Taming Regulation Robert T. Nakamura, Thomas W. Church, 2003-10-27 Despite three decades of vigorous efforts at deregulation across the government, regulation remains ubiquitous. It also continues to be unpopular because it forces individuals and businesses to do things—frequently costly and unpleasant things—that they don't want to do. If regulatory programs are to survive and remain effective, the challenge posed by their endemic unpopularity and political vulnerability must be met. Unlike much of the existing literature on regulation, Taming Regulation begins with the assumption that the government's capacity to utilize regulation as a policy tool is vital. The book examines the questions of how to make the inherently coercive aspects of regulation more politically acceptable in the present antiregulatory environment and how the legal and administrative challenges of reform in ongoing regulatory programs might best be approached. The authors explore

these issues through a case study of administrative reform in the Superfund program. Chartered with an ambitious mission to clean up the nation's hazardous waste sites, Superfund was from its inception a uniquely aggressive and unpopular program. Yet despite the election in 1994 of a Republican Congress committed to fundamental changes in environmental regulation, the Superfund program weathered the storm and remains intact today. The authors credit this political and programmatic success to a series of artfully designed and orchestrated internal reforms that softened Superfund's implementation, thus increasing its political support while retaining its potent coercive tools. *Taming Regulation* provides a cautionary discussion of both the necessity and the difficulty of regulatory reform. It is essential reading for students of regulation and environmental policy, for practitioners contemplating reform of ongoing regulatory programs, and for those interested in the checkered history of Superfund.

Neuroscience and Legal Responsibility Nicole A Vincent, 2013-03-07 Adopting a broadly compatibilist approach, this volume's authors argue that the behavioral and mind sciences do not threaten the moral foundations of legal responsibility. Rather, these sciences provide fresh insight into human agency and updated criteria as well as powerful diagnostic and intervention tools for assessing and altering minds.

The Future of Punishment Thomas Nadelhoffer, 2013-04-25 The twelve essays in this volume aim at providing philosophers, neuroscientists, psychologists, and legal theorists with an opportunity to examine the cluster of related issues that will need to be addressed as scholars struggle to come to grips with the picture of human agency being pieced together by researchers in the biosciences.

The Trouble with Principle Stanley Fish, 2001-03-02 Stanley Fish is an equal opportunity antagonist. A theorist who has taken on theorists, an academician who has riled the academy, a legal scholar and political pundit who has ruffled feathers left and right, Fish here turns with customary gusto to the trouble with principle. Specifically, Fish has a quarrel with neutral principles. The trouble? They operate by sacrificing everything people care about to their own purity. And they are deployed with equal highmindedness and equally absurd results by liberals and conservatives alike. In this bracing book, Fish argues that there is no realm of higher order impartiality--no neutral or fair territory on which to stake a claim--and that those who invoke one are always making a rhetorical and political gesture. In the end, it is history and context, the very substance against which a purportedly abstract principle defines itself, that determines a principle's content and power. In the course of making this argument, Fish takes up questions about academic freedom and hate speech, affirmative action and multiculturalism, the boundaries between church and state, and much more. Sparing no one, he shows how our notions of intellectual and religious liberty--cherished by those at both ends of the political spectrum--are artifacts of the very partisan politics they supposedly transcend. *The Trouble with Principle* offers a provocative challenge to the debates of our day that no intellectually honest citizen can afford to ignore.

Strategic Justice Peter Vanderschraaf,2019 The author defends the ancient claim that justice is at bottom a body of social conventions. Recent analytical and empirical concepts and results from the social sciences together with insights and arguments of past masters of moral and political philosophy are integrated into a new game-theoretic conventionalist analysis of justice.

The Explorer Race Books I & II Robert Shapiro,2013-09-01 While the original print editions of The Explorer Race and ETs and the Explorer Race were arranged according to subject, this digital edition combines and rearranges the channeled material into chronological order to enhance the energetic flow and readability for our readers. The descriptions below are the original About texts for the two books. The Explorer Race [Book #1] You individuals reading this are truly a result of the genetic experiment on Earth. You are beings who uphold the principles of the Explorer Race. The information in this book is designed to show you who you are and give you an evolutionary understanding of your past that will help you now. The key to empowerment in these days is not to know everything about your past, but to know that which will help you now. Your souls have been here for a while on Earth and have been trained in Earthlike conditions. This education has been designed so that you would have the ability to explore all levels of responsibility — results, effects and consequences — and take on more responsibilities. Your number-one function right now is your status of Creator apprentice, which you have achieved through years and lifetimes of sweat. You are constantly being given responsibilities by the Creator that would normally be things that Creator would do. The responsibility and the destiny of the Explorer Race is not only to explore, but to create. — Zoosh ETs and the Explorer Race [Book #2] In ETs and the Explorer Race, Robert Shapiro channels Joopah, a Zeta Reticulan now in the ninth dimension, who continues the story of the great experiment — the Explorer Race — from the perspective of his race. The Zeta would have been humanity's future selves had not humanity re-created the past and changed the future. Fascinating information on: • The true nature of the Zetas • Abduction and contacts • Who the different Grays are • The three Zeta-human hybrid races • How the hybrids will interact with Earth • Our extraterrestrial chromosomes

The Long Arc of Justice Richard Mohr,Richard D. Mohr,2007-05 Richard D. Mohr adopts a humanistic and philosophical approach to assessing public policy issues affecting homosexuals. His nuanced case for legal and social acceptance applies widely held ethical principles to various issues, including same-sex marriage, AIDS, and gays in the military. Mohr examines the nature of prejudices and other cultural forces that work against lesbian and gay causes and considers the role that sexuality plays in national rituals. In his support of same-sex marriage, Mohr defines matrimony as the development and maintenance of intimacy through which people meet their basic needs and carry out their everyday living, and he contends that this definition applies equally to homosexual and heterosexual couples. By drawing on culturally, legally, and ethically based arguments, Mohr moves away from tired political rhetoric and reveals the important ways in which the struggle for gay rights and acceptance relates to mainstream American society, history, and political life.
