El Bosque en Cantabria VV.AA.,1990

CINCO MILLONES DE AÑOS DE CAMBIO FLORÍSTICO Y VEGETAL en la Península Ibérica e Islas Baleares JOSÉ CARRIÓN coordinador ,2015-05-25 La Península Ibérica y las Islas Baleares suponen un centro de biodiversidad vegetal de gran importancia en la biogeografía del extremo occidental de Eurasia. En este libro se analizan y discuten los registros paleobotánicos para los últimos cinco millones de años de cambio ambiental, incluyendo estudios sobre polen y carbón fósil, restos macroscópicos preservados y otros microfósiles de importancia en la reconstrucción de ecosistemas pretéritos. La utilidad de este conocimiento excede su ámbito temático y alcanza la biología de la conservación y la gestión del patrimonio natural.

Un viaje por los caminos y puentes de las comarcas orientales de Cantabria: Trasmiera, Costa Oriental y Asón-Agüera Luis Villegas Cabredo ,2022-08-03 Los caminos y puentes son esenciales para la ocupación y transformación del territorio y el desarrollo de los pueblos, al tiempo que son hitos de nuestros paisajes, historia, patrimonio construido y memoria personal. Este libro narra la evolución de estas infraestructuras de transporte terrestre a lo largo de la historia de Cantabria, desde los caminos antiguos hasta las actuales autovías. Está escrito pensando en un «viajero» que va recorriendo las comarcas centrales de esta región y a medida que supera las dificultades que la ruta lleva consigo (puertos de montaña, paso de rías y demás), se va encontrando las referencias del camino (sus pueblos, iglesias, torres, casonas, puentes y otros).

Catálogo de la flora vascular de Cantabria Juan Antonio Durán Gómez,2014-04-15 El Catálogo de la flora vascular de Cantabria es la primera recopilación moderna de todas las plantas vasculares de la Comunidad Autónoma de Cantabria. La obra arranca con una introducción en la que se da una amplia reseña histórico-botánica y se explica detalladamente la organización del catálogo. La segunda parte se dedica a la descripción geográfica y climática, haciendo hincapié en la descripción fitogeográfica de Cantabria. La parte principal del libro corresponde al catálogo florístico, que consta de 2321 táxones (incluye subespecies e híbridos; 2650 si añadimos los alóctonos subespontáneos). Para cada taxon se da, tras el nombre admitido en negrita, un listado de sus sinónimos principales. Se aportan datos de ecología, y para muchos táxones su filiación fitosociológica. Se explica su corología general y su distribución aproximada en Cantabria mediante una sectorización, aportando su rango altitudinal y el grado de abundancia. Se dan un listado de citas previas (incluyendo su

presencia en herbarios). En muchas ocasiones se aporta un listado de localidades inéditas, y se especifican las novedades florísticas para Cantabria. En este trabajo también se han recogido con detalle los táxones alóctonos a los que se les asigna una tipología (naturalizado, invasor, subespontáneo/adventicio y posiblemente autóctono). Tras el catálogo general se aporta como novedad en este tipo de trabajos, un listado de plantas cultivadas. Le sigue la habitual síntesis florística tras la que se dedica un espacio al listado de nombres comunes regionales. El último capítulo abarca la flora protegida en los diversos niveles administrativos y flora la amenazada. La obra finaliza con los correspondientes apartados dedicados a la amplia bibliografía consultada y un completo índice de familias, especies, y nombres comunes.

El paisaje del valle del Asón (Cantabria) a finales del Tardiglacial Alejandro García Moreno, 2015 RESUMEN El final del Pleistoceno en la Región Cantábrica (norte de la Península Ibérica) es testigo de una serie de importantes transformaciones ambientales, sociales y culturales. Desde el punto de vista climático y ambiental, el Tardiglacial se caracteriza por una gran inestabilidad, y supone a grandes rasgos el fin de unas condiciones glaciares y la transición a otras más templadas y húmedas. Esto conlleva el desarrollo de masas forestales caducifolias, principalmente de robledales y bosques mixtos atlánticos, que van desplazando los bosques de pinos dominantes durante el Würm. La progresiva sustitución de bosques de coníferas por otros caducifolios pudo haber influido en los cambios económicos y la organización social de las sociedades del final del Paleolítico. En este trabajo, se analizan los cambios en el paisaje del valle del río Asón (Cantabria) a lo largo del Tardiglacial. Para ello, se ha desarrollado, mediante el empleo de un Sistema de Información Geográfica (SIG), un modelo predictivo de distribución potencial de la vegetación arbórea. Este modelo, basado en los requerimientos ecológicos de las principales taxa arbóreos identificados en los diagramas políticos de la región, estima las áreas donde mayor probabilidad de desarrollo tendría cada especie. Los resultados obtenidos permiten comprobar un importante cambio en la distribución espacial de las principales masas forestales a lo largo del Tardiglacial y del Holoceno inicial. Este cambio en el paisaje, y por lo tanto en la distribución de los recursos asociados a los bosques caducifolios, pudo haber influido en los cambios observados en las estrategias de subsistencia y los patrones de asentamiento de los grupos de cazadores y recolectores del Magdaleniense Superior y el Aziliense. ABSTRACT The end of the Pleistocene in the Cantabrian Region (northern Iberia) witnesses a series of major environmental, social and cultural changes. From a climatic and environmental point of view, the Lateglacial is characterized by a high instability, and broadly means the transition from glacial to warmer and milder conditions. This transition implies the development of deciduous forests, mainly oakwoods and Atlantic mixed forests, which displaced the pine forests dominant during the Würm glaciation. The continual substitution of conifers by deciduous forests might have had an influence on the changes in the economy and the social organization of Late Palaeolithic societies. In this work, changes in the landscape of the Asón river valley (Cantabria) during the Lateglacial are analysed. To do this, a GIS-

