Civilising Globalisation David Kinley, 2009-08-13 Economic globalisation and universal human rights both have the aspiration and power to improve and enrich individuals and communities. However, their respective institutions, methods, practices and goals differ, leading to both detrimental clashes and beneficial synergies. In this book, David Kinley analyses how human rights intersect with the trade, aid and commercial dimensions of global economic relations, taking the view that, while the global economy is a vitally important civilising instrument, it itself requires civilising according to human rights standards. Combining meticulous research with highly informed views and experiences, he outlines the intellectual, policy and practical frameworks for ensuring that the global economy advances the ends of human rights, argues for better exploitation of the global economy's capacity to distribute as well as create wealth, and proposes mechanisms by which to minimise and manage the socially debilitating effects of its market failures and financial meltdowns.

The Fortune at the Bottom of the Pyramid, Revised and Updated 5th Anniversary Edition C.K. Prahalad, 2009-07-15 Drawing on Prahalad's breakthrough insights in *The Fortune at the Bottom of the Pyramid*, great companies worldwide have sought to identify, build, and profit from new markets amongst the world's several billion poorest people, while at the same time helping to alleviate poverty. Five years after its first publication, this book's ideas are no longer theory: they are proven, profitable reality. In the 5th Anniversary Edition, Prahalad thoroughly updates his book to reveal all that's been learned about competing and profiting at the bottom of the pyramid. Prahalad outlines the latest strategies and tactics that companies are utilizing to succeed in the developing world. He interviews several innovative CEOs to discuss what they've learned from their own initiatives, including the Unilever business leader who's built a billion-dollar business in India. You'll find a new case study on Jaipur Rugs' innovative new global supply chain; updates to earlier editions' key cases; and up-to-the-minute information on the evolution of key industries such as wireless, agribusiness, healthcare, consumer goods, and finance. Prahalad also offers an up-to-date assessment of the key questions his ideas raised: Is there truly a market? Is there scale? Is there profit? Is there innovation? Is this a global opportunity? Five years ago, executives could be hopeful that the answers to these questions would be positive. Now, as Prahalad demonstrates, they can be certain of it.

Decoding Customer Value at the Bottom of the Pyramid Ritu Srivastava, 2019-11-25 Mature businesses across all advanced countries are struggling to find new markets. Indian market has been estimated huge in size, approximately \$1.2 trillion in purchasing power parity for the households earning an annual income of less than \$4,000. This comes to almost 880 million of Indian population of which 22 percent is urban India and 78 percent rural India. Referred to as bottom of the pyramid/low income/subsistence markets, while these markets offer immense business opportunities they also pose challenges. The needs of this segment have to be addressed by the corporate world but it might need a new approach with new business frameworks for implementation. The companies must understand what constitutes value for this segment, how it is different from other segments and how firms can offer value through their market offerings; accordingly what could be the successful business models. *Decoding Customer Value at the Bottom of the Pyramid: An Urban India Perspective* answers these questions through a practical, rigorous and research oriented way. This book is a must read for business executives across the globe with an interest in the low income customers in India.

Base of the Pyramid 3.0 Fernando Casado Cañeque, Stuart L. Hart, 2017-09-08 For well over 4 billion people – approximately 60% of all humanity – annual income is less than \$1,500. The term Base of the Pyramid was first coined by Stuart L. Hart and C.K. Prahalad in 2002 and has become synonymous with both the method by which we can more effectively address poverty and the opportunity that exists in a multi-trillion-dollar market. A whole new lexicon has emerged to describe this phenomenon, including new buzzwords and catch phrases like inclusive business, opportunities for the majority, sustainable livelihoods, pro-poor business and “social business”, and thousands of new businesses, institutions and investment funds have been set up. In this ground-breaking new book, Stuart L. Hart and Fernando Casado Cañeque have worked with members of the BoP Global Network to shake the tree, look objectively at what has happened since 2002, highlight why earlier applications of BoP haven’t worked and propose new objectives and ways of working to formulate more sustainable solutions. The book challenges the reader and organizations to think about the mindset and purpose across whole organizations, open innovation rather than simply co-creation, and a complete review of the innovation ecosystem. Through this book, practitioners will gain a clearer insight into which business models can work within different communities to ensure a sustainable transition to improved local economies. Equally, the book is a must-read for researchers and students in the fields of entrepreneurship, innovation, sustainable development and environmental management.

