Current Research on Language Learning and Teaching Azamat Akbarov, 2016-05-11 This volume represents the first collection of essays on research dedicated to the work of scholars and experts from Bosnia and Herzegovina. It provides programmatic state-of-the-art overviews of current issues in the language sciences and their applications in first, second, and bilingual language acquisition in naturalistic and tutored contexts, and brings together disciplinary perspectives from linguistics, sociolinguistics, language teaching, education and intercultural communication. This book will be of particular interest to anyone wishing to know the value, and the pitfalls, of current research, to understand its various applications for foreign language education in Bosnia and Herzegovina, and to appreciate the qualities of rigor and trustworthiness required to evaluate and interpret current studies in Bosnia and Herzegovina. Indeed, this volume provides an informed perspective on the field's developments and an insightful analysis of interdisciplinary studies in the country.

Grammar in ELT and ELT Materials Graham Burton, 2023-06-06 This book investigates the content of the grammar syllabus typically employed in mainstream English Language Teaching. Using a mixed-methods approach, the author examines how the syllabuses used in coursebooks are actually constructed, how they evolved and how valid their contents are as a basis for teaching. The research reported consists of a broad exploration of primary sources in order to outline the evolution of ELT pedagogical grammar; ten interviews with key ELT authors and publishing professionals, which allows for the investigation of the decision-making processes underlying the choice of grammar content in ELT teaching materials; and finally, the presentation of case studies which examine three areas of grammar, analysing the evolution of their treatment in ELT materials (both historical and contemporary) and comparing their current treatment to data on real learner use. This book contributes to the literature on syllabus design and pedagogical grammar and builds on existing research into materials

design. It will be of interest to researchers and professionals working in the fields of applied linguistics, pedagogical grammar, curriculum design and materials design.

Paradigms in Word Formation Alba E. Ruz, Cristina Fernández-Alcaina, Cristina Lara-Clares, 2022-09-15 The focus of *Paradigms in Word Formation: Theory and applications* is on the relevance of paradigms for linguistic description. Paradigmatic organization has traditionally been considered an inherent feature of inflectional morphology, but research in the last decades clearly shows the existence of paradigms in word formation, especially in affixal derivation, often at the expense of other word-formation processes. This volume seeks to address the role that paradigms may play in the description of compounding, conversion and participles. This volume should be of interest to anyone specialized in the field of English morphology and word formation.
