LA ESTRUCTURA DEL AIKIDO Gaku Homma,2000-06 Muchos se han preguntado si el origen de los movimientos del Aikido pueden ser hallados en la relación entre el manejo de la espada y la técnica de Aikido de la mano vacía. El autor afronta esta cuestión y mira cómo ambas disciplinas están relacionadas. Este libro se ocupa de maneras, etiqueta, ukemi (el arte de caer), así como del movimiento corporal básico. El estudio de este libro sobre dicho movimiento queda definido por los movimientos elementales ejecutados con el ken (sable) y su relación directa con el movimiento taijutsu (mano vacía). El movimiento ken se divide inicialmente en dos secciones, shinogi o el movimiento preliminar realizado antes de las técnicas reales y sabaki o la finalización real de las técnicas mismas. Se han utilizado más de 1.600 fotografías para ilustrar más de setenta técnicas de Aikido. Las fotos y el texto están organizados para mostrar una relación clara, movimiento a movimiento, entre kenjutsu, tateki no kurai (múltiples atacantes) y el movimiento taijutsu.

[La Navetierra Como Construir La Suya](#) Michael Reynolds,2017-01-20 Earthships son un tipo de edificación autosuficiente que se mantiene al margen de las redes de suministros energéticos y que se considera como un edificio vivo, ya que interactúa con los recursos naturales de la tierra para proporcionar un refugio confortable que regula de forma pasiva su temperatura interior (sin necesidad de utilizar ningún combustible fósil), capta su propio suministro de agua y al mismo tiempo reutiliza cada gota recolectada cuatro veces, hace un tratamiento de sus propias aguas residuales y permite el cultivo y crecimiento de comida en su interior. Este libro ofrece a los lectores la filosofía básica detrás del diseño de los earthships, y cómo estos edificios interactúan con la tierra para crear los sistemas que la caracterizan. Por otra parte Earthship Volumen Uno ofrece a los lectores instrucciones sobre cómo elegir el emplazamiento de su futura Earthship y también la forma de reproducir muchos de los materiales de construcción básicos que se utilizan para construir uno de estos edificios. Este libro es un punto de inicio si usted está interesado en la construcción de su propio earthship, o si simplemente quiere aprender más acerca de esta innovadora forma de vivir.

Las Estructuras Latifundistas en America Latina,

Génesis y estructura de El capital de Marx Roman Rozdolski, 1978 El nombre de Roman Rosdolsky está asociado a la publicación de los Grundrisse de Marx, por él descubiertos en 1948 en una biblioteca norteamericana, en donde se encontraba uno de los raros ejemplares disponibles en esa época en el mundo occidental. Desde entonces consagra gran parte de su tiempo a estudiarlo minuciosamente y a redactar los resultados de esa lectura con la intención de hacer conocer aquellos aspectos del pensamiento de Marx que lecturas esclerosadas de El capital habían mantenido ocultos. Para Rosdolsky los Grundrisse introducen en el laboratorio económico de Marx y ponen al descubierto todas las sutilezas y todos los intrincados senderos de su metodología. Su lenguaje, aparentemente más filosófico que el de El capital, ha contribuido a que su lectura y comprensión se tornen más difíciles. Pero si ésta es en parte la razón por la que numerosos economistas y los marxistas ortodoxos recibieron con indiferencia la publicación de esta obra, más lo es la negativa a una reflexión sistemática acerca de la naturaleza del objeto de la economía política marxista, supuesto, implícitamente, idéntico al de la economía burguesa. Lenin decía que para comprender El capital era necesario estudiar y comprender la lógica de Hegel. Pero desde la aparición de los Grundrisse, dice Rosdolsky, ya no es necesario apurar ese trago amargo, pues se puede lograr el mismo objetivo por la vía directa mediante el estudio de los Grundrisse. Más todavía, sin la más amplia asimilación de las nociones contenidas en esta obra, ya no es posible ningún progreso en el terreno de la economía marxista. Es cierto. Muchas de las dificultades de interpretación del complejo edificio teórico de El capital y de su estructura, muchas de las polémicas sobre las presuntas contradicciones internas tienen su origen en una insuficiente consideración de la específica metodología marxiana, a su vez vinculada al uso de la dialéctica -debidamente puesta sobre sus pies- de Hegel. La misma historia genética de El capital deberá afrontar el estudio de los fenómenos económicos en su carácter concreto después de haberlos captado en su máxima abstracción. Reconstruir este método, y seguir su aplicación desde los Grundrisse hasta El capital, permite esclarecer problemas teóricos durante largo tiempo controvertidos o, peor aún, deformados por el marxismo académico antiguo o reciente. En este denso y documentadísimo volumen, rico de implicaciones políticas no menos que de elucidaciones doctrinarias, Rosdolsky sigue el desarrollo del plan originario de la obra de Marx hasta su estructura definitiva, afrontando en cada caso los temas característicos de la indagación marxiana: desde la primera formulación de la teoría del dinero al

análisis del proceso de producción y a los capítulos sobre la circulación del capital y sobre la ganancia e interés. En todo el volumen, y particularmente en los capítulos conclusivos, Rosdolsky suministra el cuadro del debate en torno a la obra marxiana y a sus temas singulares: la reseña alude a Tugán-Baranovski, Hilferding, Lenin y Rosa Luxemburgo, en lo que ataña a la polémica sobre los esquemas de reproducción, a Böhm-Bawerk y, finalmente, a los más modernos intérpretes de Marx, como Joan Robinson y Sweezy.

Terra 2022 Leslie Rainer,Luis Fernando Guerrero Baca,Frank Matero,Lauren Meyer,2025-04-22 Featuring a global compendium of sites, buildings, urban settlements, and cultural landscapes, this volume combines recent research with practical approaches to conservation of earthen architectural heritage. Earthen architecture is one of the oldest forms of construction and is evidenced around the globe. This volume gathers the research and presentations from Terra 2022: 13th World Congress on Earthen Architectural Heritage, which brought together in Santa Fe, New Mexico, 350 conservation professionals and practitioners from fifty-two countries. Seventy richly illustrated papers, fifty-seven in English and thirteen in Spanish, address a range of conservation issues. Abstracts are provided in both English and Spanish for each paper. Themes covered include advances in research, strategies for archaeological sites, community-based care and decision-making, cultural landscapes, decorated surfaces, education, historic and modern buildings, conservation history, risks and vulnerabilities, and traditional materials and practices. Sections that draw on symposia held at the congress spotlight two recent architectural heritage initiatives: the rehabilitation of an urban settlement by the AlUla Old Town and Oasis Conservation Project in Saudi Arabia, and the conservation and management of eight monumental enclosure complexes at the Hopewell Ceremonial Earthworks in Ohio.