Success in the Bottom of the Pyramid Market in Africa Philipp von Carlowitz, 2020-11-13 This book presents an empirical investigation of the efforts that multinational pharmaceutical companies take in order to find a business model that allows for

a profitable access to the Bottom of the Pyramid (BoP) markets. The Bottom of the Pyramid in Africa is frequently mentioned as an attractive market due to its sheer size. Yet most companies struggle to access it because of the low price level, difficult physical market access and challenges when it comes to payment. More specifically, the book investigates the following business model-related questions: Do pharmaceutical companies provide products that meet the needs of the BoP? What characterizes the value generation of the company? What revenue model leads to a profitable business, and what role does a network of partners play in the business model? Findings reveal that there is no 'one-size-fits-all' answer to these questions. Providing continuous availability, affordability at a good quality of goods and services, creating health awareness, as well as localizing business to achieve a level of inclusiveness are essential prerequisites for success. In the last chapter this book provides a business model prototype that accounts for these key success factors for business at the Bottom of the Pyramid and points to further research topics.

Entrepreneurship at the Bottom of the Pyramid Carol Dalglish, Marcello Tonelli, 2016-08-12 2017 Nautilus Book Awards: Silver Award Winner 2018 Great Northwest Book Festival: Winner 2018 Hollywood Book Festival: Winner Entrepreneurship at the Bottom of the Pyramid seeks to demonstrate to students the range of entrepreneurial activities that can be implemented in developing countries to alleviate poverty. The book blends theory, visual examples and practical learning activities to help students apply their knowledge and encourage thinking 'outside the box'. It begins by introducing the reader to two fundamental concepts - poverty and the bottom of the pyramid - so they have a solid grasp of the context in which the entrepreneurial activities are implemented. Next, the authors discuss the entrepreneurial process, highlighting the most relevant elements: risk, survival and growth, entrepreneurial actors, the informal sector and micro-credit. Finally, the book describes models to encourage entrepreneurial activities in developing countries. Weaving a primary case study throughout so the reader can apply new knowledge incrementally while moving through the chapters, Dalglish and Tonelli also include several shorter case studies, presenting different problems and implemented solutions in several geographical areas. Students with an interest in entrepreneurship, poverty alleviation and development studies will find this an important read.

The Last 10 Per Cent Erica Harper, 2023-03-28 Criticism that the development sector has not delivered in terms of eliminating extreme poverty, fast-tracking growth and preventing conflict, is neither new nor surprising. In fact, it may be the one thing that scholars, donors and practitioners agree on. While many of these concerns are valid, this book makes a case that the sector is closer to unlocking the gates to more effective and efficient development outcomes than is popularly believed. Specifically, it argues that by overturning a few myths, making better use of evidence and employing some different rules, practitioners, policy specialists and donors can foster the changes in the development architecture that are needed to

reach the 10 percent of the world's population still living in extreme poverty. Engaging, provocative and clear sighted, the book provides insight into interventions around democratic governance, refugee response, counterterrorism, gender mainstreaming, environmental protection and private sector engagement. It is instructive reading for professionals across the development sector, think tanks and NGOs.

India and the IT Revolution A. Greenspan, 2004-10-08 The 'Indian Techie' has become a global icon, taking its place alongside McDonalds and MTV as one of the key symbols of contemporary globalization. *India and the IT Revolution* explores the contemporary emergence of cosmopolitan, high-tech India as marking the arrival of a truly global cyberculture. It argues against the notion that globalization is a process of 'Westernization', which radiates out unilaterally from the core, imposing itself upon a passive, backward periphery.