based predictive model for the potential distribution of tree vegetation was developed. This model, based on the ecological requirements of the main taxa identified in pollen diagrams from the region, estimates the areas where each species could have had higher probabilities to develop. The results obtained allow verifying an important change in the spatial distribution of the main forest types during the Lateglacial and the early Holocene. This change in the landscape, and therefore in the distribution of the resources related to deciduous forests, might have had an influence in the changes observed in the subsistence strategies and the settlement patterns of Upper Magdalenian and Azilian hunter and gatherer communities.

La violencia en la Historia Portero Hernández, Rodrigo, Casamayor Mancisidor, Sara, 2021-08-15 La violencia ha sido considerada uno de los grandes ejes que explican el devenir de la humanidad desde los comienzos de la ciencia historiográfica. Nos repele y nos atrae, deseamos olvidarla pero no debemos dejar que caiga en el olvido, aparenta estar ligada a momentos históricos concretos pero atraviesa nuestro día a día... Quizás por estas razones la violencia, en todas sus posibles manifestaciones, lejos de ser un tema obsoleto, continúa teniendo un gran potencial como cuestión historiográfica, tal y como muestran las investigaciones que conforman este libro. De la mano de diferentes especialistas, y en un recorrido que va desde la Prehistoria hasta la Edad Contemporánea, este volumen colectivo analiza las violencias históricas desde la antropología física, la historia militar, la iconografía, o la historia de la infancia entre otros puntos de vista. Guerras, conflictos políticos y religiosos y sus significados simbólicos, o la violencia como espectáculo son algunas de las cuestiones que abordan sus páginas. Si bien existen pocos temas que hayan sido más estudiados por la historiografía que la violencia, este libro, fruto del Congreso Internacional La Violencia en la Historia, celebrado en la Universidad de Salamanca en octubre de 2019, es una muestra de que las preguntas históricas nunca se agotan y de que las violencias pasadas deben seguir siendo revisitadas desde nuevos enfoques.

Estudios etnobotánicos en Campoo (Cantabria) Manuel Pardo de Santayana, 2008 Este estudio, basado en entrevistas a más de cien informantes, describe y analiza la cultura popular de Campoo (Cantabria). El conocimiento popular de las plantas es uno de los aspectos más interesantes y desconocidos del patrimonio etnográfico. Hasta no hace muchos años las plantas del entorno cercano eran fundamentales para solucionar las necesidades vitales de la mayoría de los campurrianos. Más de 450 especies vegetales se han empleado en Campoo para estos fines y aunque se ha perdido gran parte de esta riqueza y diversidad bio-cultural, sin embargo aún siguen siendo importantes, plantas medicinales como la manzanilla, el cardo de arzilla; frutos silvestres como el endrino, las moras y los arándanos; y la madera como fuente de

calor y materia prima.

Geografía histórica de la Diócesis de Santander José Luis Zubieta Irún,2009 Trata de los precedentes históricos que enmarcan la creación de la Diócesis santanderina y la forma en que ésta se llevó a cabo a mediados del siglo XVIII. La importancia de sus fronteras radica en algo más que en un tema conflictivo de competencias, atribuciones o beneficios, es un asunto que afecta directamente a la responsabilidad moral. La Iglesia se encarna en las coordenadas del tiempo y del espacio. Como un organismo vivo, nace y se desarrolla en diversas fases y vicisitudes.

El comercio internacional castellano a través del puerto de Laredo en la época de Felipe II Óscar Lucas

Villanueva,2019-10-24 Este libro es fruto del estudio de la correspondencia que el mercader medinense Simón Ruiz mantuvo con sus agentes en Laredo, complementado con otras fuentes documentales de distinta procedencia. Todo ello nos ha permitido tomar contacto con la realidad de una pequeña villa cantábrica cuyo pulso late al ritmo que le marcan los mercados del interior de Castilla. La valiosísima información contenida en estos documentos invitará al lector a adentrarse en el mundo de los tráficos terrestres y marítimos, las manufacturas textiles y sus calidades, las compensaciones financieras, las vicisitudes bélicas y hasta los hábitos de consumo. Las dificultades inherentes al manejo de una información tan parcial, irregular y definitivamente esquiva se ven sobradamente compensadas por la riqueza de lo que nos ofrecen, hasta casi trasladarnos al bullicio de las plazas castellanas donde se negociaban las letras de cambio o participarnos lo mismo de la angustiosa espera de aquellas naos que no acaban de arribar como de la alegría incontenible cuando, por fin, las velas eran divisadas desde la atalaya de la Rochela.

Arozas y ferrones Carmen Ceballos Cuerno,2001 En esta obra se aborda el análisis de la industria tradicional del hierro en Cantabria a través del estudio de las ferrerías desde el siglo XIV hasta 1875. De la importancia que adquirieron en la región es fiel reflejo su número y volumen de producción, uno de los más importantes en el contexto peninsular, así como su relevancia en la economía familiar de los núcleos donde se asentaron.
