MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation P. Otero, P. Scott, S.Z. Martin, 2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

MEDINFO 2015: EHealth-enabled Health I.N. Sarkar, A. Georgiou, P. Mazzoncini de Azevedo Marques, 2015-08-12 Health and Biomedical Informatics is a rapidly evolving multidisciplinary field; one in which new developments may prove crucial in meeting the challenge of providing cost-effective, patient-centered healthcare worldwide. This book presents the proceedings of MEDINFO 2015, held in São Paulo, Brazil, in August 2015. The theme of this conference is ‘eHealth-enabled Health’, and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications, integration and evaluation of eHealth systems and solutions. Included here are 178 full papers and 248 poster abstracts, selected after a rigorous review process from nearly 800 submissions by 2,500 authors from 59 countries. The conference brings together researchers, clinicians, technologists and managers from all over the world to share their experiences on the use of information methods, systems and technologies to promote patient-centered care,

improving patient safety, enhancing care outcomes, facilitating translational research and enabling precision medicine, as well as advancing education and skills in Health and Biomedical Informatics. This comprehensive overview of Health and Biomedical Informatics will be of interest to all those involved in designing, commissioning and providing healthcare, wherever they may be.

Digital Personalized Health and Medicine L.B. Pape-Haugaard, C. Lovis, I. Cort Madsen, 2020-06-17 Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.

MEDINFO 2019: Health and Wellbeing e-Networks for All L. Ohno-Machado, B. Séroussi, 2019-11-12 Combining and integrating cross-institutional data remains a challenge for both researchers and those involved in patient care. Patient-generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics, held in Lyon, France, from 25 to 30 August 2019. The theme of this year's conference was 'Health and Wellbeing: E-Networks for All', stressing the increasing importance of networks in healthcare on the one hand, and the patient-centered perspective on the other. Over 1100 manuscripts were submitted to the conference and, after a thorough review process by at least three reviewers and assessment by a scientific program committee member, 285 papers and 296 posters were accepted, together with 47 podium abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data, supporting care delivery, enabling precision medicine and public health, and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state-of-the-art informatics projects from

multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.

Broadband Policies for Latin America and the Caribbean A Digital Economy Toolkit OECD, Inter-American Development Bank, 2016-06-22 This joint initiative by the Inter-American Development Bank (IDB) and the OECD seeks to encourage the expansion of broadband networks and services in the region, supporting a coherent and cross-sectorial approach, to maximise their benefits for economic and social development.

Transformación digital Débora Slotnisky, 2016-10-20 Con un lenguaje ameno, en base a datos actuales, entrevistas en profundidad y casos de estudio de firmas muy conocidas, la periodista especializada en Tecnología Débora Slotnisky invita a los lectores a reflexionar acerca de la transformación digital. Todos estamos siendo impactados por esta revolución, porque nuestros hábitos cotidianos se concretan cada vez más a través de medios digitales, y lo mismo sucede en los puestos de trabajo: el nuevo escenario impone la realización de nuevas prácticas laborales que, por supuesto, implican contar con conocimientos acordes al nuevo contexto. Así es como las organizaciones de todos los tamaños necesitan replantear sus estrategias y priorizar ciertos cambios para estar en sintonía con los tiempos que corren. Transformación Digital: cómo las personas y las empresas deben adaptarse a esta revolución es un libro que propone una lectura rápida debido a su lenguaje llano. Sin embargo, la obra obliga a repensar la actualidad y los nuevos escenarios organizacionales que se esperan para el corto plazo, con el objetivo de que CEOs, directores, ejecutivos y profesionales encaren con éxito esta nueva realidad. De la misma manera, ofrece un panorama excepcional para que los jóvenes replanteen sus habilidades para ser competitivos en base a los conocimientos requeridos por el mundo laboral. Adicionalmente presenta herramientas y consejos para que los interesados se sumen rápidamente a este proceso, que es, para muchos, la nueva revolución industrial.

Enfoques y herramientas para el gobierno de la salud Arnaldo Medina, Patricio Narodowski, 2019-08-26 Enfoques y herramientas para el gobierno de la salud resume una inmensa cantidad de investigaciones y estudios comparados de diez países, con desarrollo y aplicación de herramientas de análisis y diagnóstico. El objetivo de estas páginas es brindar herramientas para pensar y debatir alternativas para los modelos de salud a la luz de la experiencia internacional. Los autores de esta obra nos proponen, a través de un análisis criterioso y pormenorizado de cada uno de estos modelos, repensar una propuesta en la cual la capacidad del Estado no resida solamente en una cuestión de recursos fiscales, sino también en su idoneidad para planificar concertadamente, ampliando la participación popular en los tres niveles de gobierno, con una visión que podríamos llamar sanitarista: asumiendo que hay un problema estructural fundamental, superior incluso al sistema de salud. Esa capacidad se logra mediante acuerdos con los gobiernos provinciales y municipales, con los actores sociales y las empresas privadas, con la academia y el mundo del trabajo y la producción, y no pasando por sobre ellos.

