The Constitution of Western Australia Alan Fenna,Sarah Murray,2023-06-16 This book provides the first comprehensive introduction to, and enquiry into, the rules of Western Australia's (WA) system of government. The WA Constitution is not well known or understood — or even easy to identify — and this book provides an essential guide. It brings academic expertise and careful scholarship to the exploration of sometimes complex constitutional issues in a way that will be invaluable for those with specialist interest in constitutional law and government while also being engaging and accessible for a wider audience. In doing so, it combines authorial expertise from constitutional law and political science — something essential to a well-rounded understanding of the simultaneously legal and political nature of a Constitution.

Colonial Violence and Monuments in Global History Cynthia C. Prescott,Janne Lahti,2023-08-29 This book tackles the historical relationship between colonial violence and monuments in Africa, Europe, the Indian subcontinent, North America, and Australia. In this volume, the authors ask similar questions about monuments in each location and answer them following a parallel structure that encourages comparison, highlighting common themes. The chapters track the contested histories of monuments, scrutinizing their narrative power and examining the violent events behind them. It is both about the history of monuments and the histories the monuments are meant to commemorate. It is interested in this nuanced relationship between violence, monuments, memory, and colonial legacies; the ways different facets of colonial violence—conquest, resistance, massacres, genocides, internments, and injustices—have been commemorated (or haven't been), how they live in the present, and how pertinent they are in the present to different peoples. Legacies of colonial violence, and continued reinterpretations of the past and its meanings remain very much ongoing. They are still very much unsettled questions in large parts of the world. *Colonial Violence and Monuments in Global History* will be essential reading for students, scholars, and researchers of political science, history, sociology and colonial studies. The book was originally published as a special issue of the *Journal of Genocide Research*.

Perth Plants Russell Barrett,Eng Pin Tay,2016-04-01 The city of Perth is well known and treasured for its areas of protected bushland in the heart of the city. Kings Park and Bold Park represent a significant part of the natural heritage of the Swan Coastal Plain and are an important part of city life. The city is also a gateway to the incredible biodiversity to be found in south-west Western Australia. *Perth Plants* provides a comprehensive photographic guide to all plants known to

occur in the bushlands of Kings Park and Bold Park, both native plants and naturalised weeds. There are 778 species included, representing approximately one-quarter of all the plants in the greater Perth region, and one-tenth of all species known for the south-west of Western Australia. This new edition contains 22 additional species and updated photography throughout. It is an essential reference for anyone interested in the plants of south-west Western Australia, and particularly the Swan Coastal Plain.

'Every Mother's Son is Guilty' Chris Owen, 2016 This is a marvellous contribution by Chris Owen to the understanding of the role the Western Australian police force played in the colonial expansion into the Kimberley district of Western Australia. - Senator Patrick Dodson, Yawuru Elder ***Chris Owen provides a compelling account of policing in the Kimberley district from 1882, when police were established in the district, until 1905 when Dr. Walter Roth's controversial Royal Commission into the treatment of Aboriginal people was released. Owen's achievement is to take elements of all the pre-existing historiography and test them against a rigorous archival investigation. In doing so, a fuller understanding of the complex social, economic, and political changes occurring in Western Australia during the period are exposed. The policing of Aboriginal people changed from one of protection under law to one of punishment and control. The subsequent violence of colonial settlement and the associated policing and criminal justice system that developed, often of questionable legality, was what Royal Commissioner Roth termed a 'brutal and outrageous state of affairs.' *Every Mother's Son is Guilty* is a significant contribution to Australian and colonial criminal justice history. [Subject: History, Aboriginal Studies, Criminal Justice, policing]

Forest Family John C. Ryan, Rod Giblett, 2018-06-12 *Forest Family* highlights the importance of the old-growth forests of Southwest Australia to art, culture, history, politics, and community identity. The volume weaves together the natural and cultural histories of Southwest eucalypt forests, spanning pre-settlement, colonial, and contemporary periods. The contributors critique a range of content including historical documents, music, novels, paintings, performances, photography, poetry, and sculpture representing ancient Australian forests. *Forest Family* centers on the relationship between old-growth nature and human culture through the narrative strand of the Giblett family of Western Australia and the forests in which they settled during the nineteenth century. The volume will be of interest to general readers of environmental history, as well as scholars in critical plant studies and the environmental humanities.

