Brian L. Mishara

The Oxford Handbook of Suicide and Self-injury Matthew Nock, 2014 This handbook provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self-injury and our ability to predict and prevent it.

Understanding Suicide's Allure Stanley Krippner, Linda Riebel, Debbie Joffe Ellis, Daryl S. Paulson, 2021-01-13 This book explains why suicide can be alluring to a person aiming to stop his or her traumatic pain—whether its source is bullying, sexual assault, war combat, or other PTSD-invoking events—and details approaches that can prevent suicide. Suicide has been a taboo topic in Western culture. The mere mention of suicide sparks reactive responses that include medical, moral, spiritual, and religious debates. As a result, the authors open an important discussion here, offering an honest and non-judgmental examination of the many aspects involved in the nature of suicide, explaining that above all, people need to learn how to support those struggling with suicidal thoughts or to intercept their own suicidal thinking. The book also includes an extensive review and evaluation of the many available mental health treatments. Special consideration is given to military suicides. U.S. soldier suicides exceed one per day and continue to rise in all military branches, while veteran suicide rates are even higher, averaging 17 per day. Communities, families, veterans, and service members are in need of tools and insights for coping with, navigating, and exposing the suicidal attitudes affecting many current and former members of the military.

The American Psychiatric Publishing Textbook of Suicide Assessment and Management Robert I. Simon, Robert E. Hales, 2012 This new edition of Textbook of Suicide Assessment and Management follows the natural sequence of events in evaluating and treating patients: assessment, major mental disorders, treatment, treatment settings, special populations, special topics, prevention, and the aftermath of suicide.

THEORIES OF SUICIDE John F. Gunn, David Lester, 2015-06-01 Some researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide. However the book's authors are not quite so critical of past theories. In the book they review the classic theories of suicide, both psychological and sociological, because they are the foundation of our current theories and also propose the skeletons of possible future theories. The goal of the text is to present researchers with theories to guide their research, encourage them to modify these theories, perhaps meld them together in some cases, and think how they might propose new theories. Presented in three

sections, the first reviews significant psychological theories including: Suicide as Escape; Interpersonal-Psychological theory; The Role of Defeat and Entrapment in Suicidal Behavior; Suicide, Ethology and Sociobiology; Stress-Diatheses; Cognitive Theories; Learning Perspective on Suicide; Theories of Personality and Suicide; Typological Theories; and the Pathophysiology of Suicide. The second section of the text addresses Sociological and Economic Theories including: Suicide as Deviance, Naroll's Thwarting Disorientation Theory, three classic sociological theories as well as several minor theories. A comprehensive chapter on economic theories is offered by Bijou Yang. The final section concentrates on Critical Thoughts About Theories of Suicide, a new and growing influence in academia and scholarship.

Understanding Death and Dying Frank E. Eyetsemitan, 2020-07-16 Understanding Death and Dying teaches students about death, dying, bereavement, and afterlife beliefs by asking them to apply this content to their lives and to the world around them. Students see differing cultural experiences discussed in context with key theories and research. The text's pedagogy delivers relevant multi- and cross-cultural applications and connections across topics. This helps students evaluate their personal assumptions and appreciate how the content applies to their own current and future roles as individuals, family members, work colleagues, and as part of a community. The text simultaneously challenges learners to consider their own perspectives and to think critically about the parallels between their own lives and different cultures. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Suicide Assessment and Treatment Planning John Sommers-Flanagan, Rita Sommers-Flanagan, 2021-01-12 This practical guide provides a holistic, wellness-oriented approach to understanding suicide and working effectively with clients who are suicidal. John and Rita Sommers-Flanagan's culturally sensitive, seven-dimension model offers new ways to collaboratively integrate solution-focused and strengths-based strategies into clinical interactions and treatment planning with children, adolescents, and adults. Each chapter contains diverse case studies and key practitioner guidance points to deepen learning in addition to a wellness practice intervention to elevate mood. Personal and professional self-care and emotional preparation techniques are emphasized, as are ethical issues, counselor competencies, and clinically nuanced skill building. *Requests for digital versions from ACA can be found on www.wiley.com *To purchase print copies, please visit the ACA <https://imis.counseling.org/store/> *Reproduction requests for material from books published by ACA should be directed to publications@counseling.org

