Town and Country Planning in the UK Simin Davoudi, David Webb, Geoff Vigar, John Pendlebury, Tim Townshend, Trevor Hart, Vincent Nadin, 2014-12-05 Town and country planning has never been more important to the UK, nor more prominent in national debate. Planning generates great controversy: whether it's spending £80m and four years' inquiry into Heathrow's Terminal 5, or the 200 proposed wind turbines in the Shetland Isles. On a smaller scale telecoms masts, take-aways, house extensions, and even fences are often the cause of local conflict. Town and Country Planning in the UK has been extensively revised by a new author group. This 15th Edition incorporates the major changes to planning

introduced by the coalition government elected in 2010, particularly through the National Planning Policy Framework and associated practice guidance and the Localism Act. It provides a critical discussion of the systems of planning, the procedures for managing development and land use change, and the mechanisms for implementing policy and proposals. It reviews current policy for sustainable development and the associated economic, social and environmental themes relevant to planning in both urban and rural contexts. Contemporary arrangements are explained with reference to their historical development, the influence of the European Union, the roles of central and local government, and developing social and economic demands for land use change. Detailed consideration is given to • the nature of planning and its historical evolution • the role of the EU, central, regional and local government • mechanisms for developing policy, and managing these changes • policies for guiding and delivering housing and economic development • sustainable development principles for planning, including pollution control • the importance of design in planning • conserving the heritage • community engagement in planning The many recent changes to the system are explained in detail – the new national planning policy framework; the impact of the loss of the regional tier in planning and of the insertion of neighbourhood level planning; the transition from development control to development management; the continued and growing importance of environmental matters in planning; community engagement; partnership working; changes to planning gain and the introduction of the Community Infrastructure Levy; and new initiatives across a number of other themes. Notes on further reading are provided and at the end of the book there is an extensive bibliography, maintaining its reputation as the ‘bible’ of British planning.

Urban Sociology and Urbanized Society J.R. Mellor,2013-04-15 Focusing on urban sociology as practised in Britain, the author argues that it is a key element in the response of the 'intellectual proletariat' to urbanization and the calls on it by the State to control the ensuing way of life. The themes of urban sociology have been the concerns of the Welfare State and, despite radical inputs, the discipline has remained tied up with the assumptions and methodological precepts of liberalism. The author's contention is that urbanization should be analysed in the framework of the political economy of regional development. This book was first published in 1977.

Spaces of Congestion and Traffic David Rooney,2018-09-03 This book provides a political history of urban traffic congestion in the twentieth century, and explores how and why experts from a range of professional disciplines have attempted to solve what they have called ‘the traffic problem’. It draws on case studies of historical traffic projects in London to trace the relationship among technologies, infrastructures, politics, and power on the capital’s congested streets. From the visions of urban planners to the concrete realities of engineers, and from the demands of traffic cops and economists to the

new world of electronic surveillance, the book examines the political tensions embedded in the streets of our world cities. It also reveals the hand of capital in our traffic landscape. This book challenges conventional wisdom on urban traffic congestion, deploying a broad array of historical and material sources to tell a powerful account of how our cities work and why traffic remains such a problem. It is a welcome addition to literature on histories and geographies of urban mobility and will appeal to students and researchers in the fields of urban history, transport studies, historical geography, planning history, and the history of technology.

Rome and the Colonial City Sofia Greaves,Andrew Wallace-Hadrill,2022-05-05 According to one narrative, that received almost canonical status a century ago with Francis Haverfield, the orthogonal grid was the most important development of ancient town planning, embodying values of civilization in contrast to barbarism, diffused in particular by hundreds of Roman colonial foundations, and its main legacy to subsequent urban development was the model of the grid city, spread across the New World in new colonial cities. This book explores the shortcomings of that all too colonialist narrative and offers new perspectives. It explores the ideals articulated both by ancient city founders and their modern successors; it looks at new evidence for Roman colonial foundations to reassess their aims; and it looks at the many ways post-Roman urbanism looked back to the Roman model with a constant re-appropriation of the idea of the Roman.

Town Planning for Australia George Taylor,2014-08-07 George Taylor's Town Planning for Australia was the first dedicated book on the subject of urban planning published in Australia. Journalistic and ideological in style, it sets out a robust vision for a specifically Australian approach to planning and development of towns in a young country. Taylor was a controversial figure, a political activist and publisher who brought the NSW Town Planning Association into existence and played a key role in publishing and promoting planning into the 1920s.His wife Florence Taylor was the first female qualified architect and trained engineer in Australia, and an important figure in the history of planning and publishing in Australia.
