Goodman y Gilman :las bases farmacológicas de la terapéutica Alfred Goodman Gilman, Louis Sanford Goodman, 1981

El emperador de todos los males Siddhartha Mukherjee, 2014-06-19 En 2010, siete millones de personas murieron de cáncer en todo el mundo. Con esta fría estadística Siddhartha Mukherjee, médico e investigador oncológico, arranca su amplia y absorbente «biografía», ganadora del Premio Pulitzer, de una de las enfermedades más extendidas de nuestro tiempo. El emperador de todos los males es una crónica completa del cáncer desde sus orígenes hasta los modernos

tratamientos (quimioterapia de diversos tipos, radioterapia y cirugía, además de la prevención) que han surgido gracias a un siglo de investigación, ensayos y pequeños avances trascendentales en muchos lugares distintos. Este libro es un repaso a la ciencia del cáncer y a la historia de los tratamientos que le han hecho frente, pero también es una reflexión sobre la enfermedad, la ética médica y las complejas y entrelazadas vidas de los oncólogos y sus pacientes. La empatía que muestra Mukherjee hacia los enfermos de cáncer y sus familias, así como hacia los médicos que muy a menudo tan pocas esperanzas les pueden ofrecer, hacen de este libro una historia llena de humanidad de una enfermedad compleja e inasible. Reseñas: «Esta obra debería valer a Mukherjee un merecido lugar en el panteón de los grandes divulgadores de nuestra era, junto a Carl Sagan, Stephen Jay Gould y Stephen Hawking.» The Boston Globe «Una magistral historia de la investigación sobre el cáncer.» Publishers Weekly

La Esencia De La Salud Y La Fe Manuel Francisco Lopez Melgar, 2013-07-26 La Verdad es tan simple y humilde, que al ser humano con falta de sencillez, se le hace difícil creerla; debido a la compleja información de las mentiras generadas por la mente humana llena de orgullo y envidia.

Drogas y drogadicción ,2001 ¿Qué conocemos del fenómeno de las drogas y la drogadicción?, ¿Distinguimos entre drogas legales e ilegales?, ¿Sabemos diferenciar entre consumo y adicción?, ¿Cuáles son los factores de riesgo en el consumo de drogas?, ¿En qué consiste o ha de consistir la prevención?, ¿Qué papel juegan los medios de comunicación en la imagen social de las drogas?,Seguramente las drogas, sus consumos y las vivencias asociadas a éstos, no son realidades estrictamente objetivas. Esto quiere decir que los análisis que de ello se realizan, van modificándose con el paso del tiempo, en función de la evolución de los contextos y de las realidades sociales es evidente que las sustancias y los consumos suscitan una valoración que, en numerosas ocasiones, por muy sorprendente que nos parezca, puede llegar a ser independiente de la gravedad de sus repercusiones físicas y sociales.Estos hechos tienen enorme importancia y están en la base de las actuaciones que sobre el fenómeno de la drogadicción se vienen realizando.Reflexionar en torno a la interrelación entre droga, sujeto y contexto es el objetivo central del contenido de este libro, que recoge los conocimientos y experiencias de distintos especialistas, profesionales y profesores universitarios en torno a la relación entre las drogas y violencia juvenil; los medios de comunicación y las representacionessociales sobre drogas; el papel de las relaciones familiares como factor preventivo; las relaciones entre consumo de drogas y sida; la relación entre drogas, prostitución, delincuencia y cárceles; así como la descripción de distintos programas de prevención de drogodependencias que se están desarrollando en la actualidad en la FAD y una visión del fenómeno de las drogas y la drogadicción en Castilla-La Mancha.

Neutrosophic Sets and Systems, vol. 52/2022 Florentin Smarandache,Mohamed Abdel-Basset,Maikel Leyva Vazquez,Said Broumi,2022-11-01 “Neutrosophic Sets and Systems” has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc. Neutrosophy is a new branch of philosophy that studies the origin, nature, and scope of neutralities, as well as their interactions with different ideational spectra. This theory considers every notion or idea together with its opposite or negation and with their spectrum of neutralities in between them (i.e. notions or ideas supporting neither nor). The and ideas together are referred to as . Neutrosophy is a generalization of Hegel's dialectics (the last one is based on and only). According to this theory every idea tends to be neutralized and balanced by and ideas - as a state of equilibrium. In a classical way , , are disjoint two by two. But, since in many cases the borders between notions are vague, imprecise, Sorites, it is possible that , , (and of course) have common parts two by two, or even all three of them as well. Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic (especially of intuitionistic fuzzy set and respectively intuitionistic

fuzzy logic).

Del cáncer y sus demonios Ernesto Gil Deza, 2019-02-22 ¿Qué es el cáncer? ¿Siempre se necesita una biopsia? ¿Porqué se comporta de esa manera? ¿Es posible imaginar en un futuro una humanidad libre de cáncer? ¿Tengo cáncer porque hice algo mal? ¿El tumor puede tener un origen psicológico? ¿Como sé si el tumor está diseminado? ¿Qué nuevos tratamientos existen? ¿Siempre se usa quimioterapia? ¿El tumor puede volver a aparecer? ¿Se le puede decir a un paciente la verdad? ¿Le interesa a los pacientes conocer el pronóstico? ¿Es razonable participar en estudios de investigación? ¿Sirven los tratamientos alternativos? ¿El apoyo psicológico es útil? ¿Qué son los cuidados paliativos? ¿Como sobrevivir al cáncer? ¿Se puede volver a creer, a esperar, a confiar? En la tradición de los mejores libros de divulgación científica aplicados a la medicina, el doctor Gil Deza nos deja asombrados y emocionados con un recorrido fascinante por la relación entre los pacientes y el cáncer. Igual que Oliver Sacks o Henry Marsh, Gil Deza nos enseña que es posible escribir con elegancia y erudición sobre padecimientos, enfermos y recuperaciones, sin golpes bajos ni concesiones infantiles. No es este un libro de autoayuda ni explora terrenos sensacionalistas; es un libro con historias de pacientes y de médicos, de miedos y desafíos, de sanación y de victorias, de luchas y de esperanza. Gil Deza cree, y nos enseña, que hay un modo de contar y describir el enfrentamiento con el cáncer donde se juega gran parte de los que nos define como seres humanos: la empatía y el amor como herramientas indispensables para aplicar los conocimientos científicos.
