Torrent Megan Linski, 2021-05-06 USA TODAY BESTSELLING AUTHOR Megan Linski takes flight with a young adult paranormal angel romance that features action, magic, and supernatural battles. What if you were in love with heaven and hell? My name's Cassia. Shuffled from home to home since I was a kid, I managed to escape the darkest part of my life and start again in a new town, though it's more dangerous than I expected. I planned to graduate high school and leave my past behind me, until I meet two very different guys... bad boy Thames, and football captain Cairo. Except there's more to these two men than meets the eye. I'm caught up in a dangerous love triangle straight out of a storybook, submerged in a world where angels and demons fight for dominance. I find myself falling for Cairo, who has been gifted powers from heaven, and desiring Thames, who is descended from hell. Trapped in the middle of a holy war, my love for both boys causes me to be hunted by a monster that's emerged straight from the underworld. My life has been turned upside down, and I don't know if I'll survive long enough to taste forbidden fruit. I have to choose— Cairo, or Thames. The wrong decision could bring my damnation. **Torrent** is a YA urban fantasy romance about self-discovery, true love, and learning your own power. This is the first book in the Angels & Demons trilogy. Now a complete series! Featured in the 2018 FOX Teen Choice Awards Gift Baskets, and nominated for Fantasy Series of the Year 2018 by Once Upon a Book!

Barry Commoner and the Science of Survival Michael Egan, 2009-01-23 Chronicles the activist career of Barry Commoner, one of the most influential American environmental thinkers, and his role in recasting the environmental movement after World War II. For over half a century, the biologist Barry Commoner has been one of the most prominent and charismatic defenders of the American environment, appearing on the cover of Time magazine in 1970 as the standard-bearer of the emerging science of survival. In **Barry Commoner and the Science of Survival**, Michael Egan examines Commoner's social and scientific activism and charts an important shift in American environmental values since World War II. Throughout his career, Commoner believed that scientists had a social responsibility, and that one of their most important obligations was to provide citizens with accessible scientific information so they could be included in public debates that concerned them. Egan shows how Commoner moved naturally from calling attention to the hazards of nuclear fallout to raising public awareness of the environmental dangers posed by the petrochemical industry. He argues that Commoner's belief in the importance of dissent, the dissemination of scientific information, and the need for citizen empowerment were

critical planks in the remaking of American environmentalism. Commoner's activist career can be defined as an attempt to weave together a larger vision of social justice. Since the 1960s, he has called attention to parallels between the environmental, civil rights, labor, and peace movements, and connected environmental decline with poverty, injustice, exploitation, and war, arguing that the root cause of environmental problems was the American economic system and its manifestations. He was instrumental in pointing out that there was a direct association between socioeconomic standing and exposure to environmental pollutants and that economics, not social responsibility, was guiding technological decision making. Egan argues that careful study of Commoner's career could help reinvigorate the contemporary environmental movement at a point when the environmental stakes have never been so high.

In AI We Trust Helga Nowotny,2021-08-19 One of the most persistent concerns about the future is whether it will be dominated by the predictive algorithms of AI – and, if so, what this will mean for our behaviour, for our institutions and for what it means to be human. AI changes our experience of time and the future and challenges our identities, yet we are blinded by its efficiency and fail to understand how it affects us. At the heart of our trust in AI lies a paradox: we leverage AI to increase our control over the future and uncertainty, while at the same time the performativity of AI, the power it has to make us act in the ways it predicts, reduces our agency over the future. This happens when we forget that that we humans have created the digital technologies to which we attribute agency. These developments also challenge the narrative of progress, which played such a central role in modernity and is based on the hubris of total control. We are now moving into an era where this control is limited as AI monitors our actions, posing the threat of surveillance, but also offering the opportunity to reappropriate control and transform it into care. As we try to adjust to a world in which algorithms, robots and avatars play an ever-increasing role, we need to understand better the limitations of AI and how their predictions affect our agency, while at the same time having the courage to embrace the uncertainty of the future.

