Rethinking America's Highways Robert W. Poole,2018-08-03 A transportation expert makes a provocative case for changing the nation's approach to highways, offering "bold, innovative thinking on infrastructure" (Rick Geddes, Cornell University). Americans spend hours every day sitting in traffic. And the roads they idle on are often rough and potholed, with exits, tunnels, guardrails, and bridges in terrible disrepair. According to transportation expert Robert Poole, this congestion and deterioration are outcomes of the way America manages its highways. Our twentieth-century model overly politicizes highway investment decisions, short-changing maintenance and often investing in projects whose costs exceed their benefits. In Rethinking America's Highways, Poole examines how our current model of state-owned highways came about and why it is failing to satisfy its customers. He argues for a new model that treats highways themselves as public utilities—like electricity, telephones, and water supply. If highways were provided commercially, Poole argues, people would pay for highways based on how much they used, and the companies would issue revenue bonds to invest in facilities people were willing to pay for. Arguing for highway investments to be motivated by economic rather than political factors, this book makes a carefully-reasoned and well-documented case for a new approach to highways.

London George Philip & Son,2007-02-08 A fully revised edition of this pocket-sized paperback atlas, giving comprehensive and detailed coverage of London. The maps of central London are at 7 inches to 1 mile, with the outlying boroughs at the clear scale of 3.5 inches to 1 mile.New for this edition is the 18-page route planner, showing and naming all

urban through-routes, which can be used by drivers for getting close to their destination before turning to the full detail of the relevant street map page. The street maps show every named road, street and lane clearly, with major roads picked out in colour. The maps show postcode boundaries, car parks, railway and bus stations, post offices, schools, colleges, hospitals, police and fire stations, places of worship, leisure centres, footpaths and bridleways, camping and caravan sites, golf courses, and many other places of interest. The comprehensive index lists street names and postcodes, plus schools, hospitals, railway stations, shopping centres and other such features picked out in red, while other places of interest are shown in blue. In addition there is an index of hospitals with A&E departments and an index of places of interest. There are two separate maps of central London, one detailing theatres, cinemas and shopping streets, with the second showing bus routes. A third map displays the London Underground and overground rail networks with Travelcard Zones. This atlas is suitable for both drivers and pedestrians. For drivers, route-finding in London is much easier as through-routes are highlighted, giving the user the equivalent of local knowledge of an area. Speed cameras, one-way streets and restricted turns are clearly displayed with the Congestion Charge Zone. For pedestrians, tourist sights and attractions are clearly labelled and public transport systems are featured.
