Accident Prevention Handbook United States. Department of the Air Force, 1962

Air Force AFM. , 1962

Modern Marine Internal Combustion Engines Ievgen Bilousov, Mykola Bulgakov, Volodymyr Savchuk, 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas-diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

Technical Manuals for German Vehicles, Volume 2, Sonderkraftfahrzeug Charles Lemons,2013-03-25 This book contains a listings of technical manuals for the repair and maintenance of German World War II armored vehicles. Each vehicle is listed by its Sd Kfz number, followed by a list of the known manuals which you would require to repair and maintain both the vehicle and the equipment it would carry including radios, weapons, and other equipment. This not only includes the military manuals, but also pamphlets, announcements, and any civilian company manuals used to maintain on board equipment. Manuals include those published for the Heer and Luftwaffe. All manual titles have been translated into American English.