Berlin Calling Paul Hockenos,2017-05-23 An exhilarating journey through the subcultures, occupied squats, and late-night scenes in the anarchic first few years of Berlin after the fall of the wall Berlin Calling is a gripping account of the 1989 peaceful revolution in East Germany that upended communism and the tumultuous years of artistic ferment, political improvisation, and pirate utopias that followed. It's the story of a newly undivided Berlin when protest and punk rock, bohemia and direct democracy, techno and free theater were the order of the day. In a story stocked with fascinating characters from Berlin's highly politicized undergrounds—including playwright Heiner Müller, cult figure Blixa Bargeld of the industrial band Einstürzende Neubauten, the internationally known French Wall artist Thierry Noir, the American multimedia artist Danielle de Picciotto (founder of Love Parade), and David Bowie during his Ziggy Stardust

incarnation—Hockenos argues that the DIY energy and raw urban vibe of the early 1990s shaped the new Berlin and still pulses through the city today. Just as Mike Davis captured Los Angeles in his *City of Quartz*, *Berlin Calling* is a unique account of how Berlin became hip, and of why it continues to attract creative types from the world over.

A Normal Totalitarian Society Vladimir Shlapentokh,2017-07-05 Shlapentokh undertakes a dispassionate analysis of the ordinary functioning of the Soviet system from Stalin's death through the Soviet collapse and Russia's first post-communist decade. Without overlooking its repressive character, he treats the USSR as a normal system that employed both socialist and nationalist ideologies for the purposes of technological and military modernization, preservation of empire, and expansion of its geopolitical power. Foregoing the projection of Western norms and assumptions, he seeks to achieve a clearer understanding of a civilization that has perplexed its critics and its champions alike.

Traces of Violence Robert R. Desjarlais, Khalil Habrih, 2021-11-30 In this highly original work, Robert Desjarlais and Khalil Habrih present a dialogic account of the lingering effects of the terroristic attacks that occurred in Paris in November 2015. Situating the events within broader histories of state violence in metropolitan France and its colonial geographies, the authors interweave narrative accounts and photographs to explore a range of related phenomena: governmental and journalistic discourses on terrorism, the political work of archives, police and military apparatuses of control and anti-terror deterrence, the histories of wounds, and the haunting reverberations of violence in a plurality of lives and deaths. *Traces of Violence* is a moving work that aids our understanding of the afterlife of violence and offers an innovative example of collaborative writing across anthropology and sociology.

Girl Talk--God Talk Sally Miller, 2006 More than ever, women need girlfriends—people they can walk and talk with, hug and cry with. The joy and comfort found between girlfriends reflects in small measure what believers can experience in their relationship with God. Through the lens of friendship, Sally Miller reveals ways women can build an ongoing, meaningful prayer conversation with God... spending time with our friends draws us closer together the more time we spend with God, the more intimate we become friendships come in all shapes prayer can take many forms listening is sometimes more important than speaking hearing what God has to say motivates and energizes us *Girl Talk...God Talk* shows readers how to experience a dynamic relationship with Jesus.

Vivid Tomorrows David Brin, 2021-03-04 Can science fiction--especially sci-fi cinema--save the world? It already has, many times. Retired officers testify that films like *Doctor Strangelove*, *Fail-Safe*, *On the Beach* and *War Games* provoked changes and helped prevent accidental war. *Soylent Green* and *Silent Running* recruited millions of environmental activists. The *China Syndrome* and countless movies about plagues helped bring attention to those failure modes. And the grand-daddy of self-preventing prophecy--*Nineteen Eighty-Four*--girded countless citizens to stay wary of Big Brother. It's not been all dire

warnings. While optimism is much harder to dramatize than apocalypse, both large and small screens have also encouraged millions to lift their gaze, contemplating how we might get better, incrementally, or else raise grandchildren worthy of the stars. Come along on a quirky quest for unusual insights into the power of forward-looking media. How the romantic allure of feudalism tugs at men and women who benefited vastly from modernity. Or explore why almost every Hollywood film preaches Suspicion of Authority, along with tolerance, diversity and personal eccentricity, and how those messages helped keep us free. No one is spared scrutiny! Not Spielberg or Tolkien or Cameron or Costner... nor Dune or demigods or zombie flicks. Certainly not George Lucas or Ayn Rand! Though some critiques are offered from a lifetime of respect and love... and gratitude.

