We specify these HTTP verbs in the capital case. Below is the comparison between them. However, you could always get it by formatting the output. The property you are looking for is OwningProcess. If you want to find out the ID of the process that is listening on port 443, run this command: *How do I get and set Environment variables in C#?* Oct 8, 2008 · How can I get Environment variables and if something is missing, set the value? **Get size of all tables in database - Stack Overflow** Oct 25, 2011 · After some searching, I could not find an easy way to get information on all of the tables.
