

Is Buddhism Religion Or Philosophy

Sir Hari Singh Gour

Asian Philosophies and the Idea of Religion Sonia Sikka, Ashwani Peetush, 2020-09-28 With a focus on Asian traditions, this book examines varieties of thought and self-transformative practice that do not fit neatly on one side or another of the standard Western division between philosophy and religion. It contains chapters by experts on Buddhist, Confucian, Taoist, Hindu and Jain philosophies, as well as ancient Greek philosophy and recent contemplative and spiritual movements. The volume also problematizes the notion of a Western philosophical canon distinguished by rationality in contrast to a religious Eastern other. These original essays creatively lay the groundwork needed to rethink dominant historical and conceptual categories from a wider perspective to arrive at a deeper, more plural and global understanding of the diverse nature of both philosophy and religion. The volume will be of keen interest to scholars and students in the Philosophy of Religion, Asian and Comparative Philosophy and Religious Studies.

Pathways of Buddhist Thought Ven Nyanaponika, 2013-05-13 Originally published in 1971. The essays in this volume cover some of the most important aspects of Buddhism and include discussion of such themes as the nature of Buddhism, Buddhist ethics and philosophical concepts, Buddhism and science, the Power of Mindfulness, Anatta and Nibbana.

Buddhism as Philosophy Mark Siderits, 2007-06-15 In this clear, concise account, Siderits makes the Buddhist tradition accessible to a Western audience, offering generous selections from the canonical Buddhist texts and providing an engaging, analytical introduction to the basic tenets of Buddhist thought.

Thinker's Notebook Nyanamoli Thera, 2008-01-01 This book contains the collected posthumous papers of the English monk-scholar Nyanamoli, who counts as one of the foremost translators of Pali Buddhist texts into English. Besides being a gifted translator Nyanamoli was also a gifted thinker, philosopher, and poet. Besides some longer essays, most of the notes are only one paragraph long and were written in the 1950s as a Buddhist monk. The notes and essays deal with profound topics such as ontology, metaphysics, nuclear physics, logic, but there is also humour, irony, sarcasm and light poetry. Four essays were earlier published in a Wheel Publication no. 52/53, *Pathways of Buddhist Thought*.

The Political Philosophy of Zhang Taiyan Viren Murthy, 2011-02-28 Zhang Taiyan (1868-1936) is famous for being one of the first thinkers in China to promote revolution in the early twentieth century. Scholars have addressed Zhang's revolutionary and nationalist thought, but until this work there has not been any sustained engagement with Zhang's Buddhist writings which aimed to understand and criticize the world from the perspective of consciousness. These philosophical works are significant because they exemplify how, as Chinese intellectuals entered the global capitalist world, they constantly tried to find resources to create an alternative. As the author argues in the conclusion, this desire to create an alternative to capitalism remained throughout twentieth century China and continues today in the works of critical intellectuals such as Wang Hui. Thus this work is important not only to understand our past, but to hope for a better future.

Differences in Identity in Philosophy and Religion Lydia Azadpour, Sarah Flavel, Russell Re Manning, 2020-04-02 This book explores the constitutive role alterity plays in identity formation in Western and Eastern traditions. It examines the significance of difference in conceptions of identity across major philosophical and religious traditions in a global and

comparative context, considering Ancient Greek and Egyptian, Chinese, Islamic, European and Japanese philosophies. In addition, the book opens up discussion of less dominant trends in philosophical thinking, particularly the spaces between self-same existence and otherness in the histories of philosophical and religious thought. Chapters critique both essentialist and postmodern understandings of self-constitution by questioning the ordinary narrative of identity construction across Western and non-Western traditions. The book also explores the construction of selfhood from a wide range of perspectives, drawing upon individual philosophers (including Plotinus, Descartes, Geulincx, Hume, de Beauvoir and Ueda) as well as religious and philosophical movements, including Confucian philosophy, Zen Buddhism, Protestantism and Post-Phenomenology. *Differences in Identity in Philosophy and Religion* represents a landmark study, drawing together a range of approaches, perspectives and traditions to explore how identity is constructed across the world.

Averroes and Hegel on Philosophy and Religion Catarina Belo,2016-04-08 Comparing Averroes' and Hegel's positions on the relation between philosophy and religion, this book explores the theme of the authorities of faith and reason, and the origin of truth, in a medieval Islamic and a modern Christian context respectively. Through an in-depth analysis of Averroes' and Hegel's parallel views on the nature of philosophical and religious discourse, Belo presents new insights into their perspectives on the relation between philosophical knowledge and religious knowledge, and the differences between philosophy and religion. In addition, Belo explores particular works which have not yet been studied by modern scholarship.

The Evangelical Dictionary of World Religions H. Wayne House,2019-02-19 With all of the different religions, sects, denominations, and belief systems out there, it can be difficult to separate the facts from mere opinion, especially if one is relying solely on online sources which may or may not be vetted and which often have an ideological or political slant to

them. How can we truly understand if we cannot even be sure we are getting the facts straight? In this comprehensive resource, more than 75 evangelical scholars offer a thoroughly researched guide to Christianity, other world religions, and alternative religious views, including entries on movements, theological terms, and major historical figures. Perfect for pastors, students, and anyone who wants ready access to information on today's religious landscape.

Seeking the Sacred with Psychoactive Substances J. Harold Ellens, 2014-10-28 Can drugs be used intelligently and responsibly to expand human consciousness and heighten spirituality? This two-volume work presents objective scientific information and personal stories aiming to answer the question. The first of its kind, this intriguing two-volume set objectively reports on and assesses this modern psycho-social movement in world culture: the constructive medical use of entheogens and related mind-altering substances. Covering the use of substances such as ayahuasca, cannabis, LSD, peyote, and psilocybin, the work seeks to illuminate the topic in a scholarly and scientific fashion so as to lift the typical division between those who are supporters of research and exploration of entheogens and those who are strongly opposed to any such experimentation altogether. The volumes address the history and use of mind-altering drugs in medical research and religious practice in the endeavor to expand and heighten spirituality and the sense of the divine, providing unbiased coverage of the relevant arguments and controversies regarding the subject matter. Chapters include examinations of how psychoactive agents are used to achieve altered states in Judaism, Christianity, Islam, and Buddhism as well as in the rituals of shamanism and other less widely known faiths. This highly readable work will appeal to everyone from high school students to seasoned professors, in both the secular world and in devoted church groups and religious colleges.
