Soldier Dogs Maria Goodavage, 2012-12-31 A leading reporter offers a tour of military working dogs' extraordinary

training, heroic accomplishments, and the lasting impacts they have on those who work with them. People all over the world have been riveted by the story of Cairo, the Belgian Malinois who was a part of the Navy SEAL team that led the raid on Osama bin Laden's compound. A dog's natural intelligence, physical abilities, and pure loyalty contribute more to our military efforts than ever before. You don't have to be a dog lover to be fascinated by the idea that a dog-the cousin of that furry guy begging for scraps under your table-could be one of the heroes who helped execute the most vital and high-tech military mission of the new millennium. Now Maria Goodavage, editor and featured writer for one of the world's most widely read dog blogs, tells heartwarming stories of modern soldier dogs and the amazing bonds that develop between them and their handlers. Beyond tales of training, operations, retirement, and adoption into the families of fallen soldiers, Goodavage talks to leading dog-cognition experts about why dogs like nothing more than to be on a mission with a handler they trust, no matter how deadly the IEDs they are sniffing, nor how far they must parachute or rappel from aircraft into enemy territory. Military working dogs live for love and praise from their handlers, says Ron Aiello, president of the United States War Dogs Association and a former marine scout dog handler. The work is all a big game, and then they get that pet, that praise. They would do anything for their handler. This is an unprecedented window into the world of these adventurous, loving warriors.

Transforming Trauma Philip Tedeschi,Molly Anne Jenkins,2019-07-15 Have you ever looked deep into the eyes of an animal and felt entirely known? Often, the connections we share with non-human animals represent our safest and most reliable relationships, offering unique and profound opportunities for healing in periods of hardship. This book focuses on research developments, models, and practical applications of human-animal connection and animal-assisted intervention for diverse populations who have experienced trauma. Physiological and psychological trauma are explored across three broad and interconnected domains: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including military service, war, and developmental trauma; and 3) times of crisis, such as the ever-increasing occurrence of natural disasters, community violence, terrorism, and anticipated or actual grief and loss. Contributing authors, who include international experts in the fields of trauma and human-animal connection, examine how our relationships with animals can help build resiliency and foster healing to transform trauma. A myriad of animal species and roles, including companion, therapy, and service animals are discussed. Authors also consider how animals are included in a variety of formal and informal models of trauma recovery across the human lifespan, with special attention paid to canine- and equine-assisted interventions and psychotherapy. In addition, authors emphasize the potential impacts to animals who provide trauma-informed services, and discuss how we can respect their participation and implement best practices and ethical standards to ensure their well-being. The reader is offered a comprehensive understanding of the history of research in this field, as well as the latest advancements and areas in need of further or refined investigation. Likewise, authors explore, in depth, emerging practices

and methodologies for helping people and communities thrive in the face of traumatic events and their long-term impacts. As animals are important in cultures all over the world, cross-cultural and often overlooked animal-assisted and animal welfare applications are also highlighted throughout the text.

Mental Illness in Dogs Linda Scroggins RN, MSN, CBCC-KA, CPDT-KA, 2017-11-27 *Mental Illness in Dogs: A Guide for Trainers* is directed to both new and experienced dog trainers and behavior consultants. The idea that dogs can be afflicted with mental illness is fairly new but growing. Author, Linda Scroggins had years of experience working with dogs with behavior issues when a little yellow dog named Tom entered her life and home. Living with a dog who had been diagnosed with mental illness was her wakeup call to the challenges families sharing their lives with these dogs face each day. The author's journey and eventual loss was the catalyst to developing a plan for all dog trainers who may come into contact with these special dogs. This book reviews the current methods for approaching treatment for these dogs by examining the humane hierarchies currently provided by professional organizations. The book highlights those dogs whose needs may cause them to fall outside the hierarchy and how proceeding with current behavior modification methods may harm dogs or worsen their illness. *Mental Illness in Dogs: A Guide for Trainers* suggests a new approach that focuses on a collaborative process between the dog trainer and other professionals caring for the dog. Keywords: Dog, Trainer, Guide, Behavior, Mental, Illness, Veterinary, Specialist, Fear, Aggression

Top Dog Maria Goodavage,2015-09-01 The New York Times bestselling author of Secret Service Dogs and Soldier Dogs delivers the incredible, true story of K-9 Marine hero Lucca, and the handlers who fought alongside her through two bloody wars in Iraq and Afghanistan. Maria Goodavage knocks it out of the park in this fast paced, spell binding page turner --John W. Pilley, co-author of Chaser: Unlocking the Genius of the Dog Who Knows a Thousand Words Maria Goodavage takes readers into the life of Lucca K458, a decorated and highly skilled military working dog. An extraordinary bond develops between Lucca and Marine Corps dog handlers Chris Willingham and Juan Rodriguez, in what would become a legendary 400-mission career. A specialized search dog, Lucca belongs to an elite group trained to work off-leash at long distances from her handler to sniff out deadly explosives. She served alongside both Special Forces and regular infantry, and became so sought-after that platoons frequently requested her by name. Here, in gritty detail, is the gripping account of Lucca's adventures on and off the battlefields, including tense, lifesaving explosives finds and rooftop firefights, as well as the bravery of fellow handlers and dogs they served with. Ultimately we see how the bond between Lucca and her handlers overcame the endless brutalities of war and the traumas such violence can inflict. Top Dog is a portrait of modern warfare with a heartwarming and inspiring conclusion that will touch dog lovers and the toughest military readers.

