Milk, Honey And Grapes Kiran K. Mehta, 2008-10-25 Just as milk, honey, and grapes are the simple foods consumed by everyone, and are easy to assimilate, this short introduction is intended to serve as a simple to understand source for all. It offers an excellent view of the multidimensional makeup, immense depth, resolute nature, and sophisticated approach of the wide spiritual stream that is Hinduism. It should be carefully studied and contemplated by all those who want a better understanding of this great tradition and its relevance for the whole of life.

Worlds in Collision , With this book Immanuel Velikovsky first presented the revolutionary results of his 10-year-long interdisciplinary research to the public, founded modern catastrophism - based on eyewitness reports by our ancestors - shook the doctrine of uniformity of geology as well as Darwin's theory of evolution, put our view of the history of our solar system, of the Earth and of humanity on a completely new basis - and caused an uproar that is still going on today. Worlds in Collision - written in a brilliant, easily understandable and entertaining style and full to the brim with precise information - can be considered one of the most important and most challenging books in the history of science. Not without reason was this book found open on Einstein's desk after his death. For all those who have ever wondered about the evolution of the earth, the history of mankind, traditions, religions, mythology or just the world as it is today, Worlds in Collision is an absolute MUST-READ!

Deviant Landscapes Fivos Papadimitriou, Olaf Kühne, 2025-04-11 Deviant landscapes can be physical, or digital or outright fictitious. Whatever their nature or context, they do not conform to normality. Deviant landscapes can be encountered on the face of the earth, on computer screens, in people's minds. This anthology presents varying perspectives on deviant landscapes, widening the theoretical framework of spatial-and-landscape research by delving into the hitherto almost uncharted realm of deviant landscapes in a way that is missing in the academic literature. It exposes a variety of perspectives on deviant landscapes, from disparate scientific domains (i.e. geography, literary studies, sociology, game studies, cultural studies) and delivers useful insights into the diverse theoretical approaches that can be adopted to examine such landscapes (neopragmatist, social constructivist, scientometric, art theoretical etc.).

Women, Livestock Ownership and Markets Jemimah Njuki, Elizabeth Waithanji, Joyce Lyimo-Macha, Juliet Kariuki, Samuel Mburu, 2013-10-23 This book provides empirical evidence from Kenya, Tanzania and Mozambique and from different production systems of the importance of livestock as an asset to women and their participation in livestock and livestock product markets. It explores the issues of intra-household income management and economic benefits of livestock markets to women, focusing on how types of markets, the types of products and women's participation in markets influence their access to livestock income. The book further analyses the role of livestock ownership, especially women's ownership of livestock, in influencing household food security through increasing household dietary diversity and food adequacy. Additional issues addressed include access to resources, information and financial services to enable women more effectively to participate in

livestock production and marketing, and some of the factors that influence this access. Practical strategies for increasing women's market participation and access to information and services are discussed. The book ends with recommendations on how to mainstream gender in livestock research and development if livestock are to serve as a pathway out of poverty for the poor and especially for women.

Food Robert Palmatier, 2000-08-30 Each of the more than seven hundred entries in the dictionary contains a description of the historical background of each of the two types of language, literal and nonliteral, and provides an explanation for the relationship between them. Wherever possible, dates of first record in English are provided, along with the bibliographical sources of these dates; and all of the works that record those terms and expressions are given in coded form as listed in the Key to Works Cited. A Guide to Reading the Entries illustrates the typical form of an entry by analyzing an example from the dictionary that introduces five nonliteral expressions, cites thirteen bibliographical sources, and refers the reader to three other relevant entries by means of cross-references. Following the dictionary proper is a Classification of Terms According to Source, in which nearly three hundred nonliteral terms and expressions are listed under the more than four hundred literal categories from which they derive.

Late Antique Responses to the Arab Conquests, 2021-12-13 *Late Antique Responses to the Arab Conquests* is a showcase of new discoveries in an exciting and rapidly developing field: the study of the transition from Late Antiquity to Early Islam. The contributors to this volume engage with previously neglected sources, such as Arabic rock inscriptions, papyri and

Byzantine archaeological remains. They also apply new interpretative methods to the literary tradition, reading the Qur'an as a late antique text, using Arabic poetry as a source to study the gestation of an Arab identity, and extracting settlement patterns of the Arabian colonizers in order to explain regional processes of Arabicization and Islamization. This volume shows how the Arab conquests changed both the Arabian conquerors and the conquered.

Oxford Textbook of the Newborn Michael Obladen,2021 Well into the 20th century, one in four newborns failed to survive their first year of life. It was after World War II that medicine discovered the newborn as a human being entitled to medical treatment and prioritised care. Since its definition by Alexander Schaffer in 1960, neonatology has evolved into a mature, innovative, and ethical field. A large number of medical professionals' care for neonates, yet no definitive medical history of the newborn has been available until now. The Oxford Textbook of the Newborn: A Cultural and Medical History offers readers a unique and authoritative resource on the 3000-year history of the newborn within Western societies. Written by Professor Michael Obladen, a leading voice in neonatology, this book reflects on our perception of newborns, from the earliest days of human thought, through to the traces that remained in medieval life and persist today. It unearths ideas and evidence of societies' perceptions of newborns through a beautifully illustrated, impressive and often never-seen-before set of historical sources from libraries, archives, churches, excavation fields, and hospital charts around the world. Split into 8 sections which each cover aspects of the natural lifecycle of a neonate, this book demonstrates the impact of religion, law, ethics, philosophy and culture on newborns' quality of life, and covers fascinating topics such as the rites of passage for the newborn, infanticide, opium use, breastfeeding, and artificial feeding. Each chapter is written in an accessible style and includes high-quality historical illustrations which really bring the subject to life. The Oxford Textbook of the Newborn: A Cultural and Medical History is a valuable resource for scholars, professionals, and students specializing in obstetrics, midwifery, paediatrics, neonatal nursing, and neonatology--