Hope, Utopia and Creativity in Higher Education Craig A. Hammond, 2017-01-12 Reappraising ideas associated with Ernst Bloch, Roland Barthes and Gaston Bachelard within the context of a utopian pedagogy, *Hope, Utopia and Creativity in Higher Education* reframes the transformative, creative and collaborative potential of education offering new concepts, tactics and pedagogical possibilities. Craig A. Hammond explores ways of analysing and democratising not only pedagogical conception, knowledge and delivery, but also the learning experience, and processes of negotiation and peer-assessment. Hammond shows how the incorporation of already existent learner hopes, daydreams, and creative possibilities can open up new opportunities for thinking about popular culture and memory, learning and knowledge, and collaborative communities of support. Drawing together theoretical and cultural material in a teaching and learning environment of empowerment, Hammond illustrates that formative articulations of alternative, utopian futures, across sociological, humanities, and education studies subjects and curricula, becomes possible.

Nothing Is Beyond Our Reach Kristie Macrakis, 2023 Ever since the earliest days of the Cold War, American intelligence agencies have launched spies in the sky, implanted spies in the ether, burrowed spies underground, sunk spies in the ocean, and even tried chemical means to pry open the human mind. The United States increasingly has covered the globe with planes, satellites, drones, electronics, tunnels, and submarines all in the service of intelligence. Hard targets meant that American intelligence could not entirely rely on human spies, but it was more than that. *Nothing is Beyond Our Reach* reveals how America's love-affair with technology has led to its dependence on machines in intelligence collection and how this has almost inadvertently created a global surveillance empire. In a lively and engaging narrative, author Kristie Macrakis tells this story of how intelligence has changed from American technophilia and what its implications will be--

Antisocial Andrew Marantz, 2020-09-15 Trenchant and intelligent. --The New York Times As seen/heard on NPR, New Yorker Radio Hour, The New York Book Review Podcast, PBS Newshour, CNBC, and more. A New York Times Book Review Editors' Choice A New York Times Notable Book of 2019 From a rising star at The New Yorker, a deeply immersive chronicle

of how the optimistic entrepreneurs of Silicon Valley set out to create a free and democratic internet--and how the cynical propagandists of the alt-right exploited that freedom to propel the extreme into the mainstream. For several years, Andrew Marantz, a New Yorker staff writer, has been embedded in two worlds. The first is the world of social-media entrepreneurs, who, acting out of naïvete and reckless ambition, upended all traditional means of receiving and transmitting information. The second is the world of the people he calls the gate crashers--the conspiracists, white supremacists, and nihilist trolls who have become experts at using social media to advance their corrosive agenda. *Antisocial* ranges broadly--from the first mass-printed books to the trending hashtags of the present; from secret gatherings of neo-Fascists to the White House press briefing room--and traces how the unthinkable becomes thinkable, and then how it becomes reality. Combining the keen narrative detail of Bill Buford's *Among the Thugs* and the sweep of George Packer's *The Unwinding*, *Antisocial* reveals how the boundaries between technology, media, and politics have been erased, resulting in a deeply broken informational landscape--the landscape in which we all now live. Marantz shows how alienated young people are led down the rabbit hole of online radicalization, and how fringe ideas spread--from anonymous corners of social media to cable TV to the President's Twitter feed. Marantz also sits with the creators of social media as they start to reckon with the forces they've unleashed. Will they be able to solve the communication crisis they helped bring about, or are their interventions too little too late?

Mediatized Dramaturgy Seda Ilter, 2021-07-15 This study explores the ways in which playtexts have evolved in relation to the sociocultural and cognitive conditions of a mediatized age, and how they, in form and content, respond to this environment and open up new critical possibilities in text and performance. The study combines theatre and media theory through the innovative concept of 'mediatized dramaturgy' and offers conceptual reflections on the ways in which a playtext negotiates the new reality of contemporary culture. The book scrutinizes the form of playtexts and works through the exchange between text and performance by exploring contemporary works such as Simon Stephens's *Pornography*, Caryl Churchill's *Love and Information*, and David Greig's *The Yes/No Plays*, and their selected productions. Offering a pioneering intervention that expands discussions about the mediatization of theatre, and new playwriting, *Mediatized Dramaturgy* proposes areas for discussion that appeal to researchers, audiences and practitioners with an interest in the sub-field of media and performance, and British and North American drama and theatre. Media technologies and their socio-cultural repercussions have increasingly influenced theatre, particularly since the ubiquitous prevalence of digital technologies from the 1990s onwards. Consequently, new modes such as digital and intermedial theatre have come to populate and transform the theatre practice and scholarship. In this changing theatrical landscape, what has happened to plays in the historically text-oriented British theatre? How has playtext changed in an age of theatre marked by mediatization and its possibilities?
