*Maternidades en tiempos de des(e)obediencias* Graciela Beatriz Reid,2020-08-20 Este libro establece un diálogo entre psicoanálisis y feminismos desde la rama académica de los estudios de género. ¿Qué lugar ocupa hoy la maternidad en el proyecto vital de las mujeres, cuando ninguna y todas quieren ser madres? A partir del análisis de casos clínicos que ponen en disputa el mito de mujer=madre, esta obra recoge diversos modos de constitución del deseo de hijx en las mujeres actuales. Entre el deseo y la desobediencia, expone la necesidad de continuar acompañando a las subjetividades de cara a los cambios políticos y simbólicos que den cuenta de los devenires deseantes del siglo XXI. El contexto de subjetividades contemporáneas, las configuraciones familiares por fuera del modelo heteronormativo y los modelos procreacionales propiciados por el avance de las nuevas tecnologías reproductivas exigen revisar críticamente los postulados metapsicológicos de la disciplina psicoanalítica.

**Ángela Ruíz Robles y la invención del libro mecánico (PDF)** Ministerio de Economía y Competitividad,2012-12-01 El principal deseo de Ángela Ruíz Robles era facilitar el aprendizaje a los estudiantes que tuvieron la oportunidad de beneficiarse de su magisterio. Dicha aspiración, unida a su afán por educar de una manera menos tradicional y más interactiva y a su inusual comprensión del lenguaje del futuro, propiciaron que, en los difíciles años inmediatamente posteriores a la Guerra Civil española, fuera capaz de idear y llevar a la práctica un prototipo de «libro mecánico» estrechamente emparentado con los actuales soportes electrónicos de lectura. Esta obra pretende situar en el lugar que merecen los innovadores trabajos de Ángela Ruíz Robles, abordándolos desde diferentes puntos de vista, que van desde el carácter pedagógico hasta el sociológico y tecnológico, sin dejar de lado la semblanza personal de la autora.

**The Truth about Language** Michael C. Corballis,2024-05-31 Evolutionary science has long viewed language as, basically, a fortunate accident—a crossing of wires that happened to be extraordinarily useful, setting humans apart from other animals and onto a trajectory that would see their brains (and the products of those brains) become increasingly complex. But as Michael C. Corballis shows in *The Truth about Language*, it's time to reconsider those assumptions. Language, he argues, is not the product of some big bang 60,000 years ago, but rather the result of a typically slow process of evolution with roots in elements of grammatical language found much farther back in our evolutionary history. Language,

Corballis explains, evolved as a way to share thoughts—and, crucially for human development, to connect our own mental time travel, our imagining of events and people that are not right in front of us, to that of other people. We share that ability with other animals, but it was the development of language that made it powerful: it led to our ability to imagine other perspectives, to imagine ourselves in the minds of others, a development that, by easing social interaction, proved to be an extraordinary evolutionary advantage. Even as his thesis challenges such giants as Chomsky and Stephen Jay Gould, Corballis writes accessibly and wittily, filling his account with unforgettable anecdotes and fascinating historical examples. The result is a book that's perfect both for deep engagement and as brilliant fodder for that lightest of all forms of language, cocktail party chatter.

Running and Clicking Sabine Schenk,2013-10-29 Running and Clicking examines how Future Narratives push against the confines of their medium: Studying Future Narratives in movies, interactive films, and other electronic media that allow for nodes, this volume demonstrates how the dividing line between film and game is progressively dissolved. Focused on traditional mass media, transitional media, and new media, it also touches on transmedial storytelling and virtual reality and offers a discussion of the political power of the imaginary and the twilight of Future Narratives in the post-human hegemony of the simulated real.

**The Cure for Catastrophe** Robert Muir-Wood,2016-09-06 We can't stop natural disasters but we can stop them being disastrous. One of the world's foremost risk experts tells us how. Year after year, floods wreck people's homes and livelihoods, earthquakes tear communities apart, and tornadoes uproot whole towns. Natural disasters cause destruction and despair. But does it have to be this way? In The Cure for Catastrophe, global risk expert Robert Muir-Wood argues that our

natural disasters are in fact human ones: We build in the wrong places and in the wrong way, putting brick buildings in earthquake country, timber ones in fire zones, and coastal cities in the paths of hurricanes. We then blindly trust our flood walls and disaster preparations, and when they fail, catastrophes become even more deadly. No society is immune to the twin dangers of complacency and heedless development. Recognizing how disasters are manufactured gives us the power to act. From the Great Lisbon Earthquake of 1755 to Hurricane Katrina, *The Cure for Catastrophe* recounts the ingenious ways in which people have fought back against disaster. Muir-Wood shows the power and promise of new predictive technologies, and envisions a future where information and action come together to end the pain and destruction wrought by natural catastrophes. The decisions we make now can save millions of lives in the future. Buzzing with political plots, newfound technologies, and stories of surprising resilience, *The Cure for Catastrophe* will revolutionize the way we conceive of catastrophes: though natural disasters are inevitable, the death and destruction are optional. As we brace ourselves for deadlier cataclysms, the cure for catastrophe is in our hands.