The Archaeology of Market Capitalism Gaye Nayton, 2011-04-13 The area claimed by the British Empire as Western Australia was primarily colonized through two major thrusts: the development of the Swan River Colony to the southwest in 1829, and the 1863 movement of Australian born settlers to colonize the northwest region. The Western Australian story is overwhelmingly the story of the spread of market capitalism, a narrative which is at the foundation of modern western world

economy and culture. Due to the timing of settlement in Western Australia there was a lack of older infrastructure patterns based on industrial capitalism to evoke geographical inertia to modify and deform the newer system in many ways making the systemic patterns which grew out of market capitalist forces clearer and easier to delineate than in older settlement areas. However, the struggle between the forces of market capitalism, settlers and indigenous Australians over space, labor, physical and economic resources and power relationships are both unique to place and time and universal in allowing an understanding of how such complicated regional, interregional and global forces shape a settler society. Through an examination of historical records, town layout and architecture, landscape analysis, excavation data, and material culture analysis, the author created a nuanced understanding of the social, economic, and cultural developments that took place during this dynamic period in Australian history. In examining this complex settlement history, the author employed several different research methodologies in parallel, to create a comprehensive understanding of the area. Her research techniques will be invaluable to researchers struggling to understand similarly complex sociocultural evolutions throughout the globe.

Women's Activism Francisca de Haan, Margaret Allen, June Purvis, Krassimira Daskalova, 2012-12-12 *Women's Activism* brings together twelve innovative contributions from feminist historians from around the world to look at how women have always found ways to challenge or fight inequalities and hierarchies as individuals, in international women's organizations, as political leaders, and in global forums such as the United Nations. The book is divided into three parts. Part one, brings together four essays about organized women's activism across borders. The chapters in part two focus on the variety of women's activism and explore women's activism in different national and political contexts. And part three explores the changing relationships and inequalities among women. This book addresses women's internationalism and struggle for their rights in the international arena; it deals with racism and colonialism in Australia, India and Europe; women's movements and political activism in South Africa, Eastern Bengal (Bangladesh), the United Kingdom, Japan and France. Essential reading for anyone interested in women's history and the history of activism more generally

Dreamers and Schemers Frank Bongiorno, 2022-11-01 A landmark book - the first full political history of Australia In this compelling and comprehensive work, renowned historian Frank Bongiorno presents a social and cultural history of Australia's political life, from pre-settlement Indigenous systems to the present day. Depicting a wonderful parade of dreamers and schemers, Bongiorno surveys moments of political renewal and sheds fresh light on our democratic life. From local pubs and meeting halls to the parliament and cabinet; from pamphleteers and stump orators to party agents and operatives -- this enthralling account looks at the political insiders in the halls of power, as well as the agitators and outsiders who sought to shape the nation from the margins. A work of political history like no other, *Dreamers and Schemers* will transform the way you look at Australian politics. 'With acuity and grace, Bongiorno divines the soul of the nation ... All told with a cheeky eye for detail and nose for skullduggery by a historian in full archival, narrative and rhetorical flight. A

landmark work' --Clare Wright 'Bongiorno is one of our premier historians and this is his masterwork. An original take on our politics and people, written with an open mind and warm Australian heart.' --George Megalogenis 'Penetrating and vividly written, this a political history that broadens our understanding of politics; one that offers genuinely fresh insights and resists tidy generalisations. From First Nations politics to the democracy sausage, Dreamers and Schemers never disappoints. It will stand as one of the most essential works in Australian history for decades to come.' --Mark McKenna Shortlisted for the Australian History Prize in the NSW Premier's History Awards

Broken Circles Anna Haebich,2000-11-01 This major work reveals the dark heart of the history of the Stolen Generations in Australia. It shows that, from the earliest times of European colonization, Aboriginal Australians experienced the trauma of loss and separation, as their children were abducted, enslaved, institutionalized, and culturally remodeled. Providing a moving and comprehensive account of this tragic history, this study covers all Australian colonies, states, and territories. The analysis spans 200 years of white occupation and intervention, from the earliest seizure of Aboriginal children, through their systematic state removal and incarceration, and on to the harsh treatment of families under the assimilation policies of the 1950s and 1960s. The resistance struggle and achievements of Aboriginal people in defending their communities, regaining their rights and mending the broken circles of family life provides a compelling parallel story of determination and courage.

The Foundation of Australia's Capital Cities Anthony Webster,2022-03-02 The Foundation of Australia's Capital Cities is the story of how the places chosen for Australia's seven colonial capitals came to shape their unique urban character and built environments. Tony Webster traces the effects of each city's geologically diverse coastal or riverine landform and the local natural materials that were available for construction, highlighting how the geology and original landforms resulted in development patterns that have persisted today.

