Faith Lost: Faith Regained James Atkinson,2019-05-21 A holistic, positive answer to modernist and post-modernist challenges to Christian faith. Recent trends in theology have adapted to what has been assumed to be universally valid scientific thinking, thereby contributing to the erosion of traditional protestant belief. Pointing to parable as a tool of understanding and appealing to aesthetic appreciation as an analogy, the author makes an impassioned call for a return to an assured biblical faith. The answer lies in a fuller epistemology and a profounder ontology to explain the universe and man's place in it.

Keeping Faith, Losing Faith Bradley W. Bateman,H. Spencer Banzhaf,2008 Keeping Faith, Losing Faith: Religious Belief and Political Economy considers the historical and current relationship between religious and economic schools of thought. The volume explores the integration of theology and economics that was prevalent before the twentieth century, the rise of secular neoclassical economic models in the middle of that century, and the recent trend toward examining economic behavior through the prism of religious belief. Two of the essays examine the antagonism between Christianity and utilitarianism in postrevolutionary French economics and the rising influence of the materialism of the market vis-à-vis the declining authority of the Roman Catholic Church in eighteenth-century Europe. Other topics explored include the work of the great American neoclassicist Frank Knight, the combination of utility analysis and Christian principles among the clerical economists in America, and the effect of a crisis of personal faith on the theories of the English philosopher and economist Henry Sidgwick.

Religion: the Failed Narrative Richard C. Johnson,2011-01-13 God emerges like a hologram in our consciousness and is falsely presented as the champion who will save us from death. Science, with its focused methodology, tells the true story. God is the main character in religion, but he is a figment of the imagination. Humans experience consciousness like amnesia

victims: We don't know where we came from or why we are here, and we fantasize that we keep on living after our bodies physically die. Thus humanity turns to religion, a powerful source of consolation and comfort. Science, however, offers some more concrete answers. Author Richard C. Johnson argues that God emerges as an adjunct of human consciousness, where he is conjured up in response to the isolation engendered by self-awareness. Huge conflict results, Johnson explains, because claims about God are made from doctrine rather than observation. The result of these conflicts has consistently been war. In an age of nuclear weapons and terrorism, religious conflict must be deconstructed by honest discussion. Johnson explores this seemingly impossible task and proposes methods by which it can be accomplished. In *Religion: The Failed Narrative*, Johnson convinces us that irrational religion cannot guide us and that only rational science has proven to be a capable leader.

In God American Fathers Trusted Dipo Toby Alakija ,2019-04-18 Through absolute trust in God that characterized the early American leadership as virtuous and courageous, the founding fathers were able to secure independence from the British and build the United States into a vibrant nation. The teachings of the Bible so much influenced the leadership that John Adams, the 2nd President said, "we recognize no sovereign but God, and no King as Jesus!" Barely a century later, however, civil war broke out after an attempt was made to assassinate Andrew Jackson, the 7th President during the Bank War. Other US Presidents like Abraham Lincoln (the 16th President) and John F. Kennedy (35th President) were not lucky enough to escape assassinations. Thomas Jefferson, the 3rd President said, "Educate and inform the whole mass of people. Enable them to see that it is in their best interest to preserve peace and order, and they will preserve them". This book is an attempt of the author to help American citizens create peaceful instead of hostile environments through the studies and analyses of the quotes of the founding fathers, which are related to issues of Politics, Religions, Economies, Educations, American Values and Social Welfare.

Finding Yourself in Chaos James R. Newby, Mark Minear, 2022-08-23 The blessings and burdens that come with a life in ministry and religious leadership present complex situations and personal struggles that left unaddressed can lead to burn out and a loss of vocational conviction. A minister's spiritual and mental wellbeing is an essential part of them being an effective servant of God, so it's important that they be supported and equipped to handle the chaos that modern life brings. Recognizing and embracing the transitional pain of life events like divorce, retirement, the death of family member, authors James R. Newby and Mark Minear guide readers through a plan of action focused on self-discovery and renewal of spirit. This book speaks to ministers in local churches who are questioning themselves, in transition, and are experiencing chaos, and who still want to be effective ministers. It is also for congregational leaders and denominational leaders who would like to understand both the perils and possibilities of the chaos some of the religious leaders under their care and jurisdiction are experiencing.

