An Introduction to Systems Science John N. Warfield, 2006 This is the first book that renders a thorough discussion of systems science. It draws on material from an extensive collection of external sources, including several other books and a special library collection complete with videotape empirical evidence of applicability of the theory to a wide variety of circumstances. This is essential because systems science must be responsive to diverse human situations of the widest difficulty, and it must fill the void that the specific sciences cannot fill, because these sciences are insensitive to the necessities of reconciling disparate views of multiple observers, and incorporating local conditions in hypotheses that precede inductive explorations. Sample Chapter(s). Chapter 1: Unlimited Scope of System Science (195 KB). Contents: Foundations: The Chapters; Discovery: The Chapters; Resolution: The Chapters; The Practitioners (OC SystemistsOCO): The Chapters; Systems Science: The Chapters; Appendices: Gallery; The OC Warfield Special CollectionOCO at the George Mason University Fenwick Library; Discovering Systems Science; Linguistic Adjustments: Precursors to Understanding Complexity; The Two Neutral Processes of Systems Science; Statements, Themes, Findings, Structure; Literacy in Structural Graphics: The Higher Education Imperative. Readership: Graduate students, academics and practitioners in business management, computer science and engineering.

Adam Smith and The Wealth of Nations in Spain Jesús Astigarraga, Juan Zabalza, 2021-12-19 Adam Smith's *An Inquiry into the Nature and Causes of the Wealth of Nations* was the product of the rich tradition of the Scottish Enlightenment but the book's fame immediately spread across the whole of Europe. This book looks at the long journey of Smith's ideas from Scotland to peninsular Spain, reconstructing in detail the reception, adaptation, interpretation, and application of Smith's central concepts from 1777 up to 1840. In light of methodological advances during the last two

decades in the history of economic thought and the studies on the late Spanish Enlightenment and early Liberalism, the book tackles a series of significant issues and gaps in the historiography. In particular: this book sheds new light on the role of France as an intermediate step as the ideas spread from Britain southwards; the analysis draws not just on translations but also handwritten materials, book reviews, syntheses, summaries, plagiarism and rebuttals; a wide range of methods of dissemination are considered including the printing press and periodicals, parliamentary debates, academic chairs and societies; the role of individual translators and agents is given due prominence; the political interpretations of the Wealth of Nations and the ways in which the book was incorporated into the work of Spanish economists in the decades following publication are also considered. This book marks a significant contribution to the literature on the reception of Smith's Wealth of Nations, studies of the Spanish Enlightenment and history of economic thought more broadly.

Social Identities in the Classic Maya Northern Lowlands Traci Ardren, 2015-04-15 Using new archaeological data from four major cities of the Classic Maya world, this book explores how gender, age, familial and community memories, and the experience of living in an urban setting interacted to form social identities. Social Identities in the Classic Maya Northern Lowlands plumbs the archaeological record for what it can reveal about the creation of personal and communal identities in the Maya world. Using new primary data from her excavations at the sites of Yaxuna, Chunchucmil, and Xuenkal, and new analysis of data from Dzibilchaltun in Yucatan, Mexico, Traci Ardren presents a series of case studies in how social identities were created, shared, and manipulated among the lowland Maya. Ardren argues that the interacting factors of gender, age, familial and community memories, and the experience of living in an urban setting were some of the key aspects of Maya identities. She demonstrates that domestic and civic spaces were shaped by gender-specific behaviors to communicate and reinforce gendered ideals. Ardren discusses how child burials disclose a sustained pattern of reverence for the potential of childhood and the power of certain children to mediate ancestral power. She shows how small shrines built a century after Yaxuna was largely abandoned indicate that its remaining residents used memory to envision their city during a time of cultural reinvention. And Ardren explains how Chunchucmil's physical layout of houses, plazas, and surrounding environment denotes that its occupants shared an urban identity centered in the movement of trade goods and economic exchange. Viewing this evidence through the lens of the social imaginary and other recent social theory, Ardren demonstrates that material culture and its circulations are an integral part of the discourse about social identity and group membership.
