Gillwald, Dr,Hernan

Galperin,2014-05-09 La información y la comunicación siempre han abierto oportunidades a los pobres para obtener ingresos, reducir el aislamiento y responder con flexibilidad a los desastres, los conflictos y las situaciones de emergencia. Con la explosión del uso del teléfono móvil en el mundo en desarrollo, incluso las comunidades marginadas se están beneficiando de las herramientas de comunicación modernas. Este libro analiza los impactos de estos cambios tecnológicos sin precedentes. Con base en encuestas de hogares exclusivas, realizadas por redes de investigación localizadas en 38 países en desarrollo, ayuda a ampliar el conocimiento sobre cómo los pobres usan las tecnologías de información y comunicación (TIC). ¿Cómo se han beneficiado de los aparatos móviles, las computadoras e Internet? ¿Qué ideas puede aportar la investigación para promover un acceso asequible a las TIC, de manera que las comunidades de todo el mundo en desarrollo puedan aprovechar las oportunidades que ofrecen? El núcleo de este libro sintetiza los resultados de una investigación pionera llevada a cabo con el apoyo del IDRC en África, Asia y América Latina. Esta investigación sirvió de estímulo para realizar cambios de políticas que ayudaron a mejorar el acceso a las TIC a todos los niveles de la sociedad. Los pobres en la era de la información recopila la evidencia recogida en las regiones y reúne las perspectivas regionales sobre este tema tan importante. El libro concluye con la presentación de recomendaciones de políticas y algunos lineamientos para la investigación futura. Más resultados de la investigación y los análisis pueden ser encontrados en el sitio Web complementario www.idrc.ca/en_foco_informacion.

Learn Spanish News Vol.4 Nik Marcel, LEARN SPANISH NEWS Vol.4: English & Spanish THIS EDITION: The dual-language text has been arranged into sentences and shorter paragraphs for quick and easy cross-referencing. The source text is the Spanish language edition of Voice of America (VOA). The Spanish text has been translated into English for this dual-language project. The reader can choose between four formats: Section 1: English to Spanish Section 2: Spanish to English Section 3: English Section 4: Spanish A methodology for getting the most out of this bilingual format is explained in the book's Foreword. The primary purpose of this text is to equip a foreign language learner with the ability to start reading news in the particular foreign language: to be able to read only in the foreign language, and extract enough understanding to

continue the language learning process fruitfully this way. A reader might like to go back to reading dual-language news for reinforcement and further development, returning to foreign language only news with a deeper understanding. By going back to the same 'old' news, you are going over words, word patterns, and passages with which you already have a certain familiarity. The process of reinforcement, learning or retaining of what is new, and exposure to what is unfamiliar, is much easier this way — even though the news may seem a little dated. The aim of informing the reader about actual news is secondary, especially given that the content will become less current (and less relevant) over time. If you are having trouble with the level of difficulty in the text, a suggested path for learning languages is as follows: Familiarise yourself with a basic language instruction book — or re-read the one you have. Once a student has studied the basics, a suitable book about basic grammar can be helpful. The suggestion is that any grammar book be studied more with the intent of recognition and understanding, rather than memorising and obsessive rote learning. Go through as much of the grammar book you feel you can digest — maybe even the whole book — skipping over what is not easily understood. After this, read through a portion of text in a book called 'Spanish Sentences', by 2LanguageBooks, looking for examples of what you have picked up (or gleaned) in your hopefully not so arduous study of grammar. Even repeatedly seeing a word that you remember seeing listed as a 'subject pronoun' or a 'third person plural' verb of some sort is a great help. Then, depending on your inclination, return to the grammar book (or your basic Spanish book), or move on to lengthier bilingual text — like in 2Language Books texts containing news or stories, for example —, or find some suitable Spanish text: a simple novel, a Spanish news website, etc. Grammar books will likely have some verb charts. However, there are currently good on-line resources that go further — dictionaries with a verb conjugation 'search' option. Many basic language books offer some form of audio support. Internet services — primarily news based radio stations — offer podcasts. Audio from television is an additional resource, and can be formatted for use on various digital platforms. However, if audio is an important component of your interest in languages, electronic devices that support quality text-to-speech (TTS) will likely be appealing. With a library card, TTS technology (in a device that supports the relevant content), and the above mentioned resources, an entire language learning system is available for not much more than a cup of coffee! There is no substantial financial outlay to get you started. Furthermore, there are no additional ongoing fees (and updates), and there are no expiry dates on 'premium' content and resources. Tic's, comunicación y periodismo digital - Tomo I Elias Said Hung, 2009 Esta obra parte de la iniciativa de un grupo de investigadores vinculados a la Red Cyted-Ciberperiodismo, quienes abrieron una convocatoria pública con el fin de dar visibilidad a la labor que muchos investigadores latinoamericanos y europeos están realizando en torno al estudio de la incidencia de las TIC en nuestras sociedades contemporáneas, específicamente en todo lo relacionado con las normativas legales, las comunicaciones y el ciberperiodismo. El tomo I tiene como propósito analizar algunas de las dimensiones que resultan vitales para comprender las transformaciones que están generando los avances tecnológicos en nuestras sociedades, debido al interés de quienes lideramos este proyecto por reflexionar la comunicación y el ciberperiodismo como un todo, como parte de algo cada vez más complejo y diverso: la relación que tienen los individuos e instituciones ante la creciente mediación de las TIC.
