Pampean Lakes Eduardo Luis Piovano,Silvina Stutz,Juan Antonio Morales,Daniel Ariztegui,2025-07-20 This book is for advanced students, researchers and professionals from Earth and Environmental Sciences. The Argentinean Pampa plain is an extensive region of ca 673,000 km² between 30°S and 38°S in South America. The region encompasses a large number of lakes (>50,000) of highly variable sizes. Pampean lakes have been very sensitive to past and recent climatic change. Thus, paleolimnological research across the Pampa plain provides unique insights into regional environmental variability since the Late Pleistocene up to the most recent hydroclimatic changes. These lakes are sensors of both the documented increase in precipitation that occurred after the 1970's seventies as well as substantial changes in land use It compiles the most outstanding information of the region for the last 30 years regarding ecological aspects, changes in land-use processes and their impact on water bodies, paleolimnological reconstructions, archeology, hydroclimatic variability and associated human dimension. This knowledge provides environmental information that is fundamental to develop integrated water management projects.

Freshwaters and Wetlands of Patagonia Gabriela Mataloni, Rubén D. Quintana, 2022-09-29 The Freshwaters of Patagonia adopts a socioecological approach, in which experts from across Patagonia review recent, scientifically rigorous literature and data of their own, thus synthesizing the current knowledge directly relevant to understand the present state and future trends of icefields, freshwater and wetland ecosystems in this region. Historia y Patrimonio Cultural Alcántara, Manuel, García Montero, Mercedes, Sánchez López, Francisco, 2018-07-01 El Comité Organizador del 56º Congreso Internacional de Americanistas (ICA) publica las actas del encuentro celebrado en la Universidad de Salamanca el 15 al 20 de julio de 2018. Bajo el lema «Universalidad y particularismo en las Américas», reflexionó sobre la dialéctica entre la universalidad y los particularismos en la producción de conocimiento, un diálogo en el que la necesidad de conocer los particularismos de los fenómenos sociales, políticos, artísticos y culturales obliga a formular nuevas hipótesis que enriquecen y replantean las grandes teorías generales de las ciencias y las humanidades. El carácter interdisciplinario e inclusivo que ha caracterizado al ICA desde su inicio en 1875, como un congreso de estudios de área en sentido completo, hace aún más significativa esa dinámica de producción de conocimiento. Con un planteamiento interdisciplinario e inclusivo, ICA reúne a investigadores que estudian el continente americano, desde Alaska hasta Tierra de Fuego, incluyendo el territorio del Caribe, a partir del análisis de su política, economía, cultural, lenguas, historia y

prehistoria. Así, el Comité Organizador les invitó participar en el análisis y la reflexión sobre las especificidades de las Américas y el Caribe con el objetivo de enriquecer las grandes teorías generales.

Contemporary Politics, Communication, and the Impact on Democracy Palau-Sampio, Dolors, López García, Guillermo, Iannelli, Laura, 2021-11-12 The loss of credibility of traditional media and democratic institutions points to the important challenges for the democratic system. Social networks have allowed new political and social actors to disseminate their messages, which has raised diversity. However, it has also lowered the standards for the circulation of messages and has increased disinformation and hate speech. Contemporary Politics, Communication, and the Impact on Democracy addresses communication and politics and the impact on democracy. This book offers a valuable contribution regarding the challenges and threats faced by traditional and stable democracies while disinformation, polarization, and populism have a main role in the present hybrid communicative scenario. Covering topics such as digital authoritarianism, emotional and rational frames, and political conflict on social media, this is an essential resource for political scientists, communication specialists, analysts, policymakers, politicians, critical media scholars, graduate students, professors, researchers, and academicians.

