web may 25 2021 using like bases to solve exponential equations the first technique involves two functions with like bases recall that the one to one property of exponential functions tells us that for any real numbers b $b > 0$ $b \neq 1$ s s and t t where $b^s = b^t$ if and only if $s = t$

web an exponential equation is an equation in which the variable appears in an exponent a logarithmic equation is an equation that involves the logarithm of an expression containing a variable to solve exponential equations first see whether you can write both sides of the equation as powers of the same number
