The New Criticism Alfred J. Drake, 2014-07-03 This volume covers a variety of authors and topics related to the New Criticism school of the 1920s-1950s in America. Contributors trace the history of the New Criticism as a movement, consider theoretical and practical aspects of various proponents, and assess the record of subsequent engagement with its tenets. The volume will prove valuable for its renewed concentration not only on the New Critics themselves, but also on the way they and their work have been contextualized, criticized, and valorized by theorists and educators during and after their period of greatest influence, both in the United States and abroad.

Contemporary Reconfigurations of American Literary Classics Betina Entzminger, 2013 The number and popularity of novels that have overtly reconfigured aspects of classic American texts suggests a curious trend for both readers and writers, an impulse to retell and reread books that have come to define American culture. This book argues that by revising canonical American literature, contemporary American writers are (re)writing an American myth of origins, creating one that corresponds to the contemporary writer's understanding of self and society. Informed by cognitive psychology, evolutionary literary criticism, and poststructuralism, Entzminger reads texts by canonical authors Poe, Hawthorne, Melville, Alcott, Twain, Chopin, and Faulkner, and by the contemporary writers that respond to them. In highlighting the construction and cognitive function of narrative in their own and in their antecedent texts, contemporary writers highlight the fact that such use of narrative is universal and essential to human beings. This book suggests that by revising the classic texts that compose our cultural narrative, contemporary writers mirror the way human individuals consistently revisit and refigure the past through language, via self-narration, in order to manage and understand experience.

One Health: The Psychology of Human-Nature Relationships for Planetary and Human Wellbeing - Volume II

Elizabeth Louise Freeman, Eric Brymer, Miles Richardson, 2024-04-08 Now more than ever, there is a need to be working together across disciplines and across oceans to understand, tackle and overcome some of the greatest global challenges of human history - climate change and the impact on planetary and human wellbeing (One Health), and the global mental health crisis which is being exacerbated by Covid-19. The Achilles Heel Reader (Routledge Revivals) Victor Seidler, 2012-07-26 First published in 1991, The Achilles Heel Reader brings together key articles from Achilles Heel, the path-breaking and influential magazine of men's sexual politics. It also includes an important introduction by the editor, setting the magazine in its intellectual and historical context. Achilles Heel, first published in 1978, was a magazine which explored positive conceptions of masculinity and the ways in which men can change in response to the challenge of feminism. It sought to persuade men to take responsibility for the power they share as men in relation to women - and to use this responsibility both in their personal relationships and in challenging the political and social institutions and practices that embody such power. This selection covers crucial issues in men's lives - work, sexuality, children, relationships, family, class, sharing the experience of different masculinities - and brilliantly catches the tensions and anxieties of men trying to cope with the interplay between their sexuality and their political commitments. By bringing the personal and the political together The Achilles Heel Reader reconsiders basic questions of socialist theory and practice. It will be of great value to students of sociology, women's studies, politics and cultural studies, as well as those interested in feminism as part of a process of reworking socialism.