**La enseñanza con objetos de aprendizaje** Francisco Martínez Sánchez, María Paz Prendes Espinosa, 2011-11-11 Decir que las TIC son ya una herramienta básica para los ciudadanos del siglo XXI resulta una obviedad. *Marketplaces* Ceren Sezer, Rianne van Melik, 2022-07-29 This edited volume portrays marketplaces from a mobility perspective as dynamic and open entities consisting of flows of people, goods and ideas. There is a renewed interest in research and policy arenas in marketplaces as the core of cities' spatial and economic development and sociocultural life, as incubators of urban renewal and platforms of alternative consumption models and as source of livelihood for many people worldwide. Contributions of this book draw on notions of movements, representations and practices to illustrate that markets have physical reality but are also culturally and socially encoded, and experienced through practice. It brings together empirically evidenced scholarly and practice-based works from the United Kingdom, the Netherlands, Switzerland, Spain, Bulgaria, Turkey, Lebanon, Peru, Brazil, Vietnam, South Africa and India. This book is primarily intended for scholars and graduate students of urban geography, urban design and planning, sociology, anthropology, who are interested in the relation between place and mobility in general, and markets as 'knots' in the city, in particular. It also informs policy-makers how urban planning policies and design interventions for marketplaces may foster more socially inclusive and environmentally just cities. Chapters 1, 12, and 13 of this book are available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com). They have been made available under a Creative Commons Attribution-Non

**Innovación docente en didáctica de la lengua y la literatura: teoría e investigación** Pilar Núñez Delgado,Irene Alonso Aparicio,2015-11-06 El libro recoge varias aportaciones surgidas de un proyecto de innovación de la docencia universitaria desarrollado en la Universidad de Granada. El principal propósito de este ha sido dar a conocer —en el plano teórico y principalmente en la práctica— a los estudiantes de los grados de Maestro de Educación Infantil y de Maestro de Educación Primaria estrategias metodológicas adecuadas para el desarrollo de la competencia comunicativa y literaria de los escolares, dado que el ámbito de innovación que parece más rentable para lograr tales metas es, sin duda, el de la metodología. Esta metodología, entendida como el conjunto de criterios y decisiones que organiza la acción didáctica y que define el estilo educativo del docente, lejos de ser un elemento menor, es la clave para la implementación del necesario cambio que contribuya a desterrar el gramaticalismo y el historicismo que aún imperan en nuestras aulas. Los trabajos aquí compilados pueden ser útiles, por una parte, tanto para los docentes en ejercicio como para los que se preparan para serlo, especialmente para los de lengua y literatura. Además, también pueden guiar a profesores universitarios que forman a futuros docentes.

Approaches to Teaching the Works of Jorge Luis Borges José Eduardo González,2025-01-02 Often considered a writer who transcends national borders, Jorge Luis Borges also aimed to reinvent the history and traditions of his own country, Argentina. His unconventional works appeal to students, who nonetheless can find his richly intertextual prose challenging. Addressing courses in Spanish and in English, this volume offers innovative approaches that help students navigate the texts, engage with them emotionally and creatively, and understand the time and place of their production while connecting them to the present. Part 1, Materials, provides detailed biographical information about Borges as well as print and digital resources. The essays in part 2, Approaches, offer strategies for discussing his writing process, his manuscripts, and the material history and translation of his texts. Contributors also examine Borges's influences, which include film, mythology, history, and ideas of Islam and Judaism; the author's interest in humor and games; and resonances with other literary works.

Theatrical Topographies Sarah M. Misemer, 2017-06-05 The economic crisis in Argentina in 2001-2002 that spilled over into Uruguay causing fiscal and political problems is the starting point for my research on space and theater, and it demonstrates why we must look at the River Plate in both global and local ways. Connections among monetary policies, industries, and legal, social, and political movements mean that national spaces like Uruguay's are fraught with tensions that come from both within and outside of borders. Recent economic crises like the one that is occurring in Greece, further demonstrate how nation states and trade blocks must constantly negotiate power as they toggle between national and international pressures. Nation states are being prompted to reconceive perspectives on governance that fall away from the parameters of Westphalian autonomy and reconcile their views with trends that instead require thinking about power as a network with shifting centers. The introduction launches the study by addressing these political and economic trends, the spatial turn in theater and performance studies, the rise of multiculturalism, and also examines the Uruguayan historical context of the post-dictatorship and impunity laws that pit national sovereignty against international human rights laws. These crises are enacted on the Uruguayan stage and contextualized through networks and spatial topographies, intertextualities on the page, explorations of history and memory, and ultimately notions of identity in four areas: the postdramatic and economic realm (chapter one: Peveroni), cultural geography and psychogeography (chapter two: Morena), midrash and questions of human rights and growing fascist trends (chapter three: Sanguinetti), and finally in mapmaking on the stage through mise-en-scène/performance and "wayfinding" through sites of contested power (chapter four: Calderón). The concluding chapter (Blanco) looks at the reinterpretation of Greek tragedy as a commentary on the messy process of democratization. Here, access to the polis and power are problematized through the lens of international sex trafficking and gendered roles that exclude portions of the populace from participation in the process of self-governance.