Building Continents of Knowledge in Oceans of Data: The Future of Co-Created EHealth A. Ugon, D. Karlsson, G.O. Klein, 2018-05-18 The domain of eHealth faces ongoing challenges to deliver 21st century healthcare.

Digitalization, capacity building and user engagement with truly interdisciplinary and cross-domain collaboration are just a few of the areas which must be addressed. This book presents 190 full papers from the Medical Informatics Europe (MIE 2018) conference, held in Gothenburg, Sweden, in April 2018. The MIE conferences aim to enable close interaction and networking between an international audience of academics, health professionals, patients and industry partners. The title of this year's conference is: Building Continents of Knowledge in Oceans of Data – The Future of Co-Created eHealth, and contributions cover a broad range of topics related to the digitalization of healthcare, citizen participation, data science, and changing health systems, addressed from the perspectives of citizens, patients and their families, healthcare professionals, service providers, developers and policy makers. The second part of the title in particular has attracted a large number of papers describing strategies to create, evaluate, adjust or deliver tools and services for improvements in healthcare organizations or to enable citizens to respond to the challenges of dealing with health systems. Papers are grouped under the headings: standards and interoperability, implementation and evaluation, knowledge management, decision support, modeling and analytics, health informatics education and learning systems, and patient-centered services. Attention is also given to development for sustainable use, educational strategies and workforce development, and the book will be of interest to both developers and practitioners of healthcare services.

Las TIC y el sector Salud en Latinoamérica Fundación Telefónica, 2008-04-01 El sector salud en Latinoamérica se enfrenta a importantes desafíos que marcan su futuro más inmediato y a largo plazo. El objetivo de este informe es presentar una visión sobre los retos de la salud en algunos países de Latinoamérica, destacando cómo las Tecnologías de la Información y las Comunicaciones (TIC) pueden contribuir a dar respuesta a estos desafíos.

Handbook of Bioethical Decisions. Volume II Erick Valdés, Juan Alberto Lecaros, 2023-06-28 The Handbook of Bioethical Decisions Volume II addresses and analyzes the most important ethical concerns and moral quandaries related to scientific integrity and institutional ethics. It counts on two parts, Part One: Research Ethics, which addresses issues related to Scientific Integrity, Research Misconduct and Conducting Ethical Research, and Part Two: Institutional Ethics and Bioethics Committees, which explores Institutional Ethics issues, Ethics and Bioethics Committees' roles and scopes, and Bioethical Issues in Institutional Ethics. Consequently, the Handbook, Vol. II, offers a remarkable collection of works by outstanding international experts on institutional and research ethics, in order for bioethics practitioners to obtain better elements to address key issues related to integrity in research as well as to decision-making processes. In this fashion, this volume is a valuable resource for professionals working on different bioethical and biomedical fields, such as, ethics and bioethics committees, health care institutions, biomedical and pharmacological companies, and academic settings, among others. Lecciones aprendidas sobre adopción de TIC en PYMES VV.AA. ,2014-01-01 Esta publicación abre una pequeña ventana al enorme reto que representa la incorporación de las nuevas tecnologías en las pequeñas y medianas empresas (PYME) en América Latina. En ella se ilustran experiencias donde las pymes han adoptado las TIC para superar los retos del cambio climático, mejorar la prestación de servicios de salud o apoyar su expansión internacional, entre otros ejemplos.

Cirugía pediátrica José María Valoria Villamartín,1994 El libro está cuajado de nombres españoles eminentes y de colegas iberoamericanos perfectamente cualificados en las distintas materias que se tratan, muchas de las cuales desbordan los desnudos límites de la cirugía en la infancia para hacer incursión en aspectos jurídicos, psicológicos, médicos, obstétricos, anestésicos, neurológicos, metabólicos, enfermos terminales, técnicas modernas de tratamientos endoscópicos, y de tratamientos radioterapéuticos. Las siete partes que comprende la publicación hacen de ella una verdadera cirugía General, en el sentido tradicional de la palabra, aplicada a la infancia, donde los cirujanos generales pediátricos y los especialistas quirúrgicos pueden encontrar su información cumplidamente y, en algunos trabajos, una verdadera extensión especializada. También, al repasar los temas del libro se aprecia el perfecto diseño del mismo para que pueda ser un texto de consulta en el despacho de un cirujano pediátrico.
