*Regional Urban Systems in the Roman World, 150 BCE - 250 CE ,2019-12-16* The focus of Regional Urban Systems in the Roman World is on urban hierarchies and interactions in large geographical areas rather than on individual cities. Based on a painstaking examination of archaeological and epigraphic evidence relating to more than 1,000 cities, the volume offers comprehensive reconstructions of the urban systems of Roman Gaul, North Africa, Sicily, Greece and Asia Minor. In addition it examines the transformation of the settlement systems of the Iberian Peninsula and the central and northern Balkan following the imposition of Roman rule. Throughout the volume regional urban configurations are examined from a rich variety of perspectives, ranging from climate and landscape, administration and politics, economic interactions and social relationships all the way to region-specific ways of shaping the townscapes of individual cities.

**The Fight for Greek Sicily** Melanie Jonasch,2020-06-30 The island of Sicily was a highly contested area throughout much of its history. Among the first to exert strong influence on its political, cultural, infrastructural, and demographic developments were the two major decentralized civilizations of the first millennium BCE: the Phoenicians and the Greeks. While trade and cultural exchange preceded their permanent presence, it was the colonizing movement that brought territorial competition and political power struggles on the island to a new level. The history of six centuries of colonization is replete with accounts of conflict and warfare that include cross-cultural confrontations, as well as interstate hostilities, domestic conflicts, and government violence. This book is not concerned with realities from the battlefield or questions of military strategy and tactics, but rather offers a broad collection of archaeological case studies and historical essays that analyze how political competition, strategic considerations, and violent encounters substantially affected rural and urban environments, the island's heterogeneous communities, and their social practices. These contributions, originating from a workshop in 2018, combine expertise from the fields of archaeology, ancient history, and philology. The focus on a specific time period and the limited geographic area of Greek Sicily allows for the thorough investigation and discussion of various forms of organized societal violence and their consequences on the developments in society and landscape.

[The Routledge Handbook of the Archaeology of Urbanism in Italy in the Age of Roman Expansion](#) Fabio Colivicchi,Myles McCallum,2024-05-17 The Routledge Handbook of the Archaeology of Urbanism in Italy in the Age of Roman Expansion explores trends in urbanism across Italy in the period when Rome extended its power across the entire peninsula, Sicily,

Sardinia, and Corsica. Chapters present the most up-to-date archaeological data in the first broad and detailed treatment of this topic, superseding traditional academic particularism. They present a significant re-evaluation of the process of Roman imperialism and the role of urbanization within it. Particular attention is paid to evidence for local agency in different regions and at different sites, but general trends are also highlighted. Various types of urban sites are examined, including Indigenous urban centers that pre-date Rome's conquest, colonies, both Greek and Roman, small centers in the hinterlands of larger urban entities, and the symbiotic relationship between urban centers and their rural territories. This volume challenges the existence of a standardized "Roman model" imposed on Rome's vanquished enemies through conquest and highlights that this was a period of intense experimentation. Archaeological data are used to challenge traditional text-based historiographic models and reveal the complex interplay and tensions between Roman imperial control, local and regional traditions, and broader Mediterranean trends. This book is of importance to archaeologists and ancient historians working on urbanism and Roman Imperialism, as well as those interested in early urbanism in the Western Mediterranean and Europe and the comparative study of imperialism and colonialism across geographical areas and historical periods.

**From Hydrology to Hydroarchaeology in the Ancient Mediterranean** Giovanni Polizzi,Vincent Ollivier,Sophie Bouffier,2022-10-27 This volume is devoted to the study of water management in ancient cities. It compares the approaches and methods adopted by researchers from different disciplinary sectors to identify the water conditions of past societies and to highlight the measures they have taken to adapt to their water resources.

**Climates** Geological Society of London,2000 There are many different approaches to the study of past climates. This is well illustrated by the special publication of the Geological Society. The volume comprises seventeen papers which were presented at the Second European Palaeontological Congress held in Vienna in 1997. In this volume more than half the papers deal with the Quaternary. Despite the title I see no papers dealing with present climates.