The American Psychiatric Association Publishing Textbook of Psychiatry Laura Weiss Roberts, 2019-05-02 The American Psychiatric Association Publishing Textbook of Psychiatry, first published more than 30 years ago, is a landmark text with a legacy of sound scholarship, expert knowledge, and effective pedagogy. Thoroughly revised and featuring new authors and content, the seventh edition raises the bar, adding age-related, cultural, societal, and population considerations

in the practice of psychiatry to the authoritative text that generations of students, residents, and clinicians have heretofore relied upon. The book first focuses on foundational knowledge, with chapters on psychiatric interviewing, diagnostic formulation, developmental assessment, laboratory testing and neuroimaging, and ethical and legal aspects of clinical psychiatry, and then proceeds to a full presentation of psychiatric disorders in alignment with DSM-5. The third section offers an overview of treatment strategies and methods in present-day psychiatry, a combination of evidence-based biological interventions and psychotherapies, and gives a clear sense of exciting new directions in psychiatric therapeutics. The final section of the textbook is focused on the care of special patient populations, including women; children and adolescents; lesbian, gay, bisexual, and transgender individuals; older adults; and culturally diverse individuals. Many topics are new to this volume, including the following: Suicide risk assessment, a critically important subject, is addressed in a new chapter that provides the reader with up-to-date knowledge needed to conduct a thorough, attuned, and accurate psychiatric interview in line with best practices. A new chapter on the social determinants of mental health has been added, reflecting an increased emphasis on populations whose specific concerns have been historically underappreciated in American psychiatry, and illuminating factors that influence mental health needs and barriers to care in specific patient populations. Precision psychiatry, an integrative approach that pulls together the scientific foundation of the discipline and recent technological advances and directs them toward closing the gap between discovery and clinical translation, is explored in a new chapter. E-health strategies in mental health have become increasingly available to psychiatrists and other health professionals, especially in the mobile and monitoring spheres. A new chapter offers insights into these intriguing new options for delivering treatment. A chapter on complementary and integrative therapies explores the integration of conventional medicine with alternative treatments for which there is an evidence base, providing an overview of nutrients, phytomedicines, hormones, mind--body practices, and electromagnetic treatments. With features such as key clinical points and recommended readings for further study, The American Psychiatric Association Publishing Textbook of Psychiatry is a comprehensive course book, an indispensable reference, and the ultimate resource for clinical care.

Eight historical dissertations in suicide, chiefly in reference to philosophy, theology, and legislation Henry Gabriel Migault, 1856

Touched by Suicide Christi Taylor-Jones, 2024-11-04 Touched by Suicide by Christi Taylor-Jones delves into the very personal, yet archetypal, reasons why people choose to end their life, or think about doing so. Although depression and mental illness are often cited as motivating factors, Taylor-Jones contends that anger, shame and self-hatred are greater contributors. Anxiety and impulsivity are also implicated. Underlying the suicidal urge, however, is a deep, and often unconscious, longing to end suffering through transformation and rebirth. Lacking the ability to undergo that process symbolically leaves no choice but to enact it literally. Taylor-Jones emphasizes the importance of the symbolic element, and

points out that suffering is part of life, and to live life fully requires making meaning out of the pain we do suffer. She explores the views of suicide throughout time, from the Greeks to Christianity and later psychology. She describes the role depression, mental illness, shame, and trauma play in suicidal thinking, as well as heroic and selfless motivations behind some suicides. The book also distinguishes between conscious and unconscious suicide. Her book, based on her own personal and professional experiences, as well as the basic tenets of C.G. Jung regarding the Self, the individuation process, and the soul, offers insight and hope to those who consider or who have attempted suicide, as well as those who seek an in-depth approach to the subject. Taylor-Jones claims that we need to transform the shame and judgment that often accompanies suicidal feelings and replace them with empathic understanding of suicide's ultimate goal.

