Explorations in the History and Heritage of Machines and Mechanisms Marco Ceccarelli, Rafael López-García, 2022-04-06

This book gathers the latest advances in the field of history of science and technology, as presented by leading international researchers at the 7th International Symposium on History of Machines and Mechanisms (HMM), held in Granada and Jaén, Spain on April 28-30, 2022. The Symposium, which was promoted by the permanent commission for the History of Machine and Mechanism Science (MMS) of IFToMM, provided an international forum to present and discuss historical developments in the field of MMS. The contents cover all aspects of the development of MMS from antiquity until the present era and its historiography: modern reviews of past works, engineers in history and their works, the development of theories, history of the design of machines and mechanisms, historical developments of mechanical design and automation, historical developments of teaching, the history of schools of engineering, the education of engineers. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

History of Technology Volume 30 Ian Inkster, Angel Calvo, 2016-03-31 This book focuses on the development of four key issues in the development of modern Spain; knowledge, manufacturing, energy and telecommunications, and public works. If technology transfer from advanced nations to less developed systems always worked, then the whole world would now be rich. That this is not the case is so obvious, we might well expect that the history of the processes, successes and failures of technology transfer across nations would be a very well-established field of enquiry. In fact, the theme is still a developing one, and the present Special Issue centres on the case of Spain as exemplary in many respects. The collected essays focus upon the four major themes of knowledge, manufacturing, energy, and telecommunications and public works. Essays range in time from the 18th century to the present time, from studies of espionage and early links between craftsmen and savants, to the institutions of technology (from training systems, to private enterprise activity, or patents), to case-studies of silk manufacture, shipbuilding, mining, paper-making, and pharmaceuticals. Each essay offers a broad variety of material to bring to bear on a major problem of world development, past, present, and future.

Historia de la electricidad en la cuenca del Oja Jose Mari Merino Azcarraga, 2025-01-13 Este libro es el resultado de una investigación sobre la electrificación de la comarca regada por el río Oja. Su motivación es humana, empresarial y de historia industrial de la introducción de la electricidad en una parte de la Rioja Alta. Se ha contado con documentos de instituciones, empresas, familias y numerosos amigos que han colaborado abiertamente; amén de testimonios personales. La historia parte del año de 1896 y acaba el relato en 1964 cuando las actividades fueron absorbidas por IBERDUERO. A lo largo del libro se describe el alto río Oja desde el punto de vista de la generación eléctrica. Se explican las normas que, en aquellos años, regulaban las actividades eléctricas. Se consideran usos de la electricidad empezando por la iluminación pública y privada, durante las noches. Tras unos primeros años con la única aplicación para alumbrado se ven otros consumos principalmente en motores eléctricos para la incipiente mecanización de la industria. Se describen las primeras fábricas de luz, todas locales y muy pequeñas. Se termina explicando las actividades de una pequeña sociedad que integró el suministro de toda la comarca. Se añaden numerosos anexos, la mayor parte descargables de internet mediante el enlace que se facilita en el libro, de este modo el lector podrá profundizar e iniciar sus propias investigaciones.

De la casa-máquina a la casa-organismo Jaime Alberto Sarmiento Ocampo,2022-12-06 La vida siempre tiene la razón, el arquitecto es quien se equivoca, fue la sentencia que pronunció Le Corbusier, el arquitecto más revolucionario del siglo xx, cuando las viviendas que diseñó para Pessac fueron modificadas por sus habitantes. Fue su reconocimiento de que la casa preconcebida, asumida como un mecanismo para vivir, cedería el paso a la aparición de la vida misma en la vivienda. Este libro aborda esta mutación en la concepción de la vivienda, entendida, en principio, como objeto previsible y terminado para

transformarse recientemente en verbo variable e inacabado. Se estructura a partir de investigaciones sobre vivienda social industrializada en el mundo, de las que el autor abstrae conceptos para ser aplicados en su ejercicio profesional (I + D) y en su práctica docente (U + E + E), para finalmente mostrar un ejemplo de aplicación en la ciudad (mat-housing). Al reflexionar acerca de lo que hoy en día significa la vivienda y asumirla como un medio de vida más que un fin predeterminado, esta puede ser entendida como una especie de organismo adaptativo, casi vivo, que alberga y enaltece la existencia humana.
