Ink Against the Devil Harry Loewen,2015-06-18 Sixteenth-century Reformation Europe was a tumultuous time during which many defining ideas of the modern era were formulated. The technological advancement augured by the Gutenberg press allowed the unprecedented circulation of ideas among a growing legion of literate Europeans. The writings of radical reformer Martin Luther were perhaps most influential of all. His opposition to the universal Roman Catholic Church fundamentally challenged the elites and their institutions. Along the way, Luther was opposed by the Church, the political powers of the day, and competing religious ideologies. Ink Against the Devil distills the major impulses from these debates that continue to resonate to this day. This book will appeal to both lay and professional scholars of the Reformation and its major players with prose that is accessible and free of jargon. Loewen directly addresses the debates between Luther and his many foes, including Humanists like Erasmus and the sectarian opponents found among contemporary Jews, Muslims, and Christians. Of particular interest will be a focus on anti-semitism throughout Luther's published writings and sermons. There may be no other examples of this book's scope in such a natural, narrative presentation.

Fearie Tales Stephen Jones,2014-09-23 In the grand tradition of the Brothers Jacob and Wilhelm, some of the today's finest fantasy and horror writers have created their own brand-new fairy tales--but with a decidedly darker twist. Fearie Tales is a fantastical mix of spellbinding retelling of classic stories such as Cinderella, Rapunzel, Hansel and Gretel, and Rumpelstiltskin, along with unsettling tales inspired by other children's classics, all interspersed with the original tales of their inspiration. These modern masterpieces of the macabre by Neil Gaiman, Garth Nix, Ramsey Campbell, Joanne Harris, Markus Heitz, John Ajvide Lindquist, Angela Slatter, Michael Marshall Smith, and many others, and are illustrated by Oscar-winning artist Alan Lee.

Physiognomy at the Crossroad of Magic, Science, and the Arts Massimo Ciavolella,Valeria Finucci,Megan Tomlinson,2024-09-23 The essays examine how the study of facial features or expressions as indicative of character or ethnicity, has evolved from the crossroad of magic, religion and primitive medicine to present-day cultural concern for wellness and beauty. In this context, the discoveries of cranio-facial neurophysiology and psychology and the practice of cosmetic and reconstructive surgery have a centuries-old relationship with physiognomy. As the study of outward appearances evolved from its classical roots and self-representations through 18th- and 19th-century adaptations in fiction and travelogues, it gradually became a scientific discipline. Along the way, physiognomy was associated with phrenology and craniology and promoted eugenic policies. Tainted with racial bigotry and biological determinism, it was trapped within questions of delinquency, monstrosity and posthumanism. Throughout its history, physiognomy played both positive and negative roles in the evolution of significant aspects of the socio-cultural order in the West that merit update and in-depth study. The contributions follow a chronological and intertwining sequence to encompass physiognomic expressions in art, literature, spirituality, science, philosophy and cultural studies.

The Thief, the Cross and the Wheel Mitchell B. Merback,2001-03-15 Christ's Crucifixion is one of the most recognized images in Western culture, and it has come to stand as a universal symbol of both suffering and salvation. But often overlooked is the fact that ultimately the Crucifixion is a scene of capital punishment. Mitchell Merback reconstructs the religious, legal, and historical context of the Crucifixion and of other images of public torture. The result is a fascinating account of a time when criminal justice and religion were entirely interrelated and punishment was a visual spectacle devoured by a popular audience. Merback compares the images of Christ's Crucifixion with those of the two thieves who met their fate beside Jesus. In paintings by well-known Northern European masters and provincial painters alike, Merback finds the two thieves subjected to incredible cruelty, cruelty that artists could not depict in their scenes of Christ's Crucifixion because of theological requirements. Through these representations Merback explores the ways audiences in early modern Europe understood images of physical suffering and execution. The frequently shocking works also provide a perspective from which Merback examines the live spectacle of public torture and execution and how audiences were encouraged by the Church and the State to react to the experience. Throughout, Merback traces the intricate and extraordinary connections among religious art, devotional practice, bodily pain, punishment, and judicial spectatorship. Keenly aware of the difficulties involved in discussing images of atrocious violence but determined to make them historically comprehensible, Merback has written an informed and provocative study that reveals the rituals of medieval criminal justice and the visual experiences they engendered.

Chaos and Cosmos Karen Lang,2018-08-06 Writing in 1940, the prominent German art historian Erwin Panofsky asked, How, then, is it possible to build up art history as a respectable scholarly discipline, if its objects come into being by an irrational and subjective process? In Chaos and Cosmos, Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point-history. Uncovering the intellectual and cultural richness of the early years of academic art history in Germany—the period from the 1880s to 1940—she explores various attempts within art history to transform aesthetic phenomena—chaos—into the cosmos of a systematic, unified field of inquiry.Lang starts by examining Panofsky's approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer's contemporaneous publications on the substance and function of scientific concepts (and on Einstein's theory of relativity). She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history. From here, Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer, as well as Goethe's inspiration for both; Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura; concluding with an extended examination of objectivity and the figure of the art connoisseur.Extensively illustrated with works of art from the Enlightenment to the present day, this venturesome book illuminates an intellectual legacy that has profoundly shaped the

study of the history of art in ways that have, until now, been largely unacknowledged. Addressing the interplay of chaos and cosmos in terms of history, art history, philosophy, and epistemology, Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects, and even objects of knowledge.

The Pataphysician's Library Ben Fisher,2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature, with specific reference to the traditions of Symbolism and Decadence. Its main focus is Alfred Jarry, who has proved, perhaps surprisingly, to be one of the more durable fin-de-siècle authors. The originality of this study lies in its use of the enigmatic list of books termed the livres pairs, which appears in Jarry's 1898 novel Gestes et Opinions du docteur Faustroll, pataphysicien, his best-known prose work. The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries, primarily Leon Bloy, Georges Darien, Gustave Kahn, Catulle Mendes, Josephin Madan, Rachilde, and Henri de Regnier. Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris. In conjunction with Jarry's own works, the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked.