**Lectura, escritura y oralidad en tiempos digitales** Carlos Andrés Tobar Tovar, 2021-12-03 Este libro es el resultado de un intercambio de prácticas educativas entre miembros del grupo de investigación Comunicación y Lenguajes adscrito al Departamento de Comunicación y Lenguaje de la Facultad de Humanidades y Ciencias Sociales de la Pontificia Universidad Javeriana Cali. El desarrollo de la actividad se llevó a cabo durante el 2020, tiempo en el que transcurre la pandemia por Covid-19 y la comunidad educativa debe repensar sus interacciones a partir de mediaciones digitales que dan forma a lo que actualmente seguimos asimilando bajo la denominación de “educación remota”.

Tar for Mortar Jonathan Basile, 2018 TAR FOR MORTAR offers an in-depth exploration of one of literature's greatest tricksters, Jorge Luis Borges. His short story The Library of Babel is a signature exemplar of this playfulness, though not merely for the inverted world it imagines, where a library thought to contain all possible permutations of all letters and words and books is plumbed by pious librarians looking for divinely pre-fabricated truths. One must grapple as well with the irony of Borges's narration, which undermines at every turn its narrator's claims of the library's universality, including the very possibility of exhausting meaning through combinatory processing. Borges directed readers to his non-fiction to discover the true author of the idea of the universal library. But his supposedly historical essays are notoriously riddled with false references and self-contradictions. Whether in truth or in fiction, Borges never reaches a stable conclusion about the atomic premises of the universal library - is it possible to find a character set capable of expressing all possible meaning, or do these letters, like his stories and essays, divide from themselves in a restless incompleteness? While many readers of Borges see him as presaging our digital technologies, they often give too much credit to our inventions in doing so. Those who elide the necessary incompleteness of the Library of Babel compare it to the Internet on the assumption that both are total archives of all possible thought and expression. Though Borges's imaginings lend themselves to digital creativity (libraryofbabel.info is certainly evidence of this), they do so by showing the necessary incompleteness of every totalizing project, no matter how technologically refined. Ultimately, Basile nudges readers toward the idea that a fictional/imaginary exposition can hold a certain power over technology.

The Logic of Gilles Deleuze Corry Shores, 2020-10-15 French philosopher Gilles Deleuze wrote two 'logic' books: Francis Bacon: The Logic of Sensation and The Logic of Sense. However, in neither of these books nor in any other works does Deleuze articulate in a formal way the features of the logic he employs. He certainly does not use classical logic. And the best options for the non-classical logic that he may be implementing are: fuzzy, intuitionist, and many-valued. These are applicable to his concepts of heterogeneous composition and becoming, affirmative synthetic disjunction, and powers of the false. In The Logic of Gilles Deleuze: Basic Principles, Corry Shores examines the applicability of three non-classical logics to

Deleuze's philosophy, by building from the philosophical and logical writings of Graham Priest, the world's leading proponent of dialetheism. Through so doing, Shores argues that Deleuze's logic is best understood as a dialetheic, paraconsistent, many-valued logic.

The Whirlpool That Produced China Zhao Tingyang, 2024-08-01 In *The Whirlpool That Produced China*, Tingyang Zhao offers a philosophical interpretation of China's historicity, explaining how the expansion of China was not due to the lures of expansionist behavior but to the offerings of the surrounding contenders as they were constantly being pulled into a whirlpool of growth and amalgamation. The peoples surrounding China on all four sides sought to win the greatest material benefits and greatest spiritual resources by shaping their ways of thinking and living around the evolving core culture of the central plains. Zhao also investigates how the tianxia vision of world order was able to dissolve the fierce currents of contention and create out of them the inclusive model of many cultures and many peoples with many forms of governance. He explains these reasons for why China became China by weaving together ontology with game theory methodology: the stag hunt. Ultimately, Zhao addresses the question of how ancient China became such an irresistible attraction—a stag—to its vital periphery that once a population and territory was drawn into the game, or the whirlpool, it was difficult if not impossible to withdraw.
