The Dinosaur Filmography Mark F. Berry, 2015-08-31 From classics like King Kong, to beloved B-movies like The Beast from 20,000 Fathoms, to blockbusters like Jurassic Park, it's easy to see that filmmakers and audiences alike love to see dinosaurs on the screen. This comprehensive filmography, arranged alphabetically by title, contains entries that include basic facts (year of release, country of origin, studio, and running time), followed by a concise plot summary, the author's critical commentary, information on the production and the people behind it, and secrets of the often-ingenious special effects. Three useful appendices feature films with minor dinosaur content, planned but unfinished dinosaur movies, and the quasi-dinosaurs of Toho Studios. To be included, a movie must depict one or more representations of a prehistoric reptile. Inaccurate portrayals are included, as long as the intent is to represent a real or fictional dinosaur. Not eligible are films featuring prehistoric mammals, prehistoric humans or humanoids, and beasts of mythology--unless, of course, the movie also has a dinosaur.

Tales of Gotham, Historical Archaeology, Ethnohistory and Microhistory of New York City Meta F. Janowitz, Diane Dallal, 2013-02-03 Historical Archaeology of New York City is a collection of narratives about people who lived in New York City during the seventeenth, eighteenth, and nineteenth centuries, people whose lives archaeologists have encountered during excavations at sites where these people lived or worked. The stories are ethnohistorical or microhistorical studies created using archaeological and documentary data. As microhistories, they are concerned with particular people living at particular times in the past within the framework of world events. The world events framework will be provided in short introductions to chapters grouped by time periods and themes. The foreword by Mary Beaudry and the afterword by LuAnne DeCunzio bookend the individual case studies and add theoretical weight to the volume. Historical Archaeology of New York City focuses on specific individual life stories, or stories of groups of people, as a way to present archaeological theory and research. Archaeologists work with material culture—artifacts—to recreate daily lives and study

how culture works; this book is an example of how to do this in a way that can attract people interested in history as well as in anthropological theory.