Mental Health and Mental Illness in Paramedic Practice Louise Roberts, David Hains, 2020-09-18 With increasing prevalence, paramedics are commonly dispatched to pre-hospital settings where mental health and mental illness are essential considerations in paramedic practice and approaches to treatment. *Mental Health and Mental Illness in Paramedic Practice* is the first text of its kind – a resource specifically written by expert clinicians and academics solely for the Australian and New Zealand paramedic context. The text introduces fundamental concepts and theories in mental health and mental illness in the context of paramedic principles of care. It delves into topics such as person-centred mental healthcare; communication and the therapeutic relationship; and legal and ethical issues – all within the realm of paramedic practice. The textbook steps students through common patient presentations in the pre-hospital setting and offers practical guidance in applying appropriate approaches to treatment. - Case studies accompanied by critical thinking questions are incorporated throughout to assist with application to practice - Demonstrates relevance to real-life scenarios through consumer vignettes and paramedic stories - Special considerations embedded in each chapter, including: cultural considerations; ethics and ethical dilemmas; inter-professional practice, application and considerations; and ongoing care / other modes of care - Review questions included at the end of each chapter to ensure reflection on key topics and concepts - Strong focus on evidence-based research and practice - Core components of undergraduate paramedicine addressed - An eBook included in all print purchases

Death & Sex Tyler Volk, Dorion Sagan, 2009-10-13 On DEATH . . . What is shared by spawning Pacific salmon, towering trees, and suicidal bacteria? In his lucid and concise exploration of how and why things die, Tyler Volk explains the intriguing ways creatures-including ourselves-use death to actually enhance life. Death is not simply the end of the living, though even in that aspect the Grim Reaper has long been essential to natural selection. Indeed, the exquisite schemes and styles of death that have emerged from evolution have been essential to the great story from life's beginnings in tiny bacteria nearly four thousand million years ago to ancient human rituals surrounding death and continuing to the existential concerns of human culture and consciousness today. Volk weaves together autobiography, biology, Earth history, and results of fascinating

studies that show how thoughts of our own mortality affect our everyday lives, to prove how an understanding of what some have called the ultimate taboo can enrich the celebration of life. . . . and SEX In Sex, Dorion Sagan takes a delightful, irreverent, and informative romp through the science, philosophy, and literature of humanity's most obsessive subject. Have you ever wondered what the anatomy and promiscuous behaviors of chimpanzees and the sexual bullying of gorillas tell us about ourselves? Why we lost our hair? What amoebas have to do with desire? Linking evolutionary biology to salacious readings of the lives and thoughts of such notables as the Marquis de Sade and Simone de Beauvoir, and discussing works as varied as *The Story of O* and *Silence of the Lambs*, Sex touches on a potpourri of interrelated topics ranging from animal genitalia to sperm competition, the difference between nakedness and nudity, jealousy's status as an aphrodisiac and the origins of language, Casanova and music, ovulation and clothes, mother-in-law jokes and alpha females, love and loneliness. A brief, wonderfully entertaining, highly literate foray into the origins and evolution of sex. Two books in one cover, *Death & Sex* unravel and answer some of life's most fundamental questions.

Understanding Journalism Lynette Sheridan Burns, 2002-05-24 Understanding Journalism provides an indispensable guide through the processes and decisions required to produce quality journalism. Starting from 'What is news?' and moving on to consider decisions about public interest, accuracy and reliability of sources, and ethics, this book provides a model for practice centering on developing skills in critical self-reflection. It will help answer the question of 'Where to begin?' - examining the processes used by journalists to define, identify, evaluate and create journalism. Understanding Journalism offers a guide to: Finding news - exploring the nature of news and the factors influencing news judgement Choosing news - considering the power journalists exercise in selecting the issues that become news and examining the ethical implications of these decisions Gathering news - focusing on primary research - specifically interviews Constructing news - explores the processes used in deciding what to omit and what to include in the news depending on a targeted audience Working With Words - explores the role of editing in journalism and how it affects media messages Understanding Journalism will be essential reading for all students of journalism.

The Impact of Suicide Brian L. Mishara, 1995 A prestigious group of internationally known contributors, including Robert Kastenbaum, Alan Berman, and David Lester, among others, take an incisive look at suicide's effects on family, friends, and professionals. Research data are supplemented by rich clinical experience on issues such as bereavement counseling, repeated suicidal behavior, and the impact of suicide on therapists and caregivers, a topic that has almost never been discussed in the literature. This volume is a useful resource for researchers, clinicians, and other mental health professionals, including family therapists, grief counselors, and clinical social workers.

