Daniel F McAuley

Britain, 1846-1964 Martin Roberts, 2001 The aim of this book is to explain how Britain's circumstances changed between 1846 - 1964: Britain in 1846 was by far the richest nation in the world. In 1964, Britain was, comparatively, much less rich than the USA and, though amongst the world's richest nations, was losing ground to Japan and to Western Europe. Because of her wealth and her navy, Britain in 1846 was the most powerful nation in the world. Britain in 1964 was dwarfed by the superpowers of the USA and the USSR. The British Empire of the 1840s reflected Britain's power. By 1964 the Empire was collapsing. Only one in five men (and no women) could vote in the Britain of 1840s. By 1964 Britain was fully democratic, with all adults entitled to vote. In a period of a little over a century, these were some of the changes to which Britain had to adapt. It was a period that marked a substantial fall in Britain's comparative power and prosperity in the world.

The Look of the Past Ludmilla Jordanova, 2012-09-27 How can we use visual and material culture to shed light on the past? Ludmilla Jordanova offers a fascinating and thoughtful introduction to the role of images, objects and buildings in the study of past times. Through a combination of thematic chapters and essays on specific artefacts – a building, a piece of sculpture, a photographic exhibition and a painted portrait – she shows how to analyse the agency and visual intelligence of artists, makers and craftsmen and make sense of changes in visual experience over time. Generously illustrated and drawing on numerous examples of images and objects from 1600 to the present, this is an essential guide to the skills that students need in order to describe, analyse and contextualise visual evidence. *The Look of the Past* will encourage readers to think afresh about how they, like people in the past, see and interpret the world around them.

Early Modern Spectatorship Ronald Huebert,David McNeil,2019-06-30 What did it mean to be a spectator during the lifetime of Shakespeare or of Aphra Behn? In *Early Modern Spectatorship* contributors use the idea of spectatorship to reinterpret canonical early modern texts and bring visibility to relatively unknown works. While many early modern spectacles were designed to influence those who watched, the very presence of spectators and their behaviour could alter the conduct and the meaning of the event itself. In the case of public executions, for example, audiences could both observe and be observed by the executioner and the condemned. Drawing on work in the digital humanities and theories of cultural spectacle, these essays discuss subjects as various as the death of Desdemona in *Othello*, John Donne's religious orientation, Ned Ward's descriptions of London, and Louis Laguerre's murals painted for the residences of English aristocrats. A lucid exploration of subtle questions, *Early Modern Spectatorship* identifies, imagines, and describes the spectator's experience in early modern culture.

Picture-Work Diana Kamin,2023-11-21 How the image collection, organized and made available for public consumption, came to define a key feature of contemporary visual culture. The origins of today's kaleidoscopic digital visual culture are many. In this book, Diana Kamin traces the sharing of photographs to an image economy developed throughout the twentieth century by major institutions. Picture-Work examines how three of these institutions—the New York Public Library, the Museum of Modern Art, and the stock agency H. Armstrong Roberts Inc.—defined the public's understanding of what the photographic image is, while building vast collections with universalizing ambitions. Highlighting underexplored figures, such as the first rights and reproduction manager at MoMA Pearl Moeller and visionary NYPL librarian Romana Javitz, and underexplored professional practices, Diana Kamin demonstrates how bureaucratic work communicates ideas about images to the public. Kamin artfully shows how the public interfaces with these image collections through systems of classification and protocols of search and retrieval. These interactions, in turn, shape contemporary image culture, including concepts of authorship, art, property, and value, as well as logics of indexing, tagging, and hyperlinking. Together, these interactions have forged a concept of the image as alienable content, which has intensified with the advent of digital techniques for managing image collections. To survey the complicated process of digitization in the nineties and early aughts, Kamin also includes interviews with photographers, digital asset management system designers, librarians, and artists on their working practices.
