Freight Forwarding and Multi Modal Transport Contracts David Glass,2013-07-18 Freight Forwarding and Multimodal Transport Contracts, 2nd Edition, is a comprehensive guide to the law in relation to contract forms and terms created by operators, trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders, logistics suppliers, combined or multimodal transport operators and container operators. This second edition examines the latest editions of contract forms and terms, both where their object is the supply or procurement of multimodal carriage, as well as where they are directed to the use of combined transport equipment (ie containers, swap bodies). Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding, logistics, intermodal and container operators such as the British International Freight Association (BIFA) conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them, eg Road Haulage Association Conditions 2009, Maersk Conditions of Carriage, TT Club Conditions.

*Maritime Law and Practice in China* Liang Zhao,Li Lianjun,2017-01-20 A comprehensive treatment of Chinese maritime law and judicial practice, this book covers both substantive law and procedure law of maritime law in mainland China. This is a professional book for both academics and practitioners in the field of maritime law. Including analysis of and comment on judicial practice from the Supreme People's Court, Higher People's Courts and ten maritime courts, as well as a whitepaper of Chinese maritime adjudication for 30 years (1984-2014), this brings to an English-speaking audience for the first time some of the most technical aspects of maritime law. It is therefore an invaluable resource for all those interested in maritime law in China.

Agriculture Decisions United States. Department of Agriculture,2003 Up to 1988, the December issue contained a cumulative list of decisions reported for the year, by act, docket numbers arranged in consecutive order, and cumulative subject-index, by act.

**General average, legal basis and applicable law** Jolien Kruit,2017-02-16 General average is considered to be one of the most uniformly regulated topics of maritime law. This study concludes that this perception is flawed. The invariably

applicable York-Antwerp Rules do not provide a full regime, whereas their applicability is generally contractual only. As a result, questions arise as to which law applies to general average obligations, how the applicable national law is to be determined (taking into consideration the impact of the European Rome I and II Regulations), and what is provided in the national regimes. In addition, questions arise as to what the influence is of contractual provisions set out in contracts for the carriage of goods by sea and general average security forms, and how the various sources interact. This study contains an in depth assessment of these questions.

*The Law of Carriage of Goods by Sea* Arun Kasi,2021-09-01 This book, written in three parts, covers the basics of the international trade, financing and the legal framework related to the law of carriage of goods by sea, elaborates on bills of lading in depth and sea waybills and ship's delivery orders in brief and charterparties in depth. While the book is based on the English law, cases and materials from other jurisdictions, particularly Singapore, Malaysia, India, the USA, and Australia are brought in to provide an international perspective. The practical analyses, commentary and critiques of cases would be a useful guide for practitioners in developing case arguments. Although written with practitioners, academicians and students in mind, the book will also serve as a useful guide for sea carriers, freight forwarders, international traders, financiers, etc. as the complex subject is presented in reader-friendly and easy to grasp manner.

*Selected Cases from the Supreme People's Court of the People's Republic of China* China Institute of Applied Jurisprudence,2024-01-16 This book includes focal and vital cases tried by presiding justices, guiding cases from the Supreme People's Court, and cases discussed at the Joint Meetings of Presiding Judges from various tribunals. This book is divided into three sections, including Cases by Justices, Guiding Cases, and Typical Cases, which will introduce readers to Chinese legal processes, legal methodology, and ideology in an intuitive, clear, and accurate manner. This book presents cases selected by the trial departments of the Supreme People's Court of China from their concluded cases. In order to give full weight to the legal value and social function of cases from the Supreme People's Court, and to achieve the goal of "serving the trial practices, serving economic and social development, serving legal education and legal scholarship, serving legal exchanges among Chinese and foreign legal communities, and serving the rule of law in China", the China AppliedJurisprudence Institute, with the approval of the Supreme People's Court, opts to publish Selected Cases from the Supreme People's Court of the People's Republic of China in both Chinese and English, for domestic and overseas distribution.

*Allocation of Liability for Dangerous Goods under International Trade Law* Ahmet Gelgeç, 2022-12-29 This book explores the allocation of risk and liability of dangerous goods between the seller and the buyer under CIF (Cost, Insurance and Freight) and FOB (Free on Board) contracts, providing an in-depth study of the issue of carriage of dangerous goods in the context of international trade law. In addition to offering specific solutions to issues arising in the context of the contract of sale, the book provides a non-contractual angle, putting forward suggestions under non-contractual mechanisms. Importantly, the book incorporates case law examples from the Commonwealth and the US. Dangerous goods that are carried by sea can cause potential risks of losses and damages to the vessel, other cargoes and lives on board. The allocation of liability arising out of the carriage of dangerous goods has recently attracted unwelcome attention because of mis-declared cargoes leading to fires on board ships. Thus the book fills a gap in the literature by addressing the issue in detail with examples from multiple jurisdictions, and proposing solutions. In particular, the book analyses whether and to what extent the law of international sale of goods can provide any assistance in the re-allocation of liability between the buyer and the seller. This book will be of great interest to all those involved in the research as well as legal practice of international trade law and the law of carriage of goods by sea.
