Machine Intelligence and the Imaginal Realm Luke Lafitte, 2022-02-01 • Explores how we naturally project consciousness onto machines and how this is reflected in human culture, science, artificial intelligence, and literature • Demonstrates a direct connection between consciousness and the history of machines in American history • Looks at the contributions and influence of Grace Hopper, Richard Feynman, Philip K. Dick, Nikola Tesla, Thomas Edison, Elon Musk, David Bohm, Norbert Wiener, and Steve Jobs as well as the Nag Hammadi Gnostic gospels Humans invented and constructed machines to aid them, as far back as the Stone Age. As the machines became more complex, they became extensions of the body and mind, and we naturally began projecting consciousness onto them. As Luke Lafitte shows in detail, although machines complicate the already complicated issue of identity, because they are “ours” and “of us,” they are part of our spiritual development. In this sweeping exploration of the history of the machine as a tool, as a transpersonal object to assist human activity, and as a transitional artifact between spirits and the humans who interact with them, Lafitte examines the role that machines play in the struggle between “spiritual man” and “mechanical man” throughout history. He interprets the messages, archetypes, and language of the unconscious in the first popular stories related to mechanical men, and he

demonstrates a direct connection between consciousness and the history of machines in American history, specifically between the inventors of these machines and the awakening of our imaginations and our powers of manifestation. He examines the influence of Philip K. Dick, Nikola Tesla, Thomas Edison, Grace Hopper, Richard Feynman, Elon Musk, David Bohm, and others and shows how the Nag Hammadi gospels explain how we can take back our myth and spirit from the machine. Although the term “mechanical man” is a catch-all phrase, Lafitte shows that the term is also a meeting ground where extra-dimensional communications between different forms of matter occur. Every machine, android, robot, and cyborg arose from consciousness, and these mechanical men, whether real or fictive, offer us an opportunity to free ourselves from enslavement to materialism and awaken our imaginations to create our own realities.

Making Patton Nicholas Evan Sarantakes, 2012-09-26 Forever known for its blazing cinematic image of General George S. Patton (portrayed by George C. Scott) addressing his troops in front of a mammoth American flag, Patton won seven Oscars in 1971, including those for Best Picture and Best Actor. In doing so, it beat out a much-ballyhooed M*A*S*H, irreverent darling of the critics, and grossed \$60 million despite an intense anti-war climate. But, as Nicholas Evan Sarantakes reveals, it was a film that almost didn't get made. Sarantakes offers an engaging and richly detailed production history of what became a critically acclaimed box office hit. He takes readers behind the scenes, even long before any scenes were ever conceived, to recount the trials and tribulations that attended the epic efforts of producer Frank McCarthy—like Patton a U.S. Army general—and Twentieth Century Fox to finally bring Patton to the screen after eighteen years of planning. Sarantakes recounts how filmmakers had to overcome the reluctance of Patton's family, copyright issues with biographers, competing efforts for a biopic, and Department of Defense red tape. He chronicles the long search for a leading man—including discussions with Burt Lancaster, John Wayne, and even Ronald Reagan—before settling on Scott, a brilliant actor who brought to the part both enthusiasm for the project and identification with Patton's passionate persona. He also tracks the struggles to shoot the movie with a large multinational cast, huge outlays for military equipment, and filming in six countries over a mere six months. And he provides revealing insider stories concerning, for example, Scott's legendary drinking bouts and the origins of and debate over his famous opening monologue. Drawing on extensive research in the papers of Frank McCarthy and director Franklin Schaffner, studio archives, records of the Academy of Motion Picture Arts and Sciences, contemporary journalism, and oral histories, Sarantakes ultimately shows us that Patton is more than just one of the best war films ever made. Culturally, it also spoke to national ideals while exposing complex truths about power in the mid-twentieth century.

Someone Is Out to Get Us Brian Brown, 2019-11-05 From UFOs to Dr. Strangelove, LSD experiments to Richard Nixon, author Brian Brown investigates the paranoid, panicked history of the Cold War. In *Someone Is Out to Get Us*, Brian T. Brown explores the delusions, absurdities, and best-kept secrets of the Cold War, during which the United States fought an enemy of its own making for over forty years -- and nearly scared itself to death in the process. The nation chose to fear a

chimera, a rotting communist empire that couldn't even feed itself, only for it to be revealed that what lay behind the Iron Curtain was only a sad Potemkin village. In fact, one of the greatest threats to our national security may have been our closest ally. The most effective spy cell the Soviets ever had was made up of aristocratic Englishmen schooled at Cambridge. Establishing a communist peril but lacking proof, J. Edgar Hoover became our Big Brother, and Joseph McCarthy went hunting for witches. Richard Nixon stepped into the spotlight as an opportunistic, ruthless Cold Warrior; his criminal cover-up during a dark presidency was exposed by a Deep Throat in a parking garage. *Someone Is Out to Get Us* is the true and complete account of a long-misunderstood period of history during which lies, conspiracies, and paranoia led Americans into a state of madness and misunderstanding, too distracted by fictions to realize that the real enemy was looking back at them in the mirror the whole time.

Watching films relevant to mental health can actually help you become a more productive therapist and a more astute diagnostician. *Movies and Mental Illness*, written by an eminent clinical psychologist (who is also a movie aficionado), has established a reputation as a uniquely enjoyable and highly memorable text for learning about psychopathology. This new edition has been completely revised to explore current issues, such as children's screentime and celebrities with mental illness, and to include the numerous films that have been released since the last edition. Sight Hound Pam Houston, 2025-04-25 The long-awaited novel; a very special love story; from the best-selling author of *Cowboys Are My Weakness*. This is the story of a woman, Rae, and her dog, Dante, a wolfhound who teaches his human that love is stronger than fear (the dog has always known this). Dante is the catalyst for change in other characters as well, and they step forward with their narratives: Rae's house-tender; her therapist; two veterinarians; and an anxiety-ridden actor, Howard, who turns out to be as stalwart as Dante himself. As the seer who hunts by sight rather than smell, Dante has some things to add, as does Rose, another dog who lives at Rae's heels, and Stanley the cat. Among and above these myriad voices, Rae voices her own challenges. With the wit and dead-on candor we've come to expect from Pam Houston, *Sight Hound* unfolds a story that illuminates the intangible covenant between loved ones. Here, dogs and humans are simply equal creatures, looking to connect and holding on for dear life when they do. Reading group guide included.