The End of Religion Kathleen McPhillips, Naomi Goldenberg, 2020-10-22 Feminist theory has enhanced and expanded the

agency, influence, status and contributions of women throughout the globe. However, feminist critical analysis has not yet examined how the assumption that religion is natural, timeless, universal and omnipresent supports sexist and race-based oppression. This book proposes radical new thinking about religion in order to better comprehend and confront the systematic disempowerment of women and marginalized groups. Utilising feminist and post-colonial analysis of access, equity and violence, contributors draw on recent critical theory to collapse accepted boundaries between religion and secularity with the aim of understanding that religion is a technology of governance in its function, meaning and history. The volume includes case studies focusing on how the category of religion is deployed to perpetuate male hegemony and racist inequities in Australia, Mexico, the United States, Britain and Canada. This trenchant feminist critique and academic analysis will be of key interest to scholars and students of Religion, Sociology, Political Science and Gender Studies.

The Indwelling James Cardona, 2006-01-02 Salvation is a process. A new believer is not born again into a perfect state of being. Once a person accepts salvation and the saving blood of Jesus Christ, they are only taking the first step on a long journey. The walk with God is a walk of change and development. The walk with God is a walk toward perfection as believers

Using direct references from the Bible and true personal stories, this book provides the necessary knowledge to receive the Baptism of the Holy Spirit and maintain a Filling of the Holy Spirit. Read this book to find out how! God will only take you as high as you are willing to go. It is up to you. This book shows you the differences between these different steps or levels and the benefits of attaining a higher level. The Politics of Sorrow Daniel D. Martin, 2016-02-24 Drawing on several years of research with grief support organizations and the families and friends of murdered children, this book examines the emotional experience of families in the aftermath of a homicide. It examines the politics of sorrow, offering a comparative analysis of White and African-American families as they navigate the experience of homicide, shedding light on the ways in which the class location or ethnicity of mourners affects their experience. Analyzing the manner in which police and other authorities differentially extend emotional support to bereaved families, notify them of a homicide, or assign blame, *The Politics of Sorrow* reveals how 'disenfranchised grief' comes to be an institutionalized outcome of their practice. The book further examines the effects of 'announcement shock' and the importance to the family of the moral career of the deceased, as they seek to manage his or her identity, often dealing with their grief through an active pursuit of justice in court, or through political involvement with a grief support organization, which mobilizes families in pursuit of its political ends. A rigorous study of stigma, identity, and stratified experiences of grief, *The Politics of Sorrow* will appeal to sociologists interested in interactionist methods, race, class, and emotion.

God Now C. Fred Alford, 2019-11-07 In these short, accessible essays, Alford writes about the personal "Why I Pray," as well as the political "Simone Weil and Donald Trump." He makes some difficult theologians, such as Karl Barth and Søren Kierkegaard, accessible, while not hesitating to criticize them. Alford argues the genius of Christianity is in God making himself vulnerable so as to know what it is to be human; otherwise, God stands at a terrible distance from humanity. From this perspective, Christianity is about the teachings of Christ, and God's willingness to suffer. The resurrection, so central to most Christians, becomes less important. Myriad religious thinkers are considered, including Albert Camus, Thomas Merton, Reinhold Niebuhr, Rudolf Bultmann, and Paul Tillich, among others, including Simone Weil. Also addressed is the relationship between religion and psychology, as well as the status of natural law. Notable is the author's attitude, which combines respect for great thinkers and a willingness to call them out as wrong, confused, or misguided. Unafraid of atheism, Alford thinks many of the so-called new atheists judge religion as though it were a science, a confusion of categories. Once a philosopher of science, he knows the scope and limits of scientific explanation better than most.

Practices of Belief: Volume 2, Selected Essays Nicholas Wolterstorff, 2010-02-11 This volume brings together Nicholas Wolterstorff's essays on epistemology written between 1983 and 2008.

