The Road to Nursing Nick Arnott,Penny Paliadelis,Mary Cruickshank,2021-11-22 Being an effective and well-rounded nurse in Australia is not just about technical skills - it's also about thinking like a nurse. This edition retains three parts which guide students through their transition to university, formation of a professional identity and progression to professional practice. A revised chapter order improves the transition between topics and a new chapter explores the ever-

changing Australian health landscape, including recent technological innovations. Each chapter includes definitions of key terms, reflection questions, perspectives from nurses, end-of-chapter review questions, research topics and resources that connect students with the real-world practice of nursing. Interpreting Professional Self-Regulation Abigail Beach, Celia Davies, 2013-02-01 Interpreting Professional Self-Regulation analyses the contribution made by the UKCC to the development of the nursing profession in this country over the last 30 years. It details the key issues the council grappled with during this time and provides in-depth analyses of the complexity of these issues. There is a general consensus that the current view of nursing's regulatory body will culminate in a major shake up of the way the nursing profession is governed and in which the UKCC will be radically transformed. This publication of the history of the UKCC will mark the close of a very significant period in nursing's history and the opening of wider debates about ensuring the safety of the public through regulation of health professionals. This is an important text for all those who teach on professional and policy issues in nursing, giving them a factual background that has never been brought together before, enabling them to bring discussion of post-registration education, discipline and other professional matters more firmly into the curriculum.
