The Principles of Leather Manufacture H. R. Procter, 2022-09-04 In *The Principles of Leather Manufacture*, H. R. Procter meticulously examines the intricate processes and scientific principles behind leather production. Through a comprehensive exploration of tanning methods, material properties, and the environmental implications of leather manufacturing, Procter employs a rigorous and systematic literary style that reflects both a scholarly focus and practical applications. Written in the context of the burgeoning industrial age, the book serves as an essential resource for understanding the evolving technologies and practices that have shaped the leather industry. H. R. Procter was an esteemed chemist and leather technologist whose background in science and industry uniquely positioned him to address the challenges and innovations in leather manufacture. His extensive experience in the field, coupled with a passion for sustainable practices, likely inspired his commitment to creating a text that not only educates but also advocates for responsible manufacturing processes. Procter's expertise and perspective are evident throughout the work, providing readers with a nuanced understanding of the material culture of leather. I highly recommend *The Principles of Leather Manufacture* to scholars, practitioners, and students alike who seek a thorough and thoughtful exploration of leather production. This book is invaluable for anyone interested in the intersection of chemistry, craftsmanship, and sustainability within the leather industry, as it lays a solid foundation for both historical appreciation and contemporary practice.

Despite the inadequacies of fleeting, defective evidence, a rough picture emerges of both the permanent headquarters and the principal features of provincial cults.

The Room at the End of the Hall Bette Ann Moskowitz, 2013-02-11 In this first person narrative, Bette Ann Moskowitz tells what it is like to be a volunteer long-term care ombudsman, and how, with thirty-six hours of training, she entered the unfamiliar world of a nursing home to advocate for its almost-three hundred residents. She brings the reader along as she learns the ropes, makes mistakes and meets tragic and beautiful people struggling for their lives. When she becomes

assistant coordinator of the program, she gets an even broader view of institutional life, advocacy, and old age. Problems are big and small: a man discharged for having a sexual relationship with a fellow resident; residents not getting evening snacks; an intelligent resident with mental health problems fighting to be a partner in her own care. Author of DO I KNOW YOU? A Family's Journey Through Aging and Alzheimer's, Moskowitz says advocating for the old and disabled in long-term care can be a transgressive act. We often oppose the authorities by standing up for the one with two different shoes against the Suits. Sometimes we don't know enough. We have access, but little power. Yet, an ombudsman may be the only thing standing between the resident and disaster. In addition to shedding light on this unheralded and important volunteer health care worker, THE ROOM AT THE END OF THE HALL raises questions about how America and Americans go about the business of old age, and how old age itself is changing as the baby boomer generation enters it.