A Tale of Two Eagles Craig A. Deare, 2017-03-13 The United States and Mexico share a history shaped in the 19th century by numerous US forces interventions into Mexican territory and US expropriation of considerable swaths of Mexican territory. However, in spite of structural impediments and a history of resentment by Mexico of US intervention into its affairs and territory, the levels of cooperation and understanding slowly began to improve following a series of international and domestic factors. The decline of the former Soviet Union and the fall of the Berlin Wall at a global level, coupled with major political and economic challenges and reforms within Mexico are a starting point from which to assess the evolution of the bilateral defense relationship between the United States and Mexico. The American and Mexican militaries have evolved differently over the past 100 years and they each have very different responsibilities, mission sets, orientations, and capabilities. Yet in recent years, the Mexican armed forces have cooperated more closely with their US counterparts. This may be due to explicit direction coming from senior levels of the Mexican government and to operational requirements of the armed forces themselves as they seek to increase their capability and capacity to confront the growing levels in drug trafficking related violence. Today, both countries are dealing with the effects of this increased violence and insecurity in Mexico. Relying primarily on one-on-one interviews with senior practitioners and analysts on both sides of the border, the text examines the evolution of the U.S.-Mexican bilateral defense relationship to better understand how and why this unique relationship has improved, in fits and starts, over the past 25 years. It offers a new understanding of how defense policymakers from each respective country perceive the other, as well as how the lack of trust and understanding between the two neighbors has delayed greater cooperation.

Affirmative Counseling with LGBTQI+ People Misty M. Ginicola, Cheri Smith, Joel M. Filmore, 2017-02-08 This current and comprehensive handbook will guide educators, students, and clinicians in developing the awareness, knowledge, and skills necessary to work effectively with LGBTQI+ populations. To further a deeper understanding of the content, each chapter contains an Awareness of Attitudes and Beliefs Self-Check, a case narrative relating to the material covered, questions for discussion, and a list of online resources. A Divided Poet David Sanders, 2011 Frost's breakthrough book of poetry seen anew as an artistic whole and in the context of the poet's career and development. North of Boston, Robert Frost's second book of verse and arguably his greatest, brought him suddenly into national prominence in 1915. Though completed and first published in England in 1914, the book was rooted in the decade, 1900-1910, that Frost spent in Derry, New Hampshire, where he witnessed the decline of its traditional farming culture. In presenting this drama of disappearance, twelve of the book's fifteen principal poems are literally dramatic, composed mainly of direct dialogue. Among them are three of Frost's most famous lyrics, each featuring a signature task of New England life and underlining the book's tribute to a fading culture. Collectively, the poems bring the diction and tones of a New England vernacular within a traditional metric frame, making music, as Frost boasted, from the sound of sense and poetry of a language absolutely unliterary. Such adaptations of ordinary language and experience to blank verse drama made Frost a founder of American modernism and North of Boston one of its monuments. Exploring Frost's complex connection to his poetic characters, this study provides new readings of the individual poems and a new look at North of Boston's development. To a degree no other study has done, it addresses the book's design as an artistic whole while placing it in the context of Frost's unfolding career. David Sanders is Professor Emeritus of English at St. John Fisher

College, Rochester, New York.

The Rise and Fall of the Oil Nation Venezuela Carlos A. Rossi, 2023-12-28 This book explains why Venezuela is so rich in natural resources—it has been producing oil since 1922 and harbors the largest oil reserves in the world—and yet it is also a failed nation of class-divided citizens exhibiting deep poverty in a corrupt, incompetent state. Venezuela is a bipolar nation, where two marked poles in the society exist which have historical origins and are mutually exclusive. The book provides a critical analysis of Venezuela's history, economy and politics and explains the context and implications of the bipolar poles, known as the elite pole and the resentful pole. Both, it shows, have done serious harm to Venezuela's prosperity. The author describes the vicious circle of oil wealth, corruption, inefficiency and world market dependency and gives recommendations for a better future.
