Web Engineering Alessandro Bozzon,Philippe Cudré-Mauroux,Cesare Pautasso,2016-05-24 This book constitutes the refereed proceedings of the 16th International Conference on Web Engineering, ICWE 2016, held in Lugano, Switzerland, in June 2016. The 19 full research papers, 13 short papers, 3 vision papers, 11 demonstrations, 5 posters, 6 PhD Symposium

and 4 tutorials presented were carefully reviewed and selected from 120 submissions. The 16th edition of ICWE accepted contributions related to different research areas revolving around Web engineering, including: Web application modelling and engineering, Human computation and crowdsourcing, Web applications composition and mashups, SocialWeb applications, SemanticWeb, and, for the first time, also the Web of Things.

Engineering Design Applications VI Andreas Öchsner, Holm Altenbach, 2024-07-18 This book gives an update on recent developments in the mentioned areas of modern engineering design application. Different engineering disciplines such as mechanical, materials, computer and process engineering provide the foundation for the design and development of improved structures, materials and processes. The modern design cycle is characterized by an interaction of different disciplines and a strong shift to computer-based approaches where only a few experiments are performed for verification purposes. A major driver for this development is the increased demand for cost reduction, which is also connected to environmental demands. In the transportation industry (e.g. automotive), this is connected with the demand for higher fuel efficiency, which is related to the operational costs and the lower harm for the environment. One way to fulfil such requirements are lighter structures and/or improved processes for energy conversion. Another emerging area is the interaction of classical engineering with the health, medical, and environmental sectors.

Carrera Panamericana Daryl Murphy, 2008 Carrera Panamericana: the Mexican Road Race. In its day it was the longest, fastest and likely wildest international automobile race ever staged. A World Championship event along with Le Mans, the Mille Miglia, Nüburgring and the Tourist Trophy, most drivers considered it the best-and the worst-of them all. From 1950 to 1954, it was witnessed by ten million spectators along a nearly 2,000-mile course that featured deserts where the faster cars could reach 180 mph and 10,000-foot mountain passes requiring first-gear operation. Carrera Panamericana influenced engineering and marketing from Michigan to Modena. Ferrari designed and named a model specifically for the race. Lincoln emerged as a high-performance sedan and Porsche's Carrera was named in honor of its wins. The Pan-Am was so unconventional and fascinating that it came to hold the world's attention for a full week each year. It was one of the last of the great open road events and the first in which European and American cars could be compared and marked the return of US factory support to racing in America.
