The Making of the Pentecostal Melodrama Katrien Pype,2012 How religion, gender, and urban sociality are expressed in and mediated via television drama in Kinshasa is the focus of this ethnographic study. Influenced by Nigerian films and intimately related to the emergence of a charismatic Christian scene, these teleserials integrate melodrama, conversion narratives, Christian songs, sermons, testimonies, and deliverance rituals to produce commentaries on what it means to be an inhabitant of Kinshasa.

Women's Lives around the World Susan M. Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04 Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world, with coverage that includes the education of girls and teens; the key roles women play in their families, careers, religions, and cultures; how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

Joyce Chang, 2020-01-07 Cutting edge and student-friendly, Choices in Relationships takes readers through the lifespan of relationships, marriages, and families, and utilizes research to help them make deliberate, informed choices in their interpersonal relationships.

The Other Half of Gender Ian Bannon, Maria Correia, 2006-01-01 This book is an attempt to bring the gender and development debate full circle—from a much-needed focus on empowering women to a more comprehensive gender framework that considers gender as a system that affects both women and men. The chapters in this book explore definitions of masculinity and male identities in a variety of social contexts, drawing from experiences in Latin America, the Caribbean and sub-Saharan Africa. It draws on a slowly emerging realization that attaining the vision of gender equality will be difficult, if not impossible, without changing the ways in which masculinities are defined and acted upon. Although changing male

gender norms will be a difficult and slow process, we must begin by understanding how versions of masculinities are defined and acted upon.

World Development Report 2012 The International Bank for Reconstruction and Development / The World BankThe International Bank for Reconstruction and Development / The World Bank,2011-09-28 The lives of women around the world have improved dramatically, at a pace and scope difficult to imagine even 25 years ago. Women have made unprecedented gains in rights, education, health, and access to jobs and livelihoods. More countries than ever guarantee equal rights in property, marriage, and other domains. Gender gaps in primary schooling have closed in many countries, while in a third of

all countries girls now outnumber boys in secondary school. And more young women than men attend universities in 60 countries. Women are using their education to participate more in the labor force: they now make up for 40 percent of the global labor force and 43 percent of its farmers. Moreover, women now live longer than men in every region of the world. Despite the progress, gaps remain in many areas. Women are more likely to die—relative to males—in many low- and middle-income countries than their counterparts in rich countries, especially in childhood and during their reproductive years. Primary and secondary school enrollments for girls remain much lower than for boys in many Sub-Saharan African countries and some parts of South Asia, as well as among disadvantaged populations. Women are more likely than men to work as unpaid family laborers or in the informal sector, to farm smaller plots and grow less profitable crops, operate in smaller firms and less profitable sectors, and generally earn less. Women—especially poor women—have less say over decisions and less control over household resources. And in most countries, fewer women participate in formal politics than men and are underrepresented in the upper echelons. The World Development Report 2012: Gender Equality and Development argues that closing these persistent gender gaps matters. It matters because gender equality is a core development objective in its own right. But it is also smart economics. Greater gender equality can enhance productivity, improve development outcomes for the next generation, and make institutions more representative. Building on a growing body of knowledge on the economics of gender equality and development, the Report identifies the areas where gender gaps are most significant—both intrinsically and in terms of their potential development payoff—and where growth alone cannot solve the issues. It then sets forth four priorities for public action: Reducing excess female mortality and closing education gaps where they remain Improving access to economic opportunities for women Increasing women’s voice and agency in the household and in society Limiting the reproduction of gender inequality across generations.

An Introduction to the Bible and Theology John Heywood, 2016-09-28 The series of studies in this book came about as a result of a concern to see God’s people equipped to implement his purposes in the area in which they live. Not everyone has the opportunity to study full-time, and these studies are flexible enough to be useful either as a study guide or as a reference book. They were originally written to train Christians in the local church situation and have now been revised and reformatted in order to provide an accessible introduction to Christian doctrine and other matters for all who wish to study but cannot attend a bible college. The various chapters will enable the student to approach the Bible in such a way as to have a proper understanding of the text and the truth that it reveals to us. There is an introduction to the historical situations of the biblical period and their relationship to the world of that time. Space is also given to summarizing the content of each biblical book in order to provide an overview, helping you to see the big picture. In each study of a particular doctrine, the emphasis is on what the Bible teaches and the place of a personal God with whom we can have a living relationship through Jesus Christ his Son. Each chapter is complete in itself and is written in plain English, with technical terms explained where

necessary. They provide a foundation upon which the student can build to whatever level is appropriate.