Health and Corrections Lior Gideon, 2025-08-01 Putting forward a new approach to the study of corrections, this book draws together public health and corrections and explores the importance of this nexus. Presenting a theoretical overview of

relevant sociological and public health theories, the book introduces basic concepts, terminology, analytical frameworks, and theories, covering major issues in the domain of public health, public safety, and criminal justice. Addressing incarcerated population health needs in correctional setting, it provides an accessible and panoramic overview of the policy impact of laws on the health of incarcerated individuals. In doing so, the book investigates a variety of topics, including preincarceration and prison-generated trauma, chronic health issues, contagious infectious diseases, and aging in the system. The focus is on four “special-needs populations”: (1) women’s health; (2) mental illness among inmates; (3) elderly and geriatric inmates; and (4) substance abusing inmates. Giving an organizational perspective to the topic of health and corrections, the book also considers violence, public health in the community, access to health services by marginalized individuals, and why it matters to discuss health in prisons, the living conditions in prison, health management, and the health and well-being of those engaged with incarcerated individuals. Health and Corrections aims to generate an important discussion on the nexus of health and justice and will be a valuable resource for students, researchers, and instructors, as well as for professionals in the field of corrections, criminal justice, and public health and safety.

Suicide Century Andrew Bennett, 2017-10-05 Suicide Century investigates suicide as a prominent theme in twentieth-century and contemporary literature. Andrew Bennett argues that with the waning of religious and legal prohibitions on suicide in the eighteenth and nineteenth centuries and the increasing influence of medical and sociological accounts of its causes and significance in the twentieth century, literature responds to the act and idea as an increasingly normalised but incessantly baffling phenomenon. Discussing works by a number of major authors from the long twentieth century, the book explores the way that suicide makes and unmakes subjects, assumes and disrupts meaning, induces and resists empathy, and insists on and makes inconceivable our understanding of ourselves and of others.

The Lancet, 1893

The Bridgend Suicides Ann Luce, 2016-08-10 This in depth analysis looks at how suicide was represented in the British press when 20 young people between the ages of 15 and 29 took their own lives in the South Wales Borough of Bridgend in 2008. The chapters highlight specific categories of description that journalists use to explain suicide to their readers. The study also examines the discourses that emerged around suicide that continue to perpetuate stigma and shame when suicide occurs today. Using her own experience of having lost a loved one to suicide, coupled with original research, the author gives a very frank explanation of why suicide is not accepted in society today.

Sarah Kane’s Theatre of Psychic Life Leah Sidi, 2023-03-09 Sarah Kane was one of the landmark playwrights of 1990s Britain, her influence being felt across UK and European theatre. This is the first book to focus exclusively on Kane's unique approach to mind and mental health. It offers an important re-evaluation of her oeuvre, revealing the relationship between theatre and mind which lies at the heart of her theatrical project. Drawing on performance theory, psychoanalysis and

neuroscience, this book argues that Kane's innovations generate a 'dramaturgy of psychic life', which re-shapes the encounter between stage and audience. It uses previously unseen archival material and contemporary productions to uncover the mechanics of this innovative theatre practice. Through a radically open-ended approach to dramaturgy, Kane's works offer urgent insights into mental suffering that take us beyond traditional discourses of empathy and mental health and into a profound rethinking of theatre as a mode of thought. As such, her theatre can help us to understand debates about mental suffering today.

Journal of Nervous and Mental Disease, 1921 July 1918-1943 include reports of various neurological and psychiatric societies.

Ethics for Journalists Sallyanne Duncan, 2023-01-31 *Ethics for Journalists* critically explores many of the dilemmas that journalists face in their work and supports journalists in good ethical decision-making. From building trust, to combatting disinformation, to minimizing harm to vulnerable people through responsible suicide reporting, this book provides substantial analysis of key contemporary ethical debates and offers guidance on how to address them. Revised and updated throughout, this third edition covers: the influence of press freedom and misinformation on trust the novel ethical challenges presented by social media the need for diversity of sources and in the newsroom, specifically relating to gender, ethnicity, sexual orientation and disability issues around vulnerable people—reporting traumatic events, bereaved people, suicide and privacy health journalism and reporting a pandemic; and the impact of regulation on professional standards Taking an accessible and engaging approach, including expert reflections on personal and professional experience, *Ethics for Journalists* provides a wealth of insight for those in journalism, from students and trainees to specialist correspondents and experienced editors.