Biostimulants in Agriculture II: Towards a Sustainable Future Maurizio Ruzzi, Giuseppe Colla, Youssef Rouphael, 2024-06-11 Modern agriculture needs to review and broaden its practices and business models, by integrating opportunities coming from different adjacent sectors and value chains, including the bio-based industry, in a fully circular economy strategy. Searching for new tools and technologies to increase crop productivity under optimal and sub-optimal conditions and to improve resources use efficiency is crucial to ensure food security while preserving soil quality, microbial biodiversity, and providing business opportunities for farmers. Biostimulants based on microorganisms or organic substances obtained from renewable materials represent a sustainable, efficient technology or complement to synthetic counterparts, to improve nutrient use efficiency and secure crop yield stability. Under the new European Union Regulation 2019/1009, plant biostimulants were defined based on four agricultural functional claims as follows: Plant biostimulants are products that stimulate plant nutrition processes independently of the product's nutrient content with the sole aim of improving one or more of the following characteristics of the plant and/or the plant rhizosphere: 1) nutrient use efficiency, 2) tolerance resistance to (a) biotic stress, 3) quality characteristics or 4) availability of confined nutrients in the soil or rhizosphere'. Many diverse natural substances and chemical derivatives of natural or synthetic compounds, as well as beneficial microorganisms, are cataloged as plant biostimulants including i) humic substances, ii) plant or animal-based protein hydrolysates, iii) macro

and micro-algal extracts, iv) silicon, v) arbuscular mycorrhizal fungi (AMF) and vi) plant growth-promoting rhizobacteria (PGPR) belonging to the Azotobacter, Azospirillum and Rhizobium genera.

Applications of Wavelet Multiresolution Analysis Juan Pablo Muszkats, Silvia Alejandra Seminara, María Inés Troparevsky, 2021-03-10 This work results from a selection of the contributions presented in the mini symposium “Applications of Multiresolution Analysis with “Wavelets”, presented at the ICIAM 19, the International Congress on Industrial and Applied Mathematics held at Valencia, Spain, in July 2019. The presented developments and applications cover different areas, including filtering, signal analysis for damage detection, time series analysis, solutions to boundary value problems and fractional calculus. This bunch of examples highlights the importance of multiresolution analysis to face problems in several and varied disciplines. The book is addressed to researchers in the field.

Climate Change and Human Responses Gregory Monks, 2017-03-21 This book contributes to the current discussion on climate change by presenting selected studies on the ways in which past human groups responded to climatic and environmental change. In particular, the chapters show how these responses are seen in the animal remains that people left behind in their occupation sites. Many of these bones represent food remains, so the environments in which these animals lived can be identified and human use of those environments can be understood. In the case of climatic change resulting in environmental change, these animal remains can indicate that a change has occurred, in climate, environment and human adaptation, and can also indicate the specific details of those changes.

Guide for Protection and Repair of Concrete Structures FIB - International Federation for Structural Concrete, 2022-03-01 The idea of preparing a technical document for the repairs and interventions upon concrete structures goes back to the former fib COM5: Structural Service Life Aspects, being the goal of the then TG5.9. After a long period of reduced activity, and taking into account the reorganization of fib commissions that meanwhile took place, on June 2017 a different approach was proposed to push forward the task of TG8.1 (formerly TG5.9). The (new) goal of TG 8.1 was to deliver a ‘how-to-do’ guide, gathering together protection, repair, and strengthening techniques for concrete structures. Chapters are intended to provide both guidelines and case-studies, serving as support to the application of fib MC2020 pre-normative specifications. Each chapter was written by an editorial team comprising desirably at least a researcher, a designer and a contractor. Templates have been prepared in order to harmonize the contents and the presentation of the different methods. Following the writing process, chapters were reviewed by experts and, after amendments by the authors, they underwent a second review process by COM8 and TG3.4 members, as well as by different practitioners. For each protection, repair and strengthening method addressed in this guide, readers have a description of when to adopt it, which materials and systems are required, which techniques are available, and what kind of equipment is needed. It then presents a summary of stakeholders’ roles and qualifications, design guidelines referring to most relevant codes and references, the intervention

procedure, quality control measures and monitoring and maintenance activities. Due to the extent of the guide, it was decided to publish it as bulletin 102, addressing protection and repair methods, and bulletin 103, addressing strengthening methods. We would like to thank the authors, reviewers and members of COM8 and TG3.4 for their work in developing this fib Bulletin, which we hope will be useful for professionals working in the field of existing concrete structures, especially those concerned with life-cycle management and conservation activities. As noted above, this Bulletin is also intended to act as a background and supporting document to the next edition of the fib Model Code for Concrete Structures, which is currently under development under the auspices of TG10.1 with the working title of fib Model Code 2020.
