A Reader's Companion to Mikhail Bulgakov's The Master and Margarita J.A.E. Curtis, 2019-12-17 Mikhail Bulgakov's novel *The Master and Margarita*, set in Stalin's Moscow, is an intriguing work with a complex structure, wonderful comic episodes and moments of great beauty. Readers are often left tantalized but uncertain how to understand its rich meanings. To what extent is it political? Or religious? And how should we interpret the Satanic Woland? This reader's companion offers readers a biographical introduction, and analyses of the structure and the main themes of the novel. More curious readers will also enjoy the accounts of the novel's writing and publication history, alongside analyses of the work's astonishing linguistic complexity and a review of available English translations.

Paul Ricoeur's Idea of Reference Sanja Ivic, 2018-11-26 This book investigates the importance of Ricoeur's hermeneutics and poetics in rethinking humanities. In particular, Ricoeur's insights on reference as refiguration and his idea of interpretation as a triadic process (which consists of mimesis 1 - prefiguration, mimesis 2 - configuration, and mimesis 3 - refiguration) will be applied to philosophy of science and to literary and historical texts. It will be shown that Ricoeur's idea of emplotment can be extended and applied to scientific, literary and historical texts. This multidisciplinary research will include philosophy of science, metaphysics, hermeneutics, and literary theory.

Hungary and Other Emerging EU Countries in the Financial Storm Júlia Király, 2020-08-18 This book analyzes the banking crisis and the events surrounding it in Hungary and other emerging EU member countries in 2007-2013. Written by Júlia Király, a former policymaker, and the Deputy Governor of the Hungarian Central Bank at the time of the crisis, it also offers a firsthand account of the processes in and responses to the financial crisis. While there is extensive literature on the crisis, most of it focuses on the US or the Eurozone, sometimes mentioning the "emerging world" in passing. However, Central and Eastern Europe experienced the crisis very differently than other emerging countries. In the pre-crisis years, the region in accession to the EU attracted abundant fresh capital, but the seemingly unconstrained global liquidity fuelled credit bubbles. After the Lehman crisis, capital rapidly fled these countries. In this part of the world, the recession proved to be much worse than elsewhere, with double-digit growth soon turning into a double-digit decline in GDP. Several countries had to turn to the IMF and the EU for stand-by credit. Based on her own inside experience as a top central banker, the author

offers a personal yet professional analysis of the causes and consequences of the financial hurricane.

Paradoxes of Management in Culture Alexander Nikolayevich Yakupov, 2019-11-14 This book discusses the problems associated with the development of musical art and education, with a focus on two interrelated facets of this. The first is the analysis and evaluation of the complex, and often contradictory, situations which occur in the establishment of new institutions of culture and art. The second aspect is represented by recommendations and advice given to young managers preparing themselves to act in a self-motivated manner in these institutions. The book can be used as a study guide for managers' training in higher educational institutions in the areas of art and culture, as well as for the self-education of specialists-managers of a creative orientation.

Drilling Down Joseph A. Tainter, Tadeusz W. Patzek, 2011-09-18 For more than a century, oil has been the engine of growth for a society that delivers an unprecedented standard of living to many. We now take for granted that economic growth is good, necessary, and even inevitable, but also feel a sense of unease about the simultaneous growth of complexity in the processes and institutions that generate and manage that growth. As societies grow more complex through the bounty of cheap energy, they also confront problems that seem to increase in number and severity. In this era of fossil fuels, cheap energy and increasing complexity have been in a mutually-reinforcing spiral. The more energy we have and the more problems our societies confront, the more we grow complex and require still more energy. How did our demand for energy, our technological prowess, the resulting need for complex problem solving, and the end of easy oil conspire to make the Deepwater Horizon oil spill increasingly likely, if not inevitable? This book explains the real causal factors leading up to the worst environmental catastrophe in U.S. history, a disaster from which it will take decades to recover.

Who Will Bring Me Home? Jan Willem Kirpestein, 2023-10-06 This book is a profound meditation on power and love and in its wake on trust and hope. The author offers a new approach of these ancient biblical values. If human love is fascinated by power, what is power's attraction and charm? Love is fascinated by a promise of rootedness in a real future life. This promise is experienced as a revelation of our true home. It means that human love is expecting something from the one who possesses power. Is he or she able to make the promise true? Power should be cute, otherwise it will be experienced as a repulsive force. However, without the possibility to become a repulsive force power is unable to unveil its executing force.

But the promise needs to be unconditional. Love is a movement of one's free will. Therefore, love can become disappointed. How were love, trust, and hope at work in relation to Gods revelation in the Torah and at work in the consciousness and live of Jesus Christ? What does that mean for us?

Liquid Society and Its Law Jiří Přibáň, 2016-05-06 This collection of essays brings together Zygmunt Bauman and a number of internationally distinguished legal scholars who examine the influence of Bauman's recent works on social theory of law and socio-legal studies. Contributors focus on the concept of 'liquid society' and its adoption by legal scholars. The volume opens with Bauman's analysis of fears and policing in 'liquid society' and continues by examining the social and legal theoretical context and implications of Bauman's theory.