Expedition and Wilderness Medicine Gregory H. Bledsoe,Michael J. Manyak,David A. Townes,2008-11-03 With an increase in visits to remote and dangerous locations around the world, the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased. Medical personnel working in or near such locations are not always explicitly trained in the management of unique environmental injuries, such as high-altitude sickness, the bends, lightning strikes, frostbite, acute dehydration, venomous stings and bites, and tropical diseases. Many health care professionals seek training in the specialty of wilderness medicine to cope with the health risks faced when far removed from professional care resources, and the American College of Emergency Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this discipline. This book covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition and explains how to treat a variety of conditions in a concise, clinically oriented format.

Animal Abuse Catherine Tiplady,2013 Animal abuse is an increasingly recognized issue throughout the world and makes headlines every year. The plight of animals is well documented, but the hidden cost to those who help is not fully understood.

2018 Joint Trauma System (JTS) Clinical Practice Guidelines (CPGs) & DOD TRAUMA REGISTRY DATA
DICTIONARY For Military and Civilian Health Care Practitioners, 2018-10-09 Almost 1,000 total pages; see index at beginning of publications for a complete list of included CPGs. Each CPG includes a section on the following: 1. GOAL 2. BACKGROUND 3. EVALUATION 4. TREATMENT 5. PERFORMANCE IMPROVEMENT (PI) MONITORING 6. SYSTEM REPORTING & FREQUENCY 7. RESPONSIBILITIES & 8. REFERENCES. OVERVIEW Clinical Practice Guidelines (CPGs) are the backbone of the system-wide JTS Performance Improvement program. Health data abstracted from patient records and after action reports is analyzed and distilled into globally relevant CPGs to remove medical practice variations and prevent needless deaths. The CPGs compiled from DoDTR data and used by healthcare providers worldwide are largely responsible for the decreased Case Fatality Rate for the wars in Iraq and Afghanistan. Examples are better transfusion practices; reduced burn morbidity and mortality; near elimination of extremity compartment syndrome; better patient care documentation; and improved communication across the spectrum of care between geographically dispersed facilities. CPGs are evidence-based and developed with experts in the military and civilian communities, deployed clinicians, Service trauma/surgical consultants, JTS leadership and formerly deployed Trauma Directors and Coordinators. JTS has a formalized process for developing, reviewing, updating, and approving CPGs. The guidelines are developed and implemented by clinical subject matter experts in response to needs identified in the military area of responsibility. CPGs were developed originally for U.S. Central Command. However, collaborative efforts are ongoing with the other Combatant Commands to customize CPGs to their COCOMs. INTRODUCTION TO THE JOINT TRAUMA SYSTEM (JTS) The Joint Trauma System (JTS) is the Department of Defense (DoD) authority for the military's trauma care system. The vision of the Joint Trauma System is that every Soldier, Sailor, Marine and Airman injured on the battlefield will have the optimum chance for survival and maximum potential for functional recovery. To achieve this vision, in 2006, the JTS implemented programs for data -driven trauma system development and improvement in addition to the collection of trauma data. As part of its data collection efforts, the JTS maintains a registry of trauma patients who received care at medical treatment facilities (MTFs). Since 2007, this registry - known as the DoD Trauma Registry (DoDTR) - has documented demographic, injury, treatment, and outcomes data for all trauma patients admitted to any DoD MTF, regardless of whether the injury occurred during on-going military operations, and is the largest military trauma data source in the world. Development of the DoDTR began during the early years of the Global War on Terror (GWOt) when the need to systematically improve trauma care for combat wounded resulted in the impromptu creation of a demonstration registry, known then as the Combat Trauma Registry (CTR). The CTR was

constructed by the Center for AMEDD Strategic Studies (CASS); trauma-related information was initially abstracted into it from paper medical records received from trauma nurse coordinators (TNCs) at Landstuhl Regional Medical Center (LRMC) in Germany. Shortly after the demonstration program started, the Army Surgeon General approved its transition to an operational mode, leading to the formation of the Joint Theater Trauma System (JTTS) and, eventually, the Joint Trauma System (JTS).

Pediatric Maxillofacial Trauma George M. Kushner,Lewis C. Jones,2020-11-13 This book aims to assist the reader in navigating the potentially complex decision-making process involved in selecting the most appropriate intervention for each

particular scenario that may be encountered by the practitioner or surgeon in the growing patient with facial trauma. Among the topics covered are the initial management of both soft and bony trauma, including different types of fracture, as well as the management of complications and revision surgery. The discerning practitioner will learn how to provide the appropriate intervention at the appropriate time, by taking into account skeletal growth when matching techniques to the injuries more common in the skeletally immature patient. It is also emphasized that in some cases, no intervention is advisable owing to the possibility of damaging growth centers or introducing additional scar tissue that may impede future growth. Pediatric Maxillofacial Trauma will provide key knowledge for surgeons treating growing patients, ensuring that their decisions to operate or delay intervention are evidence based.

Why Dogs Hump and Bees Get Depressed Marc Bekoff, 2013-11-01 In 2009, Marc Bekoff was asked to write on animal emotions for Psychology Today. Some 500 popular, jargon-free essays later, the field of anthrozoology — the study of human-animal relationships — has grown exponentially, as have scientific data showing how smart and emotional nonhuman animals are. Here Bekoff offers selected essays that showcase the fascinating cognitive abilities of other animals as well as their empathy, compassion, grief, humor, joy, and love. Humpback whales protect gray whales from orca attacks, combat dogs and other animals suffer from PTSD, and chickens, rats, and mice display empathy. This collection is both an updated sequel to Bekoff's popular book *The Emotional Lives of Animals* and a call to begin the important work of "rewilding" ourselves and changing the way we treat other animals.
