Gazing Toward the Future: Advances in Eye Movement Theory and Applications, 2020-09-10 The Psychology of Learning and Motivation series features empirical and theoretical contributions in cognitive and experimental psychology, ranging from classical and instrumental conditioning, to complex learning and problem-solving. - Presents the latest information in the highly regarded Psychology of Learning and Motivation series - Provides an essential reference for researchers and academics in cognitive science - Contains information relevant to both applied concerns and basic research

Innovative Psychometric Modeling and Methods Hong Jiao, Robert W. Lissitz, 2020-09-01 The general theme of this book is to present innovative psychometric modeling and methods. In particular, this book includes research and successful examples of modeling techniques for new data sources from digital assessments, such as eye-tracking data, hint uses, and process data from game-based assessments. In addition, innovative psychometric modeling approaches, such as graphical models, item tree models, network analysis, and cognitive diagnostic models, are included. Chapters 1, 2, 4 and 6 are about psychometric models and methods for learning analytics. The first two chapters focus on advanced cognitive diagnostic models for tracking learning and the improvement of attribute classification accuracy. Chapter 4 demonstrates the use of network analysis for learning analytics. Chapter 6 introduces the conjunctive root causes model for the understanding of prerequisite skills in learning. Chapters 3, 5, 8, 9 are about innovative psychometric techniques to model process data. Specifically, Chapters 3 and 5 illustrate the usage of generalized linear mixed effect models and item tree models to analyze eye-tracking data. Chapter 8 discusses the modeling approach of hint uses and response accuracy in learning environment. Chapter 9 demonstrates the identification of observable outcomes in the game-based assessments. Chapters 7 and 10 introduce innovative latent variable modeling approaches, including the graphical and generalized linear model approach and the dynamic modeling approach. In summary, the book includes theoretical, methodological, and applied research and practices that serve as the foundation for future development. These chapters provide illustrations of efforts to model and analyze multiple data sources from digital assessments. When computer-based assessments are emerging and evolving, it is important that researchers can expand and improve the methods for modeling and analyzing new data sources. This book provides a useful resource to researchers who are interested in the development of psychometric methods to solve issues in this digital assessment age.

This six-volume set LNAI 15877-15882 constitutes the refereed proceedings of the 26th International Conference on Artificial Intelligence in Education, AIED 2025, held in Palermo, Italy, during July 22-26, 2025. The 130 full papers and 129 short papers presented in this book were carefully reviewed and selected from 711 submissions. The conference program comprises seven thematic tracks: Track 1: AIED Architectures and Tools Track 2: Machine Learning and Generative AI: Emphasising datadriven Track 3: Learning, Teaching, and Pedagogy Track 4: Human-Centred Design and Design-Based Research Track 5: Teaching AI Track 6: Ethics, Equity, and AIED in Society Track 7: Theoretical Aspects of AIED and AI-Based Modelling for Education

**Handbook of Item Response Theory** Wim J. van der Linden, 2017-03-31 Drawing on the work of internationally acclaimed experts in the field, *Handbook of Item Response Theory, Volume Two: Statistical Tools* presents classical and modern statistical tools used in item response theory (IRT). While IRT heavily depends on the use of statistical tools for handling its models and applications, systematic introductions and reviews that emphasize their relevance to IRT are hardly found in the statistical literature. This second volume in a three-volume set fills this void. Volume Two covers common probability distributions, the issue of models with both intentional and nuisance parameters, the use of information criteria, methods for dealing with missing data, and model identification issues. It also addresses recent developments in parameter estimation and model fit and comparison, such as Bayesian approaches, specifically Markov chain Monte Carlo (MCMC) methods.

*The Wiley Handbook of Cognition and Assessment* Andre A. Rupp, Jacqueline P. Leighton, 2016-11-14 This state-of-the-art resource brings together the most innovative scholars and thinkers in the field of testing to capture the changing conceptual, methodological, and applied landscape of cognitively-grounded educational assessments. Offers a methodologically-rigorous review of cognitive and learning sciences models for testing purposes, as well as the latest statistical and technological know-how for designing, scoring, and interpreting results Written by an international team of contributors at the cutting-edge of cognitive psychology and educational measurement under the editorship of a research director at the Educational Testing Service and an esteemed professor of educational psychology at the University of Alberta as well as supported by an expert advisory board Covers conceptual frameworks, modern methodologies, and applied topics, in a style and at a level of technical detail that will appeal to a wide range of readers from both applied and scientific backgrounds Considers emerging topics in cognitively-grounded assessment, including applications of emerging socio-cognitive models, cognitive models for human and automated scoring, and various innovative virtual performance assessments

**High-k Gate Dielectrics for CMOS Technology** Gang He,Zhaoqi Sun,2012-08-10 A state-of-the-art overview of high-k dielectric materials for advanced field-effect transistors, from both a fundamental and a technological viewpoint, summarizing the latest research results and development solutions. As such, the book clearly discusses the advantages of these materials over conventional materials and also addresses the issues that accompany their integration into existing production technologies. Aimed at academia and industry alike, this monograph combines introductory parts for newcomers to the field as well as advanced sections with directly applicable solutions for experienced researchers and developers in materials science, physics and electrical engineering.

English Language Ideologies in Korea Jinhyun Cho,2017-07-27 This volume critically examines the phenomenon of “English fever” in South Korea from both micro- and macro-perspectives. Drawing on original research and rich illustrative examples, the book investigates two key questions: why is English so popular in Korea, and why is there such a gap between the ‘dreams’ and ‘realities’ associated with English in Korea? These questions are explored through the eyes of English-Korean translators and interpreters, who represent the professional group most intensely engaged in the zeal for English language mastery. Macro-perspectives focus on historical factors leading to the rise of English, with English-Korean translation and interpreting as a key theme. Micro-perspectives explore the dreams that individuals attach to English and the ways in which they imagine it can transform their lives, and contrast these dreams with the stark realities felt on the ground. The gaps between these dreams and realities are explored from various angles, which include commodification, gender and neoliberalism. The book thus offers fresh insights on how the phenomenon of “English fever” has been created, reproduced, and sustained from both historical and contemporary viewpoints. From the reviews: This is an important study of how English is experienced in one country, Korea. A very insightful analysis of the interlocking of historical factors influencing the status of English, and the interlocking significance of class, gender, aesthetics, myth-making, and the role of the media and competitive commodification. The study is based on competent use of relevant theoretical approaches, solid fieldwork, and a personal capacity to draw complex threads together. It demonstrates how language policy can be analysed in a stimulating

way that has major importance beyond the borders of Korea. Language ideologies are brought to life effectively. Robert Phillipson, Emeritus Professor, Copenhagen Business School, Denmark