Socialist Economic Systems Steven Rosefielde, 2023-06-29 Bernie Sanders' socialist advocacy in the United States, communist China's economic successes and a Marxist revival are inspiring many to muse about improved strategies for building superior socialist futures. Socialist Economic Systems provides an objective record of socialism's promises and performance during 1820-2022, identifies a feasible path forward and provides a rigorous analytic framework for the comparison of economic systems. The book opens by surveying pre-industrial utopias from Plato to Thomas More, and libertarian communal designs for superior living. It plumbs all aspects of the revolutionary and democratic socialist political movements that emerged after 1870 and considers the comparative economic, political and social performance of the USSR and others from the Bolshevik Revolution onwards. The book also provides case studies for all revolutionary Marxist-Leninist regimes, and supplementary discussions of Mondragon cooperatives, Israeli kibbutzim, Nordic corporatism and European democratic socialism. It investigates the theoretical and practical complexities of command-planning, reform communism, market communism, worker economic management and egalitarianism. It examines communism as an engine of economic growth, and a mechanism for improving people's quality of existence, including living standards, labor self-governance, egalitarianism, social justice, and prevention of crimes against humanity before addressing the perennial question of what needs to be done next. A suggested path forward is elaborated drawing lessons from the warts-and-all historical performance of socialist economies during 1917-2022 and failed socialist prophesy. The evidence indicates that the key to 21st-century socialism success lies in empowering workers of all descriptions to govern democratically for their mutual protection and welfare without the extraneous imposition of priorities imposed by other movements. The book is essential reading for anyone interested in socialism, political economy, comparative economic systems, and political and social history.

In the Labyrinth of the KGB Olga Bertelsen, 2022-02-15 2024 Winner, Kjetil Hatlebrekke Memorial Book Prize, King's College Centre for the Study of Intelligence This book focuses on the generation of the sixties and seventies in Kharkiv, Soviet Ukraine, a milieu of writers who lived through the Thaw and the processes of de-Stalinization and re-Stalinization. Special attention is paid to KGB operations against what came to be known as the dissident milieu, and the interaction of Ukrainians, Jews, and Russians in the movement, their persona friendships, formal and informal interactions, and the ways they dealt with repression and arrests. This study demonstrates that the KGB unintentionally facilitated the transnational and intercultural links among the Kharkiv multi-ethnic community of writers and their mutual enrichment. Post-Khrushchev Kharkiv is analyzed as a political space and a place of state violence aimed at combating Ukrainian nationalism and Zionism, two major targets in the 1960s-1970s. Despite their various cultural and social backgrounds, the Kharkiv literati might be identified as a distinct bohemian group possessing shared aesthetic and political values that emerged as the result of de-Stalinization under Khrushchev. Archival documents, diaries, and memoirs suggest that the 1960s-1970s was a period of intense KGB operations, "active measures" designed to disrupt a community of intellectuals and to fragment friendships, bonds, and support among Ukrainians, Russians, and Jews along ethnic lines domestically and abroad.

Literature and International Relations Paul Sheeran, 2016-05-23 Making a strong case for the relevance of literary production to understanding international relations, this persuasive volume highlights the potential rewards of developing a

methodology to bring literature to bear on a discipline which has tended to neglect fictional sources. Paul Sheeran considers the deep insight that can be gained from the study of key works in fiction and literature to enhance knowledge of the social forces shaping world affairs. While there are numerous relevant works, the author has carefully selected multi-faceted and colourful sources of material to explore developments in contemporary global issues such as the demise of the Soviet Union, the attack on the World Trade Centre, infectious diseases and human conflict. This exciting book enthusiastically breaks new ground and is highly suitable for courses on international relations, cultural studies and literature.

Mikhail Bulgakov's *Master & Margarita, Or, The Devil Comes to Moscow* Jean Claude Van Itallie, 1995 THE STORY: The devil, his acrobatic cat and other colorful cronies come to Stalin's Moscow to wreak hilarious surreal havoc on the lives of writers, critics and bureaucrats who have lost touch with their feelings. Satan sends some to the madhouse

Humanity's Strings Ritwick Bhattacharjee, 2021-12-30 *Humanity's Strings: Being, Pessimism, and Fantasy* interrogates the nature of reality against fantasy as the two are presented to and created by the human consciousness—a consciousness that is in constant struggle with the omnipresence of misery and the inevitability of death. The book shows that being, pessimism, and fantasy as the strings which are made up of forces unseen, unknown, and ungoverned that control the human being like a puppet. Through a study of the metaphysical and existential philosophies of thinkers, such as Franz Brentano, Edmund Husserl, Søren Kierkegaard, Arthur Schopenhauer, Friedrich Nietzsche, and Jacques Derrida, the book interrogates not only how the self interacts with fantasy but why it does as well. It also asks why fantasy forces the self towards a unity that impacts existence in the modern world with its questions of justice, politics, and materiality. Furthermore, it situates the fantasy novels of authors, such as Stephen King, Brandon Sanderson, Douglas Adams, and Robert Jordan, as discourses which delineate the considerations above as ideas which modulate the existence of the human. Additionally, the book shows how it is not just the human that is affected by the machinations of the cosmos but also time and space—ostensibly a priori entities of existence—as these two interact with the human and its consciousness.

Bulgakov's The Master and Margarita Elena N. Mahlow, 1975

Military Review, 2005

A Mashup World Irina Perianova, 2018-12-05 In the 21st century, hybrids (such as hybrid war, hybrid regimes, hybrid cars, and hybrid identities, among others) have become all-pervasive, and the computer term “mashup” has turned into a symbol of hybridity. This book highlights the phenomenon of hybridity and hybridization from a variety of angles and perspectives – in social and cultural practices, education and fiction – and notes the connecting patterns between hybridization in different fields of human endeavour. Perhaps the most important hallmark of our age is the crossover into the virtual. The spread of hybrids in “post-reality” has snowballed due to the Internet and the ease of the web-based dissemination of information and disinformation. New entities, such as fake news, have been put together using collage

techniques with the result that make-believe events produce real-life effects. Without the special analysis provided in this book, this non/reality generated to manipulate people is unlikely to be differentiated from authentic stories.