Night Parrot Penny Olsen,2018-09-01 For well over a century, the Night Parrot lured its seekers into Australia's vast, arid outback. From the beginning it was a mysterious bird. Fewer than 30 specimens were collected before it all but disappeared, offering only fleeting glimpses and the occasional mummified body as proof of its continued existence. Protected by spinifex

and darkness, the parrot attained almost mythical status: a challenge to birdwatchers and an inspiration to poets, novelists and artists. Night Parrot documents the competitiveness and secrecy, the triumphs and adventures of the history of the bird and its followers, culminating in the recent discovery of live birds at a few widely scattered locations. It describes what we are now unravelling about the mysteries of its biology and ecology and what is still left to learn. Complemented by guest essays, illustrations and photographs from a wide variety of sources, this book sheds light on Australia's most elusive bird.

Sport, Culture and History Brian Stoddart, 2013-09-13 In addition to being an internationally recognised pioneer of sports history, Brian Stoddart has also been a leading thinker and influence in the field. That influence has crossed several areas of history, sociology, business, politics and media aspects of sports studies, and has drawn deeply upon his own training in Asian studies. His work has been characterised by cross-disciplinary work from the outset, and has encompassed some very different geographical areas as well as crossing from academic outlets to media commentary. As a result, his influential work has appeared in many different locations, and it has been difficult for a wide variety of readers to access it fully and easily. This volume draws together, in the one place for the first time, some of his most important academic and journalistic work. Importantly, the pieces are drawn together by an intellectual/autobiographical commentary that locates each piece in a wider social and cultural framework. This book was previously published as a special issue of *Sport in Society*

Biodiversity and Ecosystem Function Ernst-Detlef Schulze, Harold A. Mooney, 2012-12-06 The biota of the earth is being altered at an unprecedented rate. We are witnessing wholesale exchanges of organisms among geographic areas that were once totally biologically isolated. We are seeing massive changes in landscape use that are creating even more abundant successional patches, reductions in population sizes, and in the worst cases, losses of species. There are many reasons for concern about these trends. One is that we unfortunately do not know in detail the consequences of these massive alterations in terms of how the biosphere as a whole operates or even, for that matter, the functioning of localized ecosystems. We do know that the biosphere interacts strongly with the atmospheric composition, contributing to potential climate change. We also know that changes in vegetative cover greatly influence the hydrology and biochemistry of a site or region. Our knowledge is weak in important details, however. How are the many services that ecosystems provide to humanity altered by modifications of ecosystem composition? Stated in another way, what is the role of individual species in ecosystem function? We are observing the selective as well as wholesale alteration in the composition of ecosystems. Do these alterations matter in respect to how ecosystems operate and provide services? This book represents the initial probing of this central question. It will be followed by other volumes in this series examining in depth the functional role of biodiversity in various ecosystems of the world.

Historical Dictionary of the British Empire Kenneth J. Panton, 2015-05-07 For much of the nineteenth and early twentieth centuries, Britain was the dominant world power, its strength based in large part on its command of an Empire that, in the

years immediately after World War I, encompassed almost one-quarter of the earth's land surface and one-fifth of its population. Writers boasted that the sun never set on British possessions, which provided raw materials that, processed in British factories, could be re-exported as manufactured products to expanding colonial markets. The commercial and political might was not based on any grand strategic plan of territorial acquisition, however. The Empire grew piecemeal, shaped by the diplomatic, economic, and military circumstances of the times, and its speedy dismemberment in the mid-twentieth century was, similarly, a reaction to the realities of geopolitics in post-World War II conditions. Today the Empire has gone but it has left a legacy that remains of great significance in the modern world. The Historical Dictionary of the British Empire covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Britain.

Colonial Ambitions and Collecting Anxieties Nicola Froggatt, 2025-05-09 European portrayals of Aboriginal people and their objects have long had political implications. This book explores 'ethnographic' objects from Western Australia now in British and Irish museums, and is the first full scholarly treatment of their part in fashioning colonial relationships and identities over the nineteenth and early twentieth centuries. It scrutinises a body of material that once sparked extensive scholarly and popular interest, but has since been largely overlooked in scholarship into the relationship between collecting and empire. This book assesses how non-Aboriginal collectors understood Aboriginal objects, and what this reveals about colonial relationships, anxieties and ambitions. Considering objects now spread across the British Isles, it examines intersecting impulses that informed collecting: notions of the 'frontier', the navigation of one's experiences across sites of empire, and the Eurocentric narrative of Aboriginal 'extinction', to show how colonial ideology intersected with personal experience. It scrutinises collectors' own accounts as well as the voices of other individuals involved in collecting episodes, showing how ideas about indigenous peoples were being developed and contested. *Colonial Ambitions and Collecting Anxieties* is particularly aimed at scholars of material culture, histories of collecting and empire, cultural heritage workers and other readers interested in museums, colonialism and Australian history.
