Clinical Placement Manual For Enrolled Nurses Catherine Joustra,Ali Moloney,2018-12-01 Clinical Placement for the Diploma of Nursing is an exciting new resource that facilitates easier delivery of learning for HLT54115. A practical manual, it incorporates both knowledge evidence and performance evidence supported by learning material. Written to the training package, all learning objectives and clinical skills are covered, and activities, assessments and materials you need are provided for each unit. Educators and clinical facilitators now have transparency for mapping, course delivery and streamlined placement. Textbook layout suits course progression and clinical placement blocks as the order of coverage follows block delivery. Opening vignettes and real-life case studies and tips from nurses and students in clinical settings gives context to the theory, and assist the student before placement to identify key knowledge elements, which are applied to a practical setting. Cross referencing is included, and Clinical Placement for Diploma of Nursing can be value-packed with Tollefson's Essential Clinical Skills and Clarke/Gray's Foundations of Nursing to create a complete reference package for trainees.

The Reproductive Body at Work Verena Namberger,2019-04-11 The transnational industry surrounding assisted reproductive technology and regenerative medicine is based on the unacknowledged labour of gamete providers, surrogates

and research subjects, and benefits from low labour costs in 'enabling' sectors such as logistics and transport. This finding calls for a comprehensive analysis of how the contemporary intersection of neoliberal capitalism and the life sciences - in short, the bioeconomy - capitalises on the body and its (re)productive capacities. The Reproductive Body at Work uptakes this challenge as it explores the relations between value production, labour and the body in one particular realm of the global bioeconomy: the South African bioeconomy of 'egg donation'. It highlights different forms and dimensions of unacknowledged or precarious human labour that are constitutive for the procurement, brokering and circulation of oocytes as valuable resources. The analysis illustrates that the respective organisation of value and labour renegotiate what 'the' (re)productive body can do, which status and roles it is ascribed, which cultural and economic values it signifies and how it is experienced and enacted within a matrix of intersectional power relations. A theoretically profound contribution to the interdisciplinary debate on 'New materialism', The Reproductive Body at Work will appeal to students and researchers interested in fields such as gender studies, medical anthropology, cultural studies, sociology, political economy and science and technology studies.

Divinity Ev. Paul Mukendi, 2017-05-31 No book has ever attempted to deal with the subject of divinity in its entirety. Here

at long last is a comprehensive book dealing with divine beings in its complexity. It provides the reader with accurate and insightful knowledge concerning the concept of divinity. The author gives a clear explanation of the Triune nature of God. God is one being, manifest and existing in three distinct identities or persons, which is further discussed as being comparable with the makeup of a human being. God shares his divine nature with spiritual beings in the heavens with angels and on earth with humankind. The divine nature of God resides in all spirits. Therefore, men have God's nature in their spirits; they can communicate with and receive the things of the spiritual realm. Through sin, humanity has lost the nature of God; for all have sinned and fall short of the glory of God. The purpose of the Bible is to spiritualize humankind, because we have fallen short of the glory of God. The broad focus of this book is to bring as many believers to a stage of maturity in the knowledge of Christ.