*Religious Convergence in the Ancient Mediterranean* Sandra Blakely,Billie Jean Collins,2019-12-15 This volume brings together scholars in religion, archaeology, philology, and history to explore case studies and theoretical models of converging religions. The twenty-four essays offered in this volume, which derive from Hittite, Cilician, Lydian, Phoenician, Greek, and Roman cultural settings, focus on encounters at the boundaries of cultures, landscapes, chronologies, social class and status, the imaginary, and the materially operative. Broad patterns ultimately emerge that reach across these boundaries, and suggest the state of the question on the study of convergence, and the potential fruitfulness for comparative and interdisciplinary studies as models continue to evolve.

Eighth International Symposium “Monitoring of Mediterranean Coastal Areas. Problems and Measurement Techniques”  
Livorno (Italy) June 2020 Laura Bonora, Donatella Carboni, Matteo De Vincenzi, 2022-10-14 The 8th International Symposium Monitoring of Mediterranean Coastal Areas. Problems and Measurements Techniques was organized by CNR-IBE in collaboration with FCS Foundation, and Natural History Museum of the Mediterranean and under the patronage of University of Florence, Accademia dei Geogofili, Tuscany Region and Livorno Province. It is the occasion in which scholars can illustrate and exchange their activities and innovative proposals, with common aims to promote actions to preserve coastal marine environment. Considering Symposium interdisciplinary nature, the Scientific Committee, underlining this holistic view of Nature, decided to celebrate Alexander von Humboldt; a nature scholar that proposed the organic and inorganic nature's aspects as a single system. It represents a sign of continuity considering that in-presence Symposium could not be carried out due to the COVID-19 pandemic restrictions. Subjects are related to coastal topics: morphology; flora and fauna; energy production; management and integrated protection; geography and landscape, cultural heritage and environmental assets, legal and economic aspects.

**The Oxford History of the Archaic Greek World** Robin Osborne, 2025-05-04 The ancient Greek world consisted of approximately 1,000 autonomous polities scattered across the Mediterranean basin, and each one developed its own, unique set of socio-political institutions and social practices. The Oxford History of the Archaic Greek World offers twenty-two detailed studies of key sites from across the Greek world between c. 750 and c. 480 BCE--a crucial period when much of what is now seen as distinctive about Greek culture emerged. All the studies in this seven-volume series use the same structure and methodology so that readers can easily compare a wide range of Greek communities. The series thus offers a new and unique resource for the study of ancient Greece that will transform how we study and think about a crucial era in ancient

Greek history. Volume VI contains detailed and up-to-date studies of Rhodes, Sicyon, Syracuse, Thebes, and Western Sicily.

**Kale Akte, the Fair Promontory** Adam Lindhagen,2020-10-31 This volume investigates the interaction between the natural environment, market forces and political entities in an ancient Sicilian town and its surrounding micro-region over

the time-span of a thousand years. Focusing on the ancient polis of Kale Akte (Caronia) and the surrounding Nebrodi area on the north coast of Sicily, the book examines the city's archaeology and history from a broad geographical and cultural viewpoint, suggesting that Kale Akte may have had a greater economic importance for Sicily and the wider Mediterranean world than its size and lowly political status would suggest. Also discussed is the gradual population shift away from the hill-top down to a growing harbour settlement at Caronia Marina, at the foot of the rock. The book is particularly important for the comprehensive analysis of the 1999–2004 excavations at the latter, with fresh interpretations of the function of the buildings excavated and their chronology, as well for reviewing the present state of our knowledge about Kale Acte/Calacte, and defining research questions for the future. The archaeological material at the heart of this study comes from excavations at the site conducted by the author. It is one of the few detailed publications from Sicily of Hellenistic and Roman amphora material. The conclusions about changing trends of commercial production and exchange will be of interest to those working on ceramic material elsewhere in Sicily and indeed further afield. The study also offers a fresh perspective of the economic history of ancient Sicily, and concludes that Kale Akte's privileged location on the north coast was well suited for the export trade to Italy and the city of Rome itself, which enabled the Sicilian town to prosper during the Roman Empire. The origins of Kale Akte and its alleged foundation by the exiled Sikel leader, Duceius, in the fifth century BC, are also discussed in the light of the latest archaeological discoveries. An Italian summary of each chapter is also included.
