Dictionary of Trees, Volume 2: South America M.M. Grandtner, Julien Chevrette, 2013-09-21 Dictionary of South American Trees provides a single-source reference for botanists, biologists, ecologists, and climatologists on the many native trees in South America. The index lets readers find a tree in four languages, by its common name, or abbreviation, followed by taxonomy that includes common uses for each part of the tree. Using this information, scientists and students can identify and classify plants, their growth structure and environment, the uses of their products, and alternative options with similar characteristics. - Complete coverage of all native South American trees—the only single-source reference for botanists, biologists, ecologists and climatologists working in this diverse and changing region - Includes taxonomy at genera, species, sub-species, and varietal levels, providing information from the most basic level up and allowing readers to identify their subjects using numerous criteria - Indicates Latin, English, French, and Spanish names as well as common names and abbreviations, facilitating accurate and efficient identification - Provides growth information, climatology, ecology and uses for the tree to provide insight into each tree as well as for comparative purposes when seeking similar tree-based resources

The Pipil Language of El Salvador Lyle Campbell, 2011-07-22 The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

Cuentos de la Madremonte Guadalupe Urbina, Wen Hsu, 2019-11-01 No siempre una afamada cantautora como Guadalupe Urbina nos regala sus historias escritas para los niños. Animales, niños, familia y fuerzas de la naturaleza se conjugan para dar forma a la presencia de la madreselva y a sus queridos amigos. Aprender a convivir en armonía como legado de la naturaleza pareciera ser la canción que las páginas de este bello libro nos cantan. Cuentos de la Madremonte es un texto bilingüe (español-inglés) o más bien biolingüe.

Elsevier's Dictionary of Trees M.M. Grandtner, 2005-04-08 This dictionary will present all currently accepted generic, specific, sub-specific and variety names of trees, excluding fossil and more recently extinct taxa, hybrids and cultivars. Only the indigenous trees of a continent, those wild species that were natural elements of the spontaneous forest vegetation before the arrival of Europeans or other colonizers, are included. Each generic entry includes the family to which it is assigned, the synonyms of the Latin name, and the English, French, Spanish, trade and other names. For the English and French names the standard name is listed first, followed by other available names with, in parentheses, the countries where they are used. Where appropriate, names in additional languages are also included. Each infrageneric (species, subspecies, variety) entry includes, in addition, the distribution, height, type of foliage, ecological characteristics and main uses of the tree when available. In this volume only taxa indigenous on the North American continent are included, considered in a geographical, not in a political sense. This means from Alaska and Greenland to Panama, including Caribbean, but excluding Hawaii.
