Prof. Adugna Haile and Dr. G. Sethumadhava Rao

Embracing the salt marsh J.A.W. Nicolay, M. Schepers, 2022-01-24 From a modern-day perspective, it may seem odd that people should have chosen to dwell in the open salt-marsh landscape along the Wadden Sea coast. While the beauty of the salt marshes is widely acknowledged, the idea of living there seems to suggest struggle and misery. Yet the salt-marsh settlers, dwelling on their settlement mounds or terps, did not just 'survive' or 'get by', but actually managed to live a good life, by embracing this marshy world and its peculiarities. This collection of papers focuses on foraging, farming and food preparation in the context of the salt-marsh environment. The various contributions celebrate the career and work of Annet Nieuwhof, who has been an inspirational colleague and great friend to many of us. She passionately embraced terp research, always actively stimulating cooperation across disciplines as well as national borders. Reflecting some of Annet's wide-ranging interests, the present volume is dedicated to her in friendship and gratitude.

Diseases of Crops in Eritrea Prof. Adugna Haile and Dr. G. Sethumadhava Rao, BOOK DESCRIPTION Title: *Diseases of Crops in Eritrea: A Comprehensive Academic Handbook on 'Diseases of Agricultural Crops' in Eritrea*. Introduction: This book, *Diseases of Crops in Eritrea* presents a comprehensive overview of the prevailing plant diseases in Eritrea's agricultural crops. The State of Eritrea is located in North-East Africa, neighbouring with Ethiopia, Sudan and Egypt. As a nation boasting diverse agro-climatic zones, Eritrea's fertile soil supports an array of field crops, horticultural crops, and fruit trees. However, the agricultural ecosystem is confronted with challenges posed by various plant diseases, which can have significant ramifications on crop productivity and quality. This meticulously crafted book is designed with more than 250 images to illuminate the infections of crops and the importance of effective disease management. Chapters and Contents:

This book is organized into six chapters, each delving into specific aspects, such as Introduction; Diseases of Field Crops, Horticultural Crops, Fruit Orchards, Spice and Ornamental Crops; and the Disease Diagnosis. 1. Introduction: The initial chapter provides an in-depth analysis of the current trends in crop production within Eritrea. It explores the underlying causes of diseases, including fungal, bacterial, nematode, and viral infections. The development and pathogenic cycles of these diseases are elucidated, while symptomatology plays a pivotal role in facilitating disease identification. 2. Diseases of Field Crops: In the second chapter, the focus is on over 104 diseases that afflict 16 staple food crops crucial to Eritrea's agricultural sector. A detailed examination of these diseases enables readers to understand the threats they pose to crop yields and the overall food security of the nation. 3. Diseases of Horticultural Crops: Chapter three delves into 84 diseases affecting 12 commonly cultivated horticultural crops across Eritrea's agricultural regions. By shedding light on these prevalent diseases, the chapter aims to raise awareness among farmers and growers, fostering effective disease management practices. 4. Diseases of Fruit Orchards: The fourth chapter zeroes in on 40 diseases, encompassing fungal, bacterial, viral, and nematode infections impacting six major fruit orchards in Eritrea. The economic significance of these orchards, coupled with their susceptibility to diseases, underscores the importance of proper disease management strategies. 5. Diseases of Spice and Ornamental Crops: Chapter five focuses on seven diseases that affect three spice and ornamental crops. By acknowledging the threats posed to these crops, the chapter advocates for the implementation of preventive and control measures to safeguard their cultivation. 6. Disease Diagnosis and techniques of disease identification Strategies: The final chapter offers invaluable insights into disease diagnosis techniques, equipping readers with the tools to accurately identify and combat plant diseases. Furthermore, every chapter expounds on distribution of the disease, economic importance, disease symptoms, the causal agents, disease development/ cycles and management strategies, including cultural practices and Integrated Pest Management, which are crucial for sustainable and environmentally friendly agriculture. Additionally, the prudent use of chemical control is discussed, emphasizing adherence to recommended dosages to minimize undesirable effects on beneficial organisms, human health, and the environment. Conclusion: Diseases of Crops in Eritrea highlights the substantial threats that plant diseases pose to Eritrea's agricultural productivity. However, this academic and enlightening publication also serves as a beacon of hope, promoting integrated disease management approaches that can mitigate these challenges and secure a prosperous horticultural industry for the nation's future. The inclusion of a glossary and index further enhances the book's utility, making it an indispensable resource for researchers, agronomists, horticulturists, and anyone with a vested interest in Eritrea's agricultural well-being.
